**John Michael Rziha**

## **Happier By Degrees:**

**Happier by Degrees** Pam Mendelsohn, 1986      *Perfecting Human Actions* John Michael Rziha, 2009 During the last few centuries a practical dichotomy between God and humans has developed within moral theory As a result moral theory tends to focus only on humans where human autonomy is foundational or only on God where divine commands capriciously rule However the moral theology of Thomas Aquinas overcomes this dichotomy For Thomas humans reach their perfection by participating in God s wisdom and love *Perfecting Human Actions* explores the ways humans participate in eternal law God s wisdom that guides and moves all things to their proper action The book begins with a thoughtful examination of the philosophic recovery of the notion of participation in Thomistic metaphysics It then explains Thomas s theological understanding of the notion of participation to show how humans are related to God It is discovered that when performing human actions humans participate in the eternal law in two ways as moved and governed by it and cognitively In reference to participation as moved and governed humans are directed by God to their proper end of eternal happiness This mode of participation can be increased by perfecting the natural inclinations through virtue grace and the gifts of the Holy Spirit In reference to cognitive participation humans as rational creatures can know their proper end and how to attain it Through this knowledge of moral truths the intellect participates in the eternal law Cognitive participation is perfected by the intellectual virtues especially faith and the gifts of the Holy Spirit especially wisdom The book concludes by showing how the notion of human participation in the eternal law is a much better foundation for moral theory than the contemporary notion of autonomy ABOUT THE AUTHOR John Rziha is associate professor of theology at Benedictine College PRAISE FOR THE BOOK A competent and indeed masterful study Rziha s book is to be welcomed as not just an important but indeed an overdue contribution to the contemporary recovery of Aquinas s moral theory More importantly this study is of surpassing importance in advancing the correct understanding of the relationship between human freedom and natural law Rziha s lucidly written and well documented study displays all the characteristics of a competent and learned interpretation of the thought of the doctor communis according to the highest standards of current Aquinas scholarship Reinhard Hutter Thomist Rziha explores at length the two modes by which human participate in God s eternal law as moved and governed by it and as having knowledge of it T his book proves to be something of a comprehensive course in Thomistic thought This project is supported by extensive and meticulous footnote reverences to texts of Aquinas Janine Marie Idziak *Speculum      Sermons upon the Future State of Happiness, etc* Edward THOMPSON (D.D., Vicar of Kington, Herefordshire.), 1843      Divine Providence Emanuel Swedenborg, 1933      *The six degrees of crime; or, Wine, women, gambling, theft, murder and the scaffold [a play]*. McMahon,2006 An intellectual history of man s most elusive yet coveted goal Today we think of happiness as a natural right but people haven t always felt this way Historian McMahon argues that our modern belief in happiness is a recent development the product of a revolution in human expectations carried out since the eighteenth century He investigates that fundamental transformation by synthesizing two thousand years of politics culture and thought In ancient Greek tragedy happiness was considered a gift of the gods During the Enlightenment men and women were first introduced to the novel prospect that they could in fact should be happy in this life as opposed to the hereafter This recognition of happiness as a motivating ideal led to its consecration in the Declaration of Independence McMahon then shows how our modern search continues to generate new forms of pleasure but also paradoxically new forms of pain From publisher description **Major in Happiness** Michael Edmondson,2015-12-16 This book examines a variety of assumptions prevalent in the mental models of undergraduates parents educators higher education leaders administrators and policymakers that cause people to fall into a series of mental traps when selecting a major Divided into three parts this publication presents a situational analysis on choosing a college major dissects the mental models and traps people rely on and offers a variety of assessments that can help increase one s self awareness prior to declaring a major *The Science and Application of Positive Psychology* Jennifer S.
