The Hard People Patrick Heady,1999 Heady draws on both participant observation and interviews with older informants to trace the effects of recent exogenous technological and institutional changes and the way local people have responded to them His findings relate to such themes of recent history as nationalism regionalism and anti clericalism and contribute to the theoretical debate on the relevance of structuralist anthropology to European societies *The Hard People* Patrick Heady,2013-12-19 Heady draws on both participant observation and interviews with older informants to trace the effects of recent exogenous technological and institutional changes and the way local people have responded to them His findings relate to such themes of recent history as nationalism regionalism and anti clericalism and contribute to the theoretical debate on the relevance of structuralist anthropology to European societies **The Bounded Field** Jaro Stacul,2018-01-15 Regionalism is one of the most debated issues in contemporary western Europe Yet why the region rather than the nation state can have such a strong appeal for the construction of social and political identity remains largely unexplored Drawing on data collected in the mountainous Trentino region of northern Italy the author investigates how ideas about village boundaries and private property form the background against which regionalist ideologies are understood In suggesting that ideas about regionalism largely reflect views about private property he provides an alternative to theories of nationalism that overlook the articulation between official ideologies and discourses at the local level Mayan People Within and Beyond Boundaries Peter Hervik,1999 First Published in 2003 Routledge is an imprint of Taylor Francis an informa company

**Crossing European Boundaries** Jaro Stacul,Christina Moutsou,Helen Kopnina,2006 At the turn of the millennium the state of Europe is fluid and contested yet how this affects the everyday lives of European peoples and the ways they experience the social world they live in remains largely unexplored Drawing upon ethnographic information from diverse European settings this volume points to the contradictions that the project of a Europe without boundaries involves In illustrating how the removal of political boundaries can create other boundaries the articles in this volume provide alternatives to recent theorising on complexity which takes little account of human agency Neo-nationalism in Europe and Beyond André Gingrich,Marcus Banks,2006 Prompted by the near simultaneous rise to political influence of more than a dozen apparently similar parties across Western Europe this collection offers a range of European case studies with selected global examples such as the Front National the late Pim Fortuyn and India and the BJP Unstructuring Chinese Society Allen Chun,2004-08-02 Unstructuring Chinese Society is a culmination of long term field work and archival research that challenges existing theories of social organisation and cultural change The book makes new sense of historical contradictions political conflicts and deep seated social transformations that have underlined the experience of colonial rule and the practices of local institutions in Hong Kong over the past century By focusing on the ongoing interactions of discourse practices and global local relations in cultural terms Unstructuring Chinese Society puts forth a fresh perspective in the field

of historical anthropology while addressing ongoing critical concerns in postcolonial theory and our understanding of tradition and modernity *Environmental Archaeology and the Social Order* John G. Evans, 2004-02-24 Presenting a wide variety of case studies ranging from the early Palaeolithic to Post modernity and from Europe to the Andes West and East Africa and the USA *Environmental Archaeology and the Social Order* deals with both the theory and method of environmental archaeology Including significant sections on Neanderthals Palaeolithic mobiliary art and the origins of farming as well as transhumance climate as social construct field survey and the place of documents in environmental research Professor Evans interprets his findings in social constructionist terms creating an important argument against the use of traditional materialist and processualist paradigms This original and controversial volume sets a new agenda for the study and understanding of environmental archaeology and will prove an informative and useful purchase **Conceiving Persons** Peter Loizos, 2021-03-24 The Monographs on Social Anthropology were established in 1940 and aim to publish results of modern anthropological research of primary interest to specialists This volume provides an international analysis of the core metaphors and practices of human sexual and social reproduction in their personal social and cosmological contexts **The Heritage Arena** Cristina Grasseni, 2016-10-01 In Europe a number of production and communication strategies have long tried to establish local products as resources for local development At the foot of the Alps this scenario appears in all its contradictions especially in relation to cheese production The Heritage Arena focuses on the saga of Strachitunt a cheese that has been designated an EU Protected Designation of Origin after years of negotiation and competition involving cheese makers merchants and Slow Food activists The book explores how the reinvention of cheese as a form of heritage is an ongoing and dynamic process rife with conflict and drama **Women, Religion, and the Gift** Morny Joy, 2016-10-19 This book introduces the special dynamics of women and their close relationships with the gift in both past and contemporary religious settings Written from a cross cultural perspective it challenges depictions of women s roles in religion where they have been relegated to compliance with specifically designated gendered attributes The different chapters contest the resultant stereotypes that deny women agency Each chapter describes women as engaged in an aspect of religion from that of ritual specialists to benefactors and patrons or even innovators The volume examines topics such as sainthood and sacrifice so as to refine these ideas in constructive ways that do not devalue women It also examines the meaning of the term gift today embracing the term in both figurative and literal ways Such a collection of diverse women s writings and activities provides a significant contribution to their quest for recognition and also suggests ways this can be understood and realized today Grazing Communities Letizia Bindi, 2022-05-13 Pastoralism is a diffused and ancient form of human subsistence and probably one of the most studied by anthropologists at the crossroads between continuities and transformations The present critical discourse on sustainable and responsible development implies a change of practices a huge socio economic transformation and the return of new shepherds and herders in different European regions Transhumance and extensive

breeding are revitalized as a potential resource for inner and rural areas of Europe against depopulation and as an efficient form of farming deeply influencing landscape and functioning as a perfect eco system service This book is an occasion to reconsider grazing communities frictions in the new global heritage scenario **Dresden** Elizabeth A. Ten Dyke,2014-05-22

The collapse of the German Democratic Republic prompted the East Germans to confront their personal cultural and international past This study of the Wende the turn of events in 1989 is based on ethnographic and anthropological research conducted in the early 1990s Liz Ten Dyke has developed a finely nuanced portrait of the city and its residents as they were caught up in the economic political and social turmoil that characterized the immediate post socialist period By weaving together scholarly research oral history and ethnographic excursions or narratives of salient experiences this book makes an important contribution to the study of social aspects of the past Moving beyond paradigms presently shaping the study of memory it details the paradoxes and contradictions inherent in remembering making manifest the link between such contradictions and larger symbolic and political economic contexts In this way the author situates the study of memory in history and shows that it is the mutability of memory in conjunction with the uncertainty of history that render the past a dynamic and powerful force in human society Nothing Without Tourism Danaé Leitenberg,2025-10-01

For centuries locals in many Swiss Alpine villages have depended on visitors wanderlust to sustain their livelihoods Based on ethnographic fieldwork conducted in a German speaking village and tourist resort between 2017 and 2023 this book explores people s everyday experience of tourism as a volatile yet vital industry where successes and failures in the past present and future intersect in puzzling ways Following native locals migrant hospitality workers from mostly Southern and Eastern Europe as well as tourism lobbyists in this globalized mountain village it examines how power imbalance among those dependent on tourism elicit different responses to the dilemmas of tourism *Postsocialism* Maruška Svašek,2008-01-01

In many parts of post socialist Europe the tumultuous political and economic developments have generated strong emotions ranging from hope and euphoria to disappointment envy disillusionment sorrow loneliness and hatred Yet these aspects have been largely neglected in analyses of the profound transformations that have taken place in Central and Eastern Europe since 1990 Based on a wide variety of ethnographic case studies focusing on Russian Siberian Romanian Bulgarian Slovenian Croatian Czech and Polish communities this volume proves the significance of emotions to post socialist political processes as an inherent part of the transformations and sheds new light on the impact of local national and transnational political forces that have given rise to the resurgence of nationalist sentiments increasing poverty and marginalization conflicts arising from the restitution of state property constitutional changes and economic deprivation *Demographic Research, Volume 17: Book I* Demographic Research,2008

*Fertility, Conjuncture, Difference* Philip Kreager,Astrid Bochow,2017-09-01

In the last forty years anthropologists have made major contributions to understanding the heterogeneity of reproductive trends and processes underlying them Fertility transition rather than the story of the triumphant spread of Western birth control

rationality reveals a diversity of reproductive means and ends continuing before during and after transition This collection brings together anthropological case studies placing them in a comparative framework of compositional demography and conjunctural action The volume addresses major issues of inequality and distribution which shape population and social structures and in which fertility trends and the formation and size of families are not decided solely or primarily by reproduction

Mieres Reborn A. F. Robertson, 2012-04-09 Mieres Reborn reveals how patient observation and an analysis of one small community have much to tell us about human progress more generally Not long ago Mieres a village in the eastern foothills of the Pyrenees seemed destined to die As in countless thousands of rural communities around the world young people in Mieres over the years have moved to the towns and cities leaving behind abandoned fields and meadows derelict houses and their aging and disconsolate parents and grandparents Close observation of this social microcosm over two decades reveals the capacity of ordinary people in a locality to reinvent themselves reconstruct relationships with the wider world and confront new threats to their collective survival A F Robertson describes how the determination that Mieres should survive is most evident in a vigorous round of fiestas fairs and other public events in which natives exiles and newcomers work to create a lively sense of belonging Since the 1980s Mieres has been enlivened by a reverse flow of migrants from the cities new settlers who have brought an infusion of youth to the community devised new livelihoods revitalized the village school energized the native Mierencs and provided the impetus for a rediscovery of historical roots and political identity The regeneration of life in the countryside in part a reaction to urban expansion and decay is a global phenomenon of increasing political economic and social significance

**Variations on Uzbek Identity** Peter Finke, 2014-02-01 Throughout its history the concept of Uzbekness or more generally of a Turkic speaking sedentary population has continuously attracted members of other groups to join as being Uzbek promises opportunities to enlarge ones social network Accession is comparatively easy as Uzbekness is grounded in a cultural model of territoriality rather than genealogy as the basis for social attachments It acknowledges regional variation and the possibility of membership by voluntary decision Therefore the boundaries of being Uzbek vary almost by definition incorporating elements of local languages cultural patterns and social organization This book combines an historical analysis with thorough ethnographic field research looking at differences in the conceptualization of group boundaries and the social practices they entail It does so by analysing decision making processes by Uzbeks on the individual as well as cognitive level and the political configurations that surround them

The Return of Private Property Lale Yalçın-Heckmann, 2010 What makes private property valuable desirable or workable This book focuses on social and economic dimensions of private property after the agrarian reforms of 1996 in Azerbaijan It looks at the kinds of land and cultivation strategies emerging in the decades after the fall of the Soviet Union and asks why rural households were often unwilling to cultivate the privatized land shares they received for free despite the threat and existence of rural poverty Consideration is given both to households which were

engaging in cultivation and those which were not This includes internally displaced persons who were formally excluded from the privatization process but were nevertheless successful and eager cultivators How and why were they keen on using land How far does private property thrive on its own without the support of lucrative markets or without the implementation of state sponsored economic policies Through the lens and insights provided by economic anthropology this study chronicles the historical legacy of authoritarian state structures as well as the contemporary micro and macro economic struggles that mark a politics of property after socialism
