Harmony And Strife Contemporary Perspectives East West:

Harmony and Strife Shuxian Liu, Robert Elliott Allinson, 1988 This volume is intended for professional philosophers and laymen with an interest in East West studies and comparative philosophy and religion The central focus is the concept of comparing perspectives from both the Eastern and the Western philosophical traditions on harmony and strife The unique and happy result is an East West anthology which is directed at analyzing a single philosophical problem which is of importance to both traditions Unlike many anthologies which tend to be collections of isolated and unrelated essays the Editors focus on a single theme has resulted in a unified volume which maintains a high continuity of interest throughout The Editors have carefully culled and organized essays from a select group of philosophers from the United States West Germany Japan Australia Beijing Taipei and Hong Kong Harmony and strife are analyzed as systematic concepts in Western philosophy as parts of classical Chinese thought as central concepts in Buddhism as metaphysical concepts as dialectical concepts and even as null concepts The Editors have taken great care so that a continuity and a coherence of presentation is achieved despite the striking variety of perspectives from which harmony and strife are analyzed It is both unusual and important to have such a systematic and thorough investigation of a topic of paramount social and philosophical significance by some of the leading minds of the day Besides the essays included are eminently readable The volume is likely to become a standard work in this area for some years to come
