Making a Living in Europe Alan Townsend, 2005-08-18 Will making a Living remain a dream for the deprived and excluded Jobs are one of Europe s most important problems Employment provides the basic means of distributing wealth in society in providing for families and ensuring pensions for the elderly Yet unemployment and increasingly non employment continues at near record levels in the European Union Making a Living in Europe shows how the culture of work has been transformed in the industrialised nations of the EU Exploring the relationship between employment change society and economic restructuring the shift toward flexible work for women in services away from traditional industrial jobs for men is demonstrated within three key sectors business services retailing and tourism The outcome of change is discussed in terms of shifts of people and jobs from urban to rural areas Europe must be understood in the context of the new Europe of change in the USA and of global change Drawing on examples from UK and European Regions and USA the author challenges long standing assumptions about changes in economy and society and highlights the need for stronger local and European policies to reduce inequality at large and contribute positively to local people s struggles to make a living in Europe

Critical Realism in Economics Steve Fleetwood, 1999 Presents a collection of articles previously published in the Review of Social Economy 1996 and in Ekonomia 1997 These articles extend insights from critical realism into the fields of economic methodology and economic theory in such a way as to open up new forms of investigation in economics and transform the nature of economic reasoning It is argued that the specific value of this approach is that it directs attention to the structures and capacities that explain the observed phenomena of economic life This volume includes papers from authors critical of this approach as well as from those who discuss its full implications for contemporary economics Paper edition 19568 3 27 99 Annotation copyrighted by Book News Inc Portland OR

Fielding, 1997-04-30 This book addresses one of the big issues of the 1990s migration It covers the whole of Europe not just the EU connecting theoretical debates about the underlying causes of spatial economic and social change with detailed empirical work on people jobs and economic restructuring in specific countries regions and cities This multi layered topic is addressed through chapters which are conceptual and theoretical in content and through country and region specific case studies The selected case studies ensure that all the important types of regions described in the recent literature on economic restructuring are taken into account This book will be an important contribution to a key topic in economic and population geography and regional economics

Population Change in Europe, the Middle-East and North Africa Koenraad Matthijs, Karel Neels, Christiane Timmerman, Jacques Haers, 2016-12-05 Current demographic trends raise new questions challenges and controversies Comparing demographic trends in Europe and the NAME region North Africa and the Middle East this book demonstrates how population change interacts with changing economic landscapes social distinctions and political realities A variety of drivers contribute to demographic change in the various regions and countries considered such as family policies economic realities the impact of educational differentials and the attitudes towards marriage On the macro level the new trends are

restructuring the age composition of populations and are reshaping the life courses of individuals and families In turn the impact demographic forces have on the organisation of labour markets on fiscal policies on the care of the elderly on migration flows and on political changes can be quite radical Chapter 1 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license https://s3.amazonaws.com/tandfbis-rt-files/docs/Open+Access+Chapters/9781472439543_oachapter1.pdf *The Rise and Fall of Neoliberal Capitalism* David M. Kotz, 2017 The financial and economic collapse that began in the United States in 2008 and spread to the rest of the world continues to burden the global economy David Kotz who was one of the few academic economists to predict it argues that the ongoing economic crisis is not simply the aftermath of financial panic and an unusually severe recession but instead is a structural crisis of neoliberal or free market capitalism Consequently continuing stagnation cannot be resolved by policy measures alone It requires major institutional restructuring Kotz's book will reward careful study by everyone interested in the question of stages in the history of capitalism Edwin Dickens Science Society Whereas others suggest that the downfall of the postwar system in Europe and the United States is the result of the triumph of ideas Kotz argues persuasively that it is actually the result of the exercise of power by those who benefit from the capitalist economic organization of society The analysis and evidence he brings to bear in support of the role of power exercised by business and political leaders is a most valuable aspect of this book one among many important contributions to our knowledge that makes it worthwhile Michael Meeropol Challenge **The World and The Netherlands** Marjolein 't Hart, Manon van der Heijden, Karel Davids, Lex Heerma van Voss, Leo Lucassen, Jeroen Touwen, 2023-01-26 This is the first book to examine the history of the country in a way that connects global processes to local developments Taking account of social political and economic dynamics over the last thousand years the book addresses key questions that get to the heart of the Netherlands role in the world both historically and in more recent times Why did the West become such a significant actor in the world and what part did the Netherlands play What were the driving forces in state formation and in what respects and why did the Netherlands take a different path to most of Europe How did globalisation impact economic structures and socio cultural life and how did the Netherlands react to these new challenges How did this very Christian and bourgeois nation develop into a flagship for liberal tolerance The book carefully balances a wider investigation of these issues with close inspections of how ordinary people experienced the changes they prompted It also provides a convincing judicious assessment of the ebbs and flows of this small country's global influence over time prominent as a Golden Age economic powerhouse colonial power and bastion of political freedom in some eras and yet impotent on the world stage at others Supplemented with 35 images 10 maps a wealth of text boxes charts and tables as well as a companion website this book is the definitive history of the Netherlands in a global context *The Cambridge Economic History of the United States* Stanley L. Engerman, Robert E. Gallman, 1996 Volume III surveys the economic history of the United States and Canada

during the twentieth century Global Justice and Social Conflict Tarik Kochi, 2019-09-30 Global Justice and Social Conflict offers a ground breaking historical and theoretical reappraisal of the ideas that underpin and sustain the global liberal order international law and neoliberal rationality Across the 20th and 21st centuries liberalism and increasingly neoliberalism have dominated the construction and shape of the global political order the global economy and international law For some this development has been directed by a vision of global justice Yet for many the world has been marked by a history and continued experience of injustice inequality indignity insecurity poverty and war a reality in which attempts to realise an idea of justice cannot be detached from acts of violence and widespread social conflict In this book Tarik Kochi argues that to think seriously about global justice we need to understand how both liberalism and neoliberalism have pushed aside rival ideas of social and economic justice in the name of private property individualistic rights state security and capitalist free markets Ranging from ancient concepts of natural law and republican constitutionalism to early modern ideas of natural rights and political economy and to contemporary discourses of human rights humanitarian war and global constitutionalism Kochi shows how the key foundational elements of a now globalised political economic and juridical tradition are constituted and continually beset by struggles over what counts as justice and over how to realise it Engaging with a wide range of thinkers and reaching provocatively across a breadth of subject areas Kochi investigates the roots of many globalised struggles over justice human rights democracy and equality and offers an alternative constitutional understanding of the future of emancipatory politics and international law Global Justice and Social Conflict will be essential reading for scholars and students with an interest in international law international relations international political economy intellectual history and critical and political theory **Perspectives on Global Development 2019 Rethinking Development Strategies**

OECD, 2018-11-29 In 2008 the weight of developing and emerging economies in the global economy tipped over the 50% mark for the first time Since then Perspectives on Global Development has been tracking the shift in global wealth and its impact on developing countries How much longer can the dividends of *Inequality in Asia and the Pacific* Ravi Kanbur, Changyong Rhee, Juzhong Zhuang, 2014-02-24 Asia's rapid economic growth has led to a significant reduction in extreme poverty but accompanied by rising inequality This book deals with three questions What have been the trends of inequality in Asia and the Pacific What are the key drivers of rising inequality in the region How should Asian countries respond to the rising inequality Technological change globalization and market oriented reform have been the key drivers of Asia's remarkable growth and poverty reduction but they have also had significant distribution consequences These three drivers of growth cannot be hindered because they are the sources of productivity improvement and betterment of quality of life This book will be useful to those interested in policy options that could be deployed by Asian countries in confronting rising inequality Secession, State, and Liberty David Gordon, The political impulse to secede to attempt to separate from central government control is a conspicuous feature of the post cold war world It is alive and growing in Canada Russia

China Italy Belgium Britain and even the United States Yet secession remains one of the least studied and least understood of all historical and political phenomena The contributors to this volume have filled this gap with wide ranging investigations rooted in history political philosophy ethics and economic theory of secessionist movements in the United States Canada and Europe Is secessionism extremist a dangerous rebellion that threatens the democratic process Gordon and his contributors think otherwise They believe that the secessionist impulse is a vital part of the classical liberal tradition one that emerges when national governments become too big and too ambitious Unlike revolution secession seeks only separation from rule preferably through non violent means It is based on the moral idea articulated by Ludwig von Mises in 1919 that no people and no part of a people shall be held against its will in a political association that it does not want The authors cite the famed 1861 attempt to create a confederacy of Southern states as legal right and a justifiable response to Northern political imperialism They note that this was not the first American secession attempt the New England states tried to form their own confederacy during the War of 1812 This evidence they argue begs a reinterpretation of the U S Constitution along secessionist lines Further they believe that the threat of secession should be revived as a bulwark against government encroachment on individual liberty and private property rights a guarantor of international free trade and a protection against attempts to curb the freedom of association These straightforward pellucid arguments include essays by Donald Livingston Murray N Rothbard Clyde Wilson Thomas DiLorenzo and Bruce Benson among others If overgrown nations continue to decompose as they have for the last decade these authors believe it is essential that secession be taken seriously and fully understood Secession State and Liberty makes a vital contribution toward that end This stimulating thought provoking collection is necessary reading for intellectual historians and political scientists
