Economic Analysis of Institutions and Systems S. Pejovich, 2012-12-06 In the late 1980s the field of comparative economics and NATO faced a similar problem the threat of obsolescence A predictable reaction of those who had made major investments in both comparative economics and NATO was to look for a new job It was time to say comparative economic systems are dead long live comparative economic systems The purpose of this book is to redirect study of what we called comparative economic systems toward analysis of the development of institutions and the effects of alternative institutional arrangements on economic performance To that end the book internalizes into a theoretical framework 1 the effects of alternative property rights on the costs of transactions and incentives structures 2 the effects of the costs of transactions and incentives on economic behavior and 3 the evidence for refutable implications of those effects Analysis here focuses on the issues propositions and conclusions that lend themselves to the only known scientific test empirical verification Thus this book is not about what socialism or capitalism could have been should have been or should be Nor is it an ode to capitalism Its purpose is not to assert that capitalism is a better economic system than socialism The history of this century and the market for institutions have done that My purpose is to explain what is it that makes the institutions of capitalism better in terms of economic outcome than all other alternatives that have been tried since the beginning of recorded history

Case Method and Pluralist Economics Kavous Ardalan, 2017-12-09 This book discusses the relationship between pluralist economics and the case study method of teaching, advocating the complementary use of both to advance economics education. Using a multi-paradigmatic philosophical frame of analysis, the book discusses the philosophical, methodological, and practical aspects of the case study method while drawing comparisons with those of the more commonly used lecture method. The book also discusses pluralist economics through the exposition of the philosophical foundations of the extant economics schools of thought, which is the focal point of the attention and admiration of pluralist economics. More specifically, the book discusses the major extant schools of thought in economics: Neo-Classical Economics, New Institutional Economics, Behavioral Economics, Austrian Economics, Post-Keynesian Economics, Institutional Economics, Radical Economics, and Marxist Economics, and emphasizes that these schools of thought in economics are equally scientific and informative; that they look at economic phenomena from their certain paradigmatic viewpoint; and that together they provide a more balanced understanding of the economic phenomenon under consideration. Emphasizing paradigmatic diversity as the cornerstone of both the case method and pluralist economics, the book draws the two together and makes an effective case for their combined use. A rigorous, multi-faceted analysis of the philosophy, methodology, and practice of economics education, this book is important for academicians and students interested in heterodox economics, philosophy, and education.

Behavioral Economic Analysis of Institutional Changes Helen Bao, Lei Feng, 2025-09-15 This book examines the evolution of China's rural land system through an integrated lens of institutional and behavioural economics. It traces seventy years of reform from collective farming to market-oriented land transfers to explain how central policy, local implementation, and farmers' responses interact to shape institutional change. Moving beyond standard accounts focused on property rights and transaction costs, the book introduces a dynamic framework based on Prospect Theory, incorporating cognitive biases, social norms, and bounded rationality. Drawing on two large-scale rural household surveys, the book combines empirical analysis with historical case studies to explore how reforms were received, adapted, and resisted. This book will benefit researchers, policymakers, and graduate students interested in institutional change, land policy, or Chinese rural development. It offers new tools to understand policy implementation in environments marked by uncertainty, decentralisation, and informal constraints. By highlighting how behavioural factors mediate formal rules, the book provides insights that extend beyond China, informing the design of effective land and property rights reforms globally.
