Economic Concepts A Programmed Approach:

Economic Concepts Robert C. Bingham, 1972 Economic concepts: a programmed approach. Second edition Robert Charles BINGHAM, 1969 **The Programming Approach and the Demise of Economics** Franco Archibugi, 2019-11-20

In this book the first of three volumes Franco Archibugi sets out to create an epistemology of economics arguing for a radical overturning of the conventional analysis from a positive approach to a programming approach. This overturning leads to a reappraisal of the foundations of Economics itself and to an improved integration of Economics as an autonomous discipline alongside Sociology, Political Science, Operational Research, Social Engineering and Physical or Spatial Planning. The author interrogates how scientific the social sciences really are before proposing a new scientific paradigm for the social sciences: a political preference function and a general programming approach. The chapters revisit hitherto neglected economists like Gunnar Myrdal, Ragnar Frisch, Vassili Leontief and Leif Johansen, using their theory to overturn the epistemological approach of the entire science of economics. Volume II explores oppositions to the traditional and conventional teaching of economics, whilst Volume III presents a concrete and practical example of how to build a Planning Accounting Framework (PAF) as associated with Frisch's plan frame explored in Volume II to demonstrate the extent to which decisions and negotiations can be routed in the social sciences.
