Economic Growth And Declining Social Welfare:

Globalization and the Decline of Social Reform Gary Teeple, 2000-01-01 Globalization is the coming of the triumph of capitalism the growing ascendancy of economics over politics of corporate demands over public policy of private over public interest It represents the approaching completion of the capitalization of the world carried out by self generating capital in the form of transnational corporations within an increasingly coherent transnational regulatory regime Neo liberal policies at the national level argues the author represent the policy side of globalization the political requirements of global capital the harmonization of the national with the global They mark the transition between two eras from a world of national corporations and nation states to a world of transnational corporations and supranational regulatory agencies The author examines the postwar conditions that gave rise to the modern welfare state and the politics of social democracy throughout the industrial world He traces the transformation of these conditions in the 1970s with the coming of a computer based mode of production and the consequent necessity for global relations of production In the face of global assertions of the rights of corporate private property he makes the case that the world s subordinate classes and peoples will have to create global means of resistance

Understanding Economic Behaviour Klaus Günter Grunert, Folke Ölander, 2012-12-06 may be related to another basic assumption in economic psychology that the human capacity to process information from the environment is limited and that the kind of optimal use of that information postulated in many economic theories is therefore not possible The research methods used are mainly geared towards empirical research and there mostly towards survey research and experimentation Experimentation involves most often simulated behaviour in a laboratory which allows the experimental manipulation of possible causes of behaviour which would not be possible in real life Survey research is the most widely used instrument for investigating real world behaviour with all its caveats about establishing causal explanations Several introductory books e g Fumham Lea Tarpy van Raaij van Veldhoven Wiswede 1988 have appeared recently which try to give an overview of the field of economic psychology and which in varying degrees demonstrate the three foundations of economic psychology just mentioned Others have concentrated on certain subtopics such as the psychology of the labour market e g Baxter 1988 Pelzmann 1986

Half a Century of Municipal Decline Martin Louglin, M. David Gelfand, Ken Young, 2013-06-17. Local government passed unscathed through the political and economic upheavals which followed the Great Depression. Contemporary commentators had every reason to look forward to continued growth and expansion in the role of local government which was seen as the main vehicle for the social programmes of the coming Welfare State. That optimism was misplaced. Many of the trends of the early twentieth century have been reversed. From the vantage point of 1985, local government was in crisis so severe that its continued existence was called into question. In this unique book, eleven authors explain what happened and how the local government system weakened. Political, financial, economic and legal issues are explored, as are factors such as housing, planning and social welfare. This book was first published in 1985.

Impact of COVID-19 Pandemics and Syndemics on Healthcare Systems Worldwide Ozgur Karcioğlu, Garyfallia Syridou, 2024-12-11. The COVID-19 pandemic has altered almost every aspect of the world, including economics, social issues, health care and politics. Many experts consider this phenomenon to be a syndemic as it is more than just an outbreak of a viral infectious disease. Almost all countries worldwide have been deeply involved in the battle since the early months of 2020. As of June 2023, almost 700 million people have been infected with reportedly 6.9 million deaths around 1% recorded globally due to COVID-19. These profound changes have had an adverse impact on healthcare systems worldwide. The healthcare industry has evolved to screen, diagnose and treat COVID-19 patients promptly and cost effectively. However, this shift has meant that resources have been diverted to managing a specific disease rather than on preventive measures and critical areas of healthcare like injury prevention, care of mothers and infants, elderly care, long-term care institutions etc. As a result, patients have encountered significant challenges in accessing care from their regular physicians, finding hospital beds and accessing ICU beds in situations of extreme illness. Healthcare workers have also faced dramatic consequences such as losing their lives, carrying a higher risk of infection compared to the general population and working in high-risk environments while mourning for their colleagues and still being obligated to work for extended hours under these conditions. Additionally, vaccination procedures have been difficult and problematic, particularly in developing countries where full coverage has been difficult to achieve. This Research Topic

aims to cover topics related to the impact and challenges of the pandemic and syndemic on pediatric healthcare focusing on specific areas such as the prehospital system emergency departments ICUs medical branches preventive medicine rehabilitation sports medicine and infection surveillance

The Economic Decline of the Family Darek Klonowski,2021-12-14 International evidence points to a widespread decline in the economic standard of living for the family This trend is reinforced by a number of underlying tendencies including stagnating wages the rise of unemployment weak labor participation poor housing affordability limited saving and skyrocketing personal debt These realities are also affecting young adults who in a historically unprecedented trend are likely to be worse off than their parents This book identifies the reason for these trends and argues that the answer lies in the context of five key deformations that affect the family Firstly the family is negatively influenced by liberalism While one form of liberalism infects society through economic means the other affects society through civil means Secondly liberal economic ideologies and theories have proved to be destructive to the family Thirdly the book challenges the notion that political shifts are beneficial to the family s economic wellbeing Fourthly the pursuit of materialistic possessions money and wealth which are supposed to bring the family joy instead sow the seeds of familial destruction Lastly debt is proven to be the silent assassin of human happiness marital and familial

relations and physical and mental health Japanese Political Culture Takeshi Ishida, This volume provides a perceptive background to modern Japanese culture Ishida attempts a balanced evaluation of modern Japan seeking to explain why the basic characteristics of Japanese society permit two almost opposite assessments He divides the development of modern Japan into two stages first the period starting from the Meiji Restoration 1868 up to the end of World War II second from the defeat of Japan in World War II up to the present Ishida investigates the essential features of the modern Japanese value system and the social structure which comprise both traditional and modern elements He examines how Japanese society has adapted Western influences to suit its own needs the real miracle of modern Japan As the Japanese economy grows and Japan becomes an economic superpower political self confidence is also emerging Ishida however remains critical of Japanese society because he feels that Japan lacked the internal resources to change the political system from within until its defeat by the Allies forced it to introduce various reforms ordered by the occupation authorities Despite the rapid changes taking place in Japanese society certain attitudes such as conformity and competition are common to both the prewar and postwar periods The final section is devoted to the field of peace research Ishida presents differences of meaning in the concepts of peace in ancient Hebrew Greek Roman Chinese and Indian cultures in order to characterize the Japanese concept of peace which akin to the Chinese emphasizes harmony rather than justice He goes on to discuss Japan's images of Gandhi which according to the author were projections of ultranationalist prejudice and missed the significance of his nonviolent direct action Ishida emphasizes the importance of such nonviolent action as a means to carry out social change toward the realization of justice
