- Can long-run economic growth continue in the face of resource scarcity?
 - **A question for economists. Resource scarcity and higher prices don't necessarily cost growth.**
- Economic growth tends to increase the human impact on the environment. **Unlike resource scarcity, environmental problems don't automatically provide incentives for changed behavior.**
- **Paris Agreement of 2015:** 196 countries agreed to reduce their greenhouse gas emissions in an effort to limit the rise in Earth's temperature to no more than 2 degrees centigrade
