## **Economic Integration And Planning In Maoist China:**

**Economic Integration and Planning in Maoist China** Thomas P. Lyons, 1987 Studies the nature of China's economic system and in particular those elements of Chinese planning that set China apart from other countries with Soviet type systems

**The Political Logic of Economic Reform in China** Susan L. Shirk, 1993 In the past decade China was able to carry out economic reform without political reform while the Soviet Union attempted the opposite strategy How did China succeed at economic market reform without changing communist rule Susan Shirk shows that Chinese communist political institutions are more flexible and less centralized than their Soviet counterparts were Shirk pioneers a rational choice institutional approach to analyze policy making in a non democratic authoritarian country and to explain the history of Chinese market reforms from 1979 to the present Drawing on extensive interviews with high level Chinese officials she pieces together detailed histories of economic reform policy decisions and shows how the political logic of Chinese communist institutions shaped those decisions Combining theoretical ambition with the flavor of on the ground policy making in Beijing this book is a major contribution to the study of reform in China and other communist countries

*China's Great Economic Transformation* Loren Brandt, Thomas G. Rawski, 2008-04-14 This landmark study provides an integrated analysis of China's unexpected economic boom of the past three decades The authors combine deep China expertise with broad disciplinary knowledge to explain China's remarkable combination of high speed growth and deeply flawed institutions Their work exposes the mechanisms underpinning the origin and expansion of China's great boom Penetrating studies track the rise of Chinese capabilities in manufacturing and in research and development The editors probe both achievements and weaknesses across many sectors including China's fiscal legal and financial institutions The book shows how an intricate minuet combining China's political system with sectorial development globalization resource transfers across geographic and economic space and partial system reform delivered an astonishing and unprecedented growth spurt

**The Dynamics of Chinese Regional Development** Jane Golley, 2007-01-01 This is a survey of the competing or sometimes complementary roles of the state and the market in shaping China's pattern of regional development during the Communist era

**Rural Roots of Reform Before China's Conservative Change** Lynn T. White III, 2018-05-24 China's economic and military rise dominates discussions of the world's most populous country Resilient authoritarian government is credited with great successes but this book expands the discourse to include governance by village heads who often ignored central politicians Chinese reforms for prosperity started circa 1970 under rural and suburban leaders They could act autonomously then because of unexpected political and technological opportunities Their localization of power eroded socialist controls Since 1990 central leaders have tried to reverse reforms made by resilient local bosses New findings especially from the Yangzi delta around Shanghai challenge the top down approach to thinking about governance As Deng Xiaoping admitted the nation's spurt of prosperity began in local communities rather than Beijing Reforms for triple cropping and rural industrialization

started long before Mao's death not in 1978 the date most writers cite. Country factories competed with state industries for materials and markets. Shortages by the 1980s led to inflation, government deficits, unofficial credit, unenforceable planning, illegal migrations, then international exports and severe political tensions. After 1990, Party leaders sought policies to build a Leninist regime that is mostly post-socialist. These reactionary changes have lasted into the era of Xi Jinping. China's reforms and subsequent changes can be understood as results of unintended situations, not just ideas and local, not just central politics. This book will interest students and scholars of Chinese as well as any readers who wonder about comparative development.

**Historical Dictionary of the Chinese Economy** Lawrence R. Sullivan, 2017-11-08. The *Historical Dictionary of the Chinese Economy* covers the world's second largest macro economy. Extensive attention throughout the volume is given to the historical development of the Chinese economy since the establishment of the People's Republic of China (PRC) in 1949. Included is a review of developments during the period of central economic planning adopted from the Soviet Union 1953-1978 and in-depth information and analysis on the various policies and fundamental changes brought about in China by the inauguration of economic reforms from 1978-1979 through 2016. This book contains a chronology, an introduction, and an extensive bibliography. The dictionary section has over 400 cross-referenced entries on critical sectors of the economy including automobiles, banking and finance, national currency, economic regulation, trade and investment, and important industries such as agriculture, computers and electronics, iron and steel, real estate, and shipping. This book is an excellent resource for students, researchers, and anyone wanting to know more about China's economy.

***Regional Development in China*** Yehua Dennis Wei, 2013-04-15. This study systematically examines uneven regional development in China, focusing on three central agents: the foreign investor, the state, and the region. Wei's findings have important implications for theories of and policy towards Chinese regional development. This book is a vital resource for those with an interest in transition economies.

***The Political Economy Of Public Sector Reform And Privatization*** Ezra Suleiman, John Waterbury, 2019-07-09. This book suggests some of the ways in which levels of development shape public sector reform and privatization in developed and developing countries, showing that conservative as well as socialist governments were committed to increasing the state's guiding role in the political economy.

***The Economics Of Cooperation*** James Roumasset, Susan Barr, 2019-07-11. This book discusses the nature of institutional development as it promotes market growth. It is concerned with the nature of and the prospects for pro-market development planning, especially in East Asia, describing pro-market policies that enhance economic cooperation.

Distortions to Agricultural Incentives in Asia Kym Anderson, Will Martin, 2009-02-04 The vast majority of the world's poorest households depend on farming for their livelihoods During the 1960s and 1970s most developing countries imposed pro urban and anti agricultural policies while many high income countries restricted agricultural imports and subsidized their farmers Both sets of policies inhibited economic growth and poverty alleviation in developing countries Although progress has been made over the past two decades to reduce those policy biases many trade and welfare reducing price distortions remain between agriculture and other sectors and within the agricultural sector of both rich and poor countries Comprehensive empirical studies of the disarray in world agricultural markets appeared approximately 20 years ago Since then the Organisation for Economic Co operation and Development had provided estimates each year of market distortions in high income countries but there have been no comparable estimates for the world's developing countries This volume is the third in a series other volumes cover Africa Europe's transition economies and Latin America and the Caribbean that not only fills that void for recent years but extends the estimates in a consistent and comparable way back in time and provides analytical narratives for scores of countries that shed light on the evolving nature and extent of policy interventions over the past half century Distortions to Agricultural Incentives in Asia provides an overview of the evolution of distortions to agricultural incentives caused by price and trade policies in the 12 largest economies of East and South Asia Together these countries constitute more than 95 percent of the region's population agricultural output and overall GDP Sectoral trade and exchange rate policies in the region have changed greatly since the 1950s and there have been substantial reforms since the 1980s most notably in China and India Nonetheless numerous price distortions in this region remain and others have added in recent years The new empirical indicators in these

country studies provide a strong evidence based foundation for assessing the successes and failures of the past and for evaluating policy options for the years ahead

**China's Political Economy In The Xi Jinping Epoch: Domestic And Global Dimensions** Lowell Dittmer,2021-03-17 This book takes a fresh look at Chinese political economy at a key inflection point Facing a more competitive international environment Chinese reform has shifted from its earlier focus on economic liberalization and political decentralization to a more tightly organized centralized form of state socialism The Party state s vigorous fiscal reaction to the Global Financial Crisis 2008 2009 left the country with a much improved infrastructure and greater sense of national self assurance The more monocratic central leadership has redoubled efforts to fight poverty and pollution push technological innovation and at the same time rigorously enforce ideological consensus political loyalty and anticorruption This has been occurring in an international context of slowing trade and nationalist pushback against globalization prominently including bilateral Chinese American polarization While China has been among the staunchest advocates and beneficiaries of globalization incipient trade war decoupling has spurred movement toward economic and technological self reliance Turning inward however vies with a rival impulse toward more vigorous engagement in the world This is most consequentially represented by the Belt and Road Initiative driving massive infrastructure construction through Central Asia and the South and Southeast Asian maritime periphery Despite slowing growth and a large debt overhang swift recovery from the Covid 19 epidemic leaves China in a relatively strong economic position

**Chinese Business Enterprise** Rajeswary Ampalavanar Brown,1996 **From Mao to Market** Andrew H. Wedeman,2003-07-10 Andrew Wedemen argues that China succeeded in moving from a Maoist command economy to a market economy because the central government failed to prevent local governments from forcing prices to market levels Having partially decontrolled the economy in the early 1980s economic reformers balked at price reform opting instead for a hybrid system wherein commodities had two prices one fixed and one floating Depressed fixed prices led to resource wars as localities battled each other for control over undervalued commodities while inflated consumer goods prices fuelled a headlong investment boom that saturated markets and led to the erection of import barriers Although local rent seeking and protectionism appeared to carve up the economy in reality they had not only pushed prices to market levels and cleared the way for sweeping reforms in the 1980s they had also pushed China past the pitfalls of reform that entrapped other socialist economies

*Land Bargains and Chinese Capitalism* Meg E. Rithmire,2015-10-06 Land reforms have been critical to the development of Chinese capitalism over the last several

decades yet land in China remains publicly owned This book explores the political logic of reforms to land ownership and control accounting for how land development and real estate have become synonymous with economic growth and prosperity in China Drawing on extensive fieldwork and archival research the book tracks land reforms and urban development at the national level and in three cities in a single Chinese region The study reveals that the initial liberalization of land was reversed after China's first contemporary real estate bubble in the early 1990s and that property rights arrangements at the local level varied widely according to different local strategies for economic prosperity and political stability In particular the author links fiscal relations and economic bases to property rights regimes finding that more open cities are subject to greater state control over land
