**Perspectives on Financial Control** Mahmoud Ezzamel, David Heathfield, 2013-12-14 The purpose of this book is to offer a small token in memory of Ken Hilton who died prematurely at the age of 52 in February 1990 The book contains contributions from a number of leading academics some were close colleagues of Ken's at the University of Southampton some have been at other universities but knew Ken fairly well and still some who never met Ken but who knew of him through his work The unifying motivation for all of them however was their immense sense of loss of an extremely proactive and excellent academic Having led the research group on the Southampton Econometric Model project for three years Ken was appointed to the Chair of Financial Control at the University of Southampton in 1970 at that time this was one of only a handful of similar Chairs in the UK Most of Ken's subsequent academic career was devoted to contributing to the study of financial control initially in the private sector and subsequently in the public sector The breadth of his interests was demonstrated by his enviable ability to contribute to the areas of industrial economics accounting and management science We hope therefore that this volume which embraces contributions from leading academics in each of these three fields is a fitting tribute to Ken's work

survey of strategic delegation in oligopoly games An Economic Theory of Managerial Firms is able to offer a reinterpretation of a range of standard results in the light of the fact that the control of firms is generally not in the hand of its owners The theoretical models are supported by a wealth of real world examples in order to provide a study of strategic delegation that is far more in depth than has previously been found in the literature on industrial organization In this volume analysis is extended in several directions to cover applications concerning the role of managerial firms in mixed market collusion and mergers divisionalization and vertical relations technical progress product differentiation international trade environmental issues and the intertemporal growth of firms This book is of great interest to those who study industrial economics organizational studies and industrial studies
