The Oxford Handbook of Africa and Economics Célestin Monga, Justin Yifu Lin, 2015-07-02 For a long time economic research on Africa was not seen as a profitable venture intellectually or professionally few researchers in top ranked institutions around the world chose to become experts in the field This was understandable the reputation of Africa centered economic research was not enhanced by the well known limitations of economic data across the continent Moreover development economics itself was not always fashionable and the broader discipline of economics has had its ups and downs and has been undergoing a major identity crisis because it failed to predict the Great Recession Times have changed many leading researchers including a few Nobel laureates have taken the subject of Africa and economics seriously enough to devote their expertise and creativity to it They have been amply rewarded the richness complexities and subtleties of African societies civilizations rationalities and ways of living have helped renew the humanities and the social sciences and economics in particular to the point that the continent has become the next major intellectual frontier to researchers from around the world In collecting some of the most authoritative statements about the science of economics and its concepts in the African context this handbook the first of two volumes opens up the diverse acuity of commentary on exciting topics and in the process challenges and stimulates the quest for knowledge Wide ranging in its scope themes language and approaches this volume explores examines and assesses economic thinking on Africa and Africa's contribution to the discipline The editors bring a set of powerful resources to this endeavor most notably a team of internationally renowned economists whose diverse viewpoints are complemented by the perspectives of philosophers political scientists and anthropologists *A Handbook of Cultural Economics* Ruth Towse, 2003-01-01 Ruth Towse is to be congratulated on assembling such a high quality range of writers on cultural economics and on orchestrating their contributions so expertly From anthropology and auctions through copyright and superstars to visual arts and welfare economics scholars and general

Handbook of the Economics of Art and Culture Victor A. Ginsburgh, David Throsby, 2006-09-13 Over the last 30 or 40 years a substantial literature has grown up in which the tools of economic theory and analysis have been applied to problems in the arts and culture Economists who have surveyed the field generally locate the origins of contemporary cultural economics as being in 1966 the year of publication of the first major work in modern times dedicated specifically to the economics of the arts It was a book by Baumol and Bowen which showed that economic analysis could illuminate the supply of and demand for artistic services the contribution of the arts sector to the economy and the role of public policy Following the appearance of the Baumol and Bowen work interest in the economics of the arts grew steadily embracing areas such as demand for the arts the economic functions of artists the role of the nonprofit sector and other areas Cultural economics also expanded to include the cultural or entertainment

industries the media movies the publishing industry popular music as well as heritage and museum management property right questions in particular copyright and the role of new communication technologies such as the internet The field is therefore located at the crossroads of several disciplines economics and management but also art history art philosophy sociology and law The Handbook is placed firmly in economics but it also builds bridges across these various disciplines and will thus be of interest to researchers in all these different fields as well as to those who are engaged in cultural policy issues and the role of culture in the development of our societies Presents an overview of the history of art markets Addresses the value of art and consumer behavior toward acquiring art Examines the effect of art on economies of developed and developing countries around the world *Including a Symposium on the Historical Epistemology of Economics* Luca Fiorito, Scott Scheall, Carlos Eduardo Suprinyak, Till D ppe, Harro Maas, 2017-08-22 Volume 35A of Research in the History of Economic Thought and Methodology features a symposium on historical epistemology An internationally renowned cast of contributors offers a variety of perspectives on one of the major approaches in empirical philosophy of science and the historiography of economic thought *Generation X and the Rise of the Entertainment Subject* Robert Samuels, 2021-04-20 Generation X and the Rise of the Entertainment Subject defines Gen X as the first generation to be dominated by entertainment subjectivity A social and psychological feedback loop is created as entertainment caters to adolescent consumers while the consumer in turn is shaped by the entertainment they internalize While the paradigmatic latchkey young adults are immersed in media consumption they see the world through the lens of popular culture products that seek to capitalize on the free time and disposable income of the unoccupied viewer This book argues that Gen X entertainment subjectivity lays the foundations for contemporary society where handheld devices and other technologies detach their users from the world around them *Global Entertainment Media: A Critical Introduction* Lee Artz, 2015-02-09 Balancing provocative criticism with clear explanations of complex ideas this student friendly introduction investigates the crucial role global entertainment media has played in the emergence of transitional capitalism Examines the influence of global entertainment media on the emergence of transnational capitalism providing a framework for explaining and understanding world culture as part of changing class relations and media practices Uses action adventure movies to demonstrate the complex relationship between international media political economy entertainment content global culture and cultural hegemony Draws on examples of public and community media in Venezuela and Latin America to illustrate the relations between government policies media structures public access to media and media content Engagingly written with crisp and controversial commentary to both inform and entertain readers Includes student friendly features such as fully integrated call out boxes with definitions of terms and concepts and lists and summaries of transnational entertainment media Entertainment Media and Communication Nicholas David Bowman, 2024-10-21 Although not considered a formal area of study scholarship on the uses content and effects of entertaining media has been central to communication studies and
