The Economics of a Technology-based Service Sector, 1998 Innovation in the U.S. Service Sector Michael P. Gallaher, Albert N. Link, Jeffrey E. Petrusa, 2007-01-24 Using a cutting edge structure where a current description of the service sector and up to date case studies are compared and contrasted with innovative activity in manufacturing this book contributes towards a better theoretical understanding of innovation in the U S service sector The U S service sector is the largest sector in the U S economy and accounts for an increasingly significant share of U S gross domestic product currently 68 percent Both in the United States as well as in other industrialized nations the service sector is a dynamic component of economic activity and growth As pervasive and economically important as the service sector is innovative activity in service sector firms remains somewhat of an enigma it is not well understood and not well defined because it differs dramatically from the traditional model of innovation in manufacturing Innovation in the U S Service Sector fills this void placing emphasis on the United States but with global relevance It is essential reading for all students of business and management economics and political science Public/Private Partnerships Albert N. Link, 2006-06-03 Research and development R and D leads to innovation and innovation leads to technological change Technological change in turn is the primary driver of economic growth Public private partnerships cooperative relationships among industry government and or universities leverage the efficiency of R and D and are thus a critical aspect of a nation s innovation system This text is intended for upper level undergraduate and MBA courses such as Economics and Technology Economics of Innovation and Economics of Science and Technology among others The first chapter introduces the concept of public private research partnerships along with other concepts fundamental to an understanding of innovation and technology policy The framework chapters 2 5 set forth an argument for the public s role government s role in innovation in general and in public private partnership in particular The remaining chapters 6 14 describe a number of public private partnerships and to the extent possible evaluate their social impact *The Oxford Handbook of Innovation* Jan Fagerberg, David C.
