David Simon,2019-01-15 The thousands uprooted and displaced by the Holocaust had a profound cultural impact on the countries in which they sought refuge with numerous Holocaust escapees attaining prominence as scientists writers filmmakers and artists But what is less well known is the way in which this refugee diaspora shaped the scholarly culture of their new found homes and international policy In this unique work David Simon explores the pioneering role played by mostly Jewish refugee scholars in the creation of development studies and practice following the Second World War and what we can learn about the discipline by examining the social and intellectual history of its early practitioners Through in depth interviews with key figures and their relatives Simon considers how the escapees experiences impacted their scholarship showing how they played a key role in shaping their belief that development really did hold the potential to make a better world free from the horrors of war genocide and discrimination they had experienced under Nazi rule In the process he casts

valuable new light on the origins and evolution of development studies policy and practice from this formative postwar period to the present

Interdependent Development Harold Brookfield, 2012-08-06 Rather than being a book about development per se this work first published in 1975 is instead a book about ideas about development designed for those drawn by a concern over social injustice into the development field In a selective review of theory which gives particular emphasis to the spatial dimension in Western Marxist and neo Marxist thought Harold Brookfield traces the evolution of ideas about world inequality and the problem of development from the days before the underdeveloped countries were considered to be a major problem through the years dominated by economic growth to the more searching approaches of the contemporary era The central argument of the book is that development is a totality which cannot properly be understood by separation into parts The developed and underdeveloped countries constitute one interdependent system and change in one cannot be understood without consideration of the other
