## **Hanoi Biography Of A City:**

*Hanoi* William Stewart Logan, 2000 This text traces the history of the fabric of Hanoi from its origins 1000 years ago It examines how the shape of the city reflects changing political cultural and economic conditions over a millennium of intermittent warfare and waves of cultural change and migration Drawing on his experience as heritage advisor the author looks at the challenges facing those who seek to preserve the best features of Hanoi s architecture and streetscapes while improving the living conditions of its residents

**Hanoi** William Stewart Logan, 2000 *The Vietnamese City in Transition* Patrick Gubry, Frank Castiglioni, Jean-Michel Cusset, Nguyen Thi Thieng, Pham Thuy Huong, 2010 Since the Doi Moi policy of economic renovation was introduced in 1986 Vietnam has undergone deep transformations as a result of the transition to a socialist oriented market economy Social and urban transition has taken place in parallel as urban dynamics were spurred on by Vietnamese public and private stakeholders and by external agents such as international organizations and international solidarity organizations experts consultants and bilateral aid organizations Here are the results of research carried out by French Canadian and Vietnamese teams from the north and south of the country on the overarching theme of Vietnamese cities in transition Some of this research deals with urban dynamics some with the issues at stake within such dynamics or with the strategies of the most significant stakeholders in urban transition civil society donors within the framework of official aid for development consultants and international consultancy firms These projects were carried out between 2001 and 2004 as part of the Urban Research Programme for Development PRUD and mainly focus on Hanoi and Ho Chi Minh City or both in the case of comparative studies Is there such a thing as a Vietnamese model of an Asian city It seems that urban transition in Vietnam is not taking place in as radical and abrupt a manner as in China The country s capacity for absorbing external models the quest for a third way between state intervention and economic liberalism and the fact that the country s architectural heritage is taken into account in urban planning are just some of the reasons for its particularity The issues addressed in each chapter as well as the proposals for further research suggested by the contributors should act as a catalyst for urban research in Vietnam

**The Resilient City in World War II** Simo Laakkonen, J. R. McNeill, Richard P. Tucker, Timo Vuorisalo, 2019-05-27 The fate of towns and cities stands at the center of the environmental history of World War II Broad swaths of cityscapes were destroyed by the bombing of targets such as transport hubs electrical grids and industrial districts and across Europe Asia and the Americas urban environments were transformed by the massive mobilization of human and natural resources to support the conflict But at the same time the war saw remarkable resilience among the human and non human residents of cities Foregrounding the concept of urban resilience this collection uncovers the creative survival strategies that city dwellers of all kinds turned to in the midst of environmental devastation As the first major study at the intersection of environmental urban and military history *The Resilient City in World War II* lays the groundwork for an improved understanding of rapid change in urban environments and how societies may adapt

Cultural Diversity, Heritage and Human Rights Michele Langfield, William

Logan, Mairead Nic Craith, 2009-12-04 This theoretically innovative anthology investigates the problematic linkages between conserving cultural heritage maintaining cultural diversity defining and establishing cultural citizenship and enforcing human rights It is the first publication to address the notions of cultural diversity cultural heritage and human rights in one volume Heritage provides the basis of humanity's rich cultural diversity While there is a considerable literature dealing separately with cultural diversity cultural heritage and human rights this book is distinctive and has contemporary relevance in focusing on the intersection between the three concepts Cultural Diversity Heritage and Human Rights establishes a fresh approach that will interest students and practitioners alike and on which future work in the heritage field might proceed

*Places of Pain and Shame* William Logan, Keir Reeves, 2008-12-05 Places of Pain and Shame is a cross cultural study of sites that represent painful and or shameful episodes in a national or local community's history and the ways that government agencies heritage professionals and the communities themselves seek to remember commemorate and conserve these cases or conversely choose to forget them Such episodes and locations include massacre and genocide sites places

related to prisoners of war civil and political prisons and places of benevolent internment such as leper colonies and lunatic asylums These sites bring shame upon us now for the cruelty and futility of the events that occurred within them and the ideologies they represented They are however increasingly being regarded as heritage sites a far cry from the view of heritage that prevailed a generation ago when we were almost entirely concerned with protecting the great and beautiful creations of the past reflections of the creative genius of humanity rather than the reverse the destructive and cruel side of history Why has this shift occurred and what implications does it have for professionals practicing in the heritage field In what ways is this a difficult heritage to deal with This volume brings together academics and practitioners to explore these questions covering not only some of the practical matters but also the theoretical and conceptual issues and uses case studies of historic places museums and memorials from around the globe including the United States Northern Ireland Poland South Africa China Japan Taiwan Cambodia Indonesia Timor and Australia

The Nature of Kingship Kathryn Dyt, 2024-12-31 The Nature of Kingship is an innovative exploration of dynastic power and the environment in nineteenth century Vietnam It offers important insights into Vietnamese kingship by delving into the intricate workings of the Nguyen court and its interactions with the natural world Weaving together a rich array of sources including official histories royal poetry astrological manuals geography texts and provincial gazetteers Kathryn Dyt vividly demonstrates how Nguyen governance and court hierarchies were intertwined with a powerful agentive and emotional weather world a world inhabited by ecological actors such as rain wind land and skies While previous narratives have often faulted Nguyen rulers for being aloof and detached from their surroundings this new study considers how Nguyen dynastic rule was in fact highly responsive to its setting and sensitive to the environment It shows that Nguyen kings were not static inert individuals cut off from the world but rather were intensely engaged with their environment and its cosmological and spiritual dimensions Placing kings in the thick of lived experience in a land perceived to be alive and responsive to human incantations prayers and pleas this account demonstrates how Nguyen rulers consolidated their authority through displays of superior weather knowledge and modes of affective rule rooted in reciprocal emotional resonance with the weather world The king's exemplary affective responsiveness to the weather was central to his preeminence and it was a means by which the court validated its power within Vietnam's extensive social field Exploring kingship from phenomenological perspectives this wide reaching study addresses diverse forms of court engagement with the environment including the observation of astronomical and meteorological phenomena divination practices rainmaking rituals travel through the kingdom the writing of environmental histories and imperial poetry

Pomeroy, Le Thi Thu Huong, 2023-05-16 In the context of mounting challenges stemming from a rapid transformation of the urban regional landscapes in many Asian countries this book highlights a multifaceted array of issues that increasingly engage the academic and planning communities in search of viable solutions to complex problems facing us

Even though cities continue to dominate development studies urbanization of Asia is evolving toward a hybrid urban rural nexus beyond the cities This volume considers these shifting dynamics of Asian urbanization including urban spatial transformations and their ramifications in the context of sustainability and planning Through the lens of a set of empirical studies across diverse disciplines geographies and methodologies yet with an overarching concern for sustainability in varied but interconnected areas such as climate change land use planning infrastructure and urban mobility and quality of life these studies examine a range of important topics e g flooding transportation housing open space green space urban garden and such in city regional settings Together they add insights into varied transformational processes or patterns at work on the urban regional landscapes in a number of Asian countries while offering innovative approaches or alternatives The proposed volume fills a gap in urban regional studies in context of South and Southeast Asia that will be of interest to all stakeholders e g planners administrators academicians and the citizenry particularly those interested in sustainability and planning paradigms It should be a timely and valuable addition to the Asian urbanization literature

*The Making and Unmaking of Colonial Cities* Julia C. Obert, 2023-09-15 *The Making and Unmaking of Colonial Cities* is a comparative study of architectural space in four post colonial capitals Belfast Northern Ireland Windhoek Namibia Bridgetown Barbados and Hanoi Vietnam Each chapter takes up one of these cities outlining its history of building and urban planning under colonial rule and linking that history to its contemporary shape and scope This genealogical information is drawn from primary source documents and archival materials The chapters then look to local literary texts to better understand the lingering impact of colonial building practices on individuals living in post colonial cities today These texts often foreground the difficulty of moving through a city that can never feel comfortably one's own legacies of racial segregation buildings that disregard indigenous resources and street names that serve as constant reminders of a history of oppression for example can produce feelings of anxiety even of unbelonging for native subjects However the literature also highlights ways in which the subversive wanderings of particular pedestrians taking shortcuts trespassing in forbidden places diverting spaces from their intended uses can contest official topography Bodies can therefore move against the power of a repressive regime at least to some degree even when that power is literally set in stone Obert argues for the significance of these small gestures of reclamation suggesting that we must counterpose the potential flexibility of lived space to the prohibitions of the map in order to more fully understand post colonial power relations

**Southern Vietnamese Modernist Architecture** Mel Schenck, 2020-04-21 *Southern Vietnamese Modernist Architecture* features beautiful architectural photography that illustrates the outstanding accomplishment of the people of southern Vietnam in developing a mid-century modernist architecture that is extraordinary in the world Especially for Americans Vietnam has been a war instead of a country The world didn't notice that the Vietnamese were simultaneously constructing modern apartment buildings houses large public buildings and public housing as they developed a new nation And the world didn't anticipate that this architecture would be so overtly modernist rather than an adaption of traditional Vietnamese designs to the continuation of colonial architecture In the mid-twentieth century southern Vietnamese architects developed a version of modernist architecture that accommodated the tropical climate and reflected the identity of a newly independent culture It demonstrates the innate sense of design of

Vietnamese and it represented the outlook of the people of southern Vietnam as they looked towards the future even in the face of war. The vast quantity and quality of Vietnamese modernist buildings constructed throughout southern Vietnam made Vietnam an unrecognized center of modernism in the world. Most importantly, the southern Vietnamese as a culture embraced modernism and it became the vernacular architecture of the culture for dwellings. This architecture features an interplay between masses and voids that provides a much more vibrant version of modernist architecture. This style fills the gaps between the functionalism of the International Style and the quest for identity and spirit that has been lacking in modernism worldwide. American architect Mel Schenck is a long-term immigrant to Vietnam and has been studying this architecture since he was surprised by the extent and quality of modernist architecture in Saigon when he first lived there in 1971-72. He and photographer Alexandre Garel accumulated a database of 400 buildings and 4,000 photographs in southern Vietnam to serve a comprehensive analysis of the history and characteristics of this distinctive architecture. Architectural historians, aficionados of modernist architecture, and anyone interested in Vietnamese culture will find that this book is a positive story about Vietnamese aspirations for independence and the value of modernist architecture in living in the world today. **Cars, Automobility and Development in Asia** Arve Hansen, Kenneth Bo Nielsen, 2016-09-13. *Cars, Automobility and Development in Asia* explores the nexus between automobility and development in a pan-Asian comparative perspective. The book seeks to integrate the policies, production forms, consumption preferences, and symbolism implicated in emerging Asian automobilities. Using empirically rich and grounded analyses of both comparative and single-country case studies, the authors chart new approaches to studying automobility and development in emerging Asia. [Historical Dictionary of Ho Chi Minh City](#) Justin Corfield, 2014-11-01. Offering a concise overview of Ho Chi Minh City's history and development, the *Historical Dictionary of Ho Chi Minh City* presents a comprehensive historical survey of the city in the form of an alphabetical list of keywords and names with accompanying definitions. Both well-researched and authoritative, the volume draws upon a wide range of modern sources and contains an introductory essay about the city, a chronology, a list of acronyms and abbreviations, photographs, and appendixes of supplemental information.
