The Hans Legacy Lloyd Dodge Fernald, 1984 **Going Back to Our Future II** Jon Pedersen, Kevin D. Finson, Barbara S. Spector, 2015-08-01 Who were the pioneers in science education and what motivated them to do what they did This book is the second volume of an attempt to capture and record some of the answers to these questions either from the pioneers themselves or from those persons who worked most closely with them As with the first volume we have attempted to include as many pioneers as possible but we know that there are still many that are not included in this or the previous volume As we have posed questions rummaged through files and oft neglected books and probed the memories of many individuals we have come to realize our list of true pioneers is ever growing As we consider our list of pioneers we know that there are names on the list that most of us readily recognize We also fully realize that there are names of whom few of us have heard yet who were significant in their roles as mentors or idea development and teaching We continue to be impressed with our science education family tree ever branching out to more individuals and connections The stories in this volume continue to demonstrate how vital this network was in supporting the individual pioneers during their journey in difficult times and continues to be for those of us today in our own enterprise Carnegie Institution of Washington Publication ,1916

Feral Children and Clever Animals Douglas K. Candland, 1995-10-26 In this provocative book Douglas Candland shows that as we begin to understand the way animals and non speaking humans think we hold up a mirror of sorts to our own mental world and gain profound insights into human nature Weaving together diaries contemporary newspaper accounts and his own enlightening commentary Candland brings to life a series of extraordinary stories He begins with a look at past efforts to civilize feral children We meet Victor the Wild Boy of Aveyron now famous as the subject of a Truffaut film Kaspar Hauser raised in a cell civilized and then assassinated and the Wolf Girls of India found early this century huddled among wolf pups in a forest den they were originally believed to be ghosts by superstitious villagers who nearly shot them as they were being captured In each case it was hoped that the study of these children would help clarify the age old nature nurture debate but as Candland shows so much of the information revealed was really only a projection of beliefs previously held by the investigating scientists Candland then turns to clever animals We learn how the investigation of Clever Hans the German horse who could calculate square roots proved to be a first step in the direction of behaviorism researchers found that Hans was being tipped off by the subtle and unwitting body language of his owner and other observers who would bend almost imperceptibly at the waist with every hoof beat and stand erect when the correct count was reached And Candland discusses the many attempts to communicate with our closest neighbor the apes We read of Richard Lynch Garner s 1892 experiment living with chimpanzees in Gabon he taught one to say the French word feu and of Gua raised by W N and L A Kellogg alongside their own son Donald and of the latest successes of teaching sign language to such precocious apes as Sarah Sherman Austin and Koko Throughout Candland illuminates the boldest and most intriguing efforts yet to extend our world to

that of our fellow creatures And he shows that in the end our effort to make contact is a reflection of the way in which we as a species create and order our universe Humans have long shown a wish to connect with the silent minds around them In assembling and interpreting the compelling tales in this book Candland offers us a new understanding not only of the animal kingdom but of the very nature of humanity and our place in the great chain of being **Edinburgh Companion to Political Realism** Robert Schuett,2018-11-14 Political realism is a highly diverse body of international relations theory This substantial reference work examines political realism in terms of its history its scientific methodology and its normative role in international affairs Split into three sections it covers the 2000 year canon of realism the different schools of thought the key thinkers and how it responds to foreign policy challenges faced by individual states and globally It brings political realism up to date by showing where theory has failed to keep up with contemporary problems and suggests how it can be applied and adapted to fit our new globalised world order For Grace and Hope Charlotte Drobnicki,2015-12-29 In the land of Kalmar it was decided One king would rule three nations and there would be three kingdoms with three separate realms But the Dragon would rise up and the Oppressed would war against it and prevail Join Hope Larson and Magnus Carlsson who carry on the Carlsson and Larson legacy and join Sweden s Freedom Fighters in their fight against the Tyranny This is the first book in the author s exciting historical romantic fairytale adventure series The Carlsson Larson Chronicles

Theology, Science and Life Carmody Grey,2023-01-26 Offering a bold intervention in the ongoing debate about the relationship between theology and science Theology Science and Life proposes that the strong demarcation between the two spheres is unsustainable theology occurs within and not outside what we call science and science occurs within and not outside theology The book applies this in a penetrating way to the most topical contentious and philosophically charged science of late modernity biology Rejecting the easy dualism of expressions such as theology and science theology or science modern biology is examined so as to illuminate the nature of both In making this argument the book achieves two further things It is the first major English language reception and application of the thought of philosopher Hans Jonas in theology and it makes a decisive contribution to the unfolding reception of Radical Orthodoxy one of the most influential schools in contemporary Anglophone theology When Good Thinking Goes Bad Todd C. Riniolo,2010-08-05 Todd Riniolo has written the perfect primer on critical thinking not just for critical thinkers but for everyone Not only should this book be the primary text of critical thinking courses throughout the land but the chapters on how to think critically about political economic and social issues should be required reading for all members of Congress along with the White House staff and the President himself Riniolo has cracked open our skulls and revealed that what lies inside is a mass of irrational goo that must be reshaped through vigilance and education This book is where it begins MICHAEL SHERMER Publisher of Skeptic magazine Monthly columnist for Scientific American Author of Why People Believe Weird Things and Why Darwin Matters In 1975 the Environmental Fund sponsored a full page advertisement in leading newspapers which predicted that the world as we know

it will likely be ruined before the year 2 000 due to the assumed inability of world food production to keep pace with the increase in population The statement was endorsed by some of the finest thinkers of the time scientists scholars and other professionals who had spent their careers applying the principles of critical thinking to their chosen disciplines Nonetheless in this instance they all failed to use the same rigor in assessing the probability of looming disaster and badly miscalculated This is just one example of how even the best thinkers can sometimes go astray and it illustrates how easily unconscious biases can undermine the critical thinking process In this insightful analysis of the mental pitfalls that trip up even elite critical thinkers psychologist Todd C Riniolo makes a compelling case that under certain circumstances everyone is vulnerable to accepting erroneous beliefs Riniolo begins by reviewing the hallmarks of critical thinking related to the evaluation of claims such as the use of the double blind procedure and the law of parsimony He then provides an evolutionary framework and empirical supporting evidence from cognitive psychology to explain why being inconsistent in the use of critical thinking is part of our evolutionary heritage Each of us possesses cognitive biases that make us prone to maintaining our current beliefs both true and false He concludes by focusing on a wide range of claims environmental political economic multicultural to illustrate how in certain contexts we all are tempted to abandon critical thinking Thoroughly researched yet written in a lively witty style this unique approach to critical thinking will interest students teachers and anyone who wishes to become a better thinker Todd C Riniolo Grand Island NY is an associate professor of psychology at Medaille College He has written many peer reviewed articles in the psychological literature Methods in Animal Behaviour Marc Naguib, Gretchen F. Wagner, Lysanne Snijders, E. Tobias Krause, 2023-12-04 Are you interested in animals and do you want to scientifically study their behaviour through observations or experiments With this book you will gain the necessary knowledge to conduct scientific research objectively design experiments rigorously and start analysing behavioural data effectively Most importantly you will learn to measure animal behaviour using different sampling techniques In addition you will read about the most used and latest technical devices that are advancing the study of animal behaviour Thus read this book if you want to learn how to design conduct analyse and write up your animal behaviour research or if you wish to refresh your knowledge and look up specific behavioural methods Technical Arts in the Han Histories Mark Csikszentmihalyi, Michael Nylan, 2021-11-01 While cultural literacy in early China was grounded in learning the Classics basic competence in official life was generally predicated on acquiring several forms of technical knowledge Recent archaeological finds have brought renewed attention to the use of technical manuals and mantic techniques within a huge range of discrete contexts pushing historians to move beyond the generalities offered by past scholarship To explore these uses Technical Arts in the Han Histories delves deeply into the rarely studied Treatises and Tables compiled for the first two standard histories the Shiji Historical Records and Hanshu History of Han important supplements to the better known biographical chapters and models for the inclusion of technical subjects in the twenty three later Standard Histories of imperial China Indeed for a

great many aspects of life in early imperial society they constitute our best primary sources for understanding complex realities and perceptions The essays in this volume seek to explain how different social groups thought of disseminated and withheld technical knowledge relating to the body politic and cosmos in the process of detailing the preoccupations of successive courts from Qin through Eastern Han in administering the localities the frontier zones and their numerous subjects at the time roughly one quarter of the world's population

Realism in International Relations: The Making of a Disarrayed Tradition Mehmet Tabak, 2025-03-05 According to a pervasive view in the discipline of International Relations IR a realism is a historical tradition stretching all the way back to Thucydides b despite the important theoretical differences among themselves realists uphold the same set of core beliefs about the workings of international politics Together these two claims amount to the perspective that realism is a sui generis scholarly tradition with ancient origins The author critiques both aspects of this view by illustrating that realism is both a relatively recent tradition and a disarrayed one He shows that the realist tradition entails conscious membership and participation in a common realist discourse that has produced fundamentally different even opposing methodologies and theories about the same or related phenomena in international politics In illustrating this argument the author critically explores a variety of seminal statements of and debates about realism This exploration reveals that the conceptual and theoretical shortcomings of the major statements of realism significantly explain why realism evolved as a disarrayed tradition Overall this book makes an important contribution to the understanding of realism in particular and IR in general The comprehensive and critical analysis of many facets of realism this book offers also yields many didactic elements

Bibliotheca Topographica Britannica John Nichols, 1790 *Milling*, 1892 *The NIH Record*, 1989 Traffic Tom Vanderbilt, 2009-08-11 Driving is a fact of life We are all spending more and more time on the road and traffic is an issue we face everyday This book will make you think about it in a whole new light We have always had a passion for cars and driving Now Traffic offers us an exceptionally rich understanding of that passion Vanderbilt explains why traffic jams form outlines the unintended consequences of our attempts to engineer safety and even identifies the most common mistakes drivers make in parking lots Based on exhaustive research and interviews with driving experts and traffic officials around the globe Traffic gets under the hood of the quotidian activity of driving to uncover the surprisingly complex web of physical psychological and technical factors that explain how traffic works

Post-fascist Fantasies Julia Hell, 1997 Employing an approach informed by Slavoj Žižek's work on the Communist's sublime body and by British psychoanalytic feminism's concern with feminine subjectivity Hell first examines the antifascist works by exiled authors and authors tied to the resistance movement She then strives to understand the role of Christa Wolf the GDR's most prominent author in the GDR's effort to reconstruct symbolic power after the Nazi period

"The" Tatler, 1806 The Tatler Alexander Chalmers, 1806 Twenty Years of Life Suzanne Bohan, 2018-04-19 In *Twenty Years of Life* Suzanne Bohan exposes the ugly truth that health is largely determined by zip code Life expectancies in wealthy versus poor neighborhoods

can vary by as much as twenty years Bohan chronicles a bold experiment to challenge that inequity The California Endowment one of the nation s largest health foundations is upending the old school top down charity model and investing 1 billion over ten years to help distressed communities advocate for their own interests With compassion and insight Bohan shares stories of students and parents former street shooters urban farmers and a Native American tribe who are tapping into their latent political power to make their neighborhoods healthier Their stories will fundamentally change how we think about the root causes of disease and the prospects for healing

Gnosticism and the History of Religions David G. Robertson, 2021-08-12 Building on critical work in biblical studies which shows how a historically bounded heretical tradition called Gnosticism was invented this work focuses on the following stage in which it was essentialised into a sui generis universal category of religion At the same time it shows how Gnosticism became a religious self identifier with a number of sizable contemporary groups identifying as Gnostics today drawing on the same discourses This book provides a history of this problematic category and its relationship with scholarly and popular discourse on religion in the twentieth century It uses a critical historical method to show how and why Gnosis Gnostic and Gnosticism were taken up by specific groups and individuals practitioners and scholars at different times It shows how ideas about Gnosticism developed in late nineteenth and twentieth century scholarship drawing from continental phenomenology Jungian psychology and post Holocaust theology to be constructed as a perennial religious current based on special knowledge of the divine in a corrupt world David G Robertson challenges how scholars interact with the category Gnosticism and contributes to our understanding of the complex relationship between primary sources academics and practitioners in category formation
