Building Surveys and Reports James Douglas,2010-12-13 This book provides guidance on building survey work for typical residential commercial and industrial buildings with advice on how to diagnose a wide range of defects It considers both modern and older construction methods together with new and traditional materials The particular problems of alteration and renovation work are discussed with guidance on how to carry out measured surveys A separate chapter covers survey problems after flood and fire damage and the legal section takes account of recent developments in case law relating to inspections and surveys of properties This new edition continues to provide a thorough treatment of all the key issues relating to surveying buildings dealing with the problems that surveyors are likely to

encounter when inspecting buildings Changes for the new edition include Examples and references have been updated Evaluation of condition rating systems for domestic and commercial buildings A new section on the home condition reports More information on slate defects Bibliography revised and expanded to make it more comprehensive Additional appendix showing the home condition report format

Building Adaptation James Douglas, 2006-08-11 As existing buildings age nearly half of all construction activity in Britain is related to maintenance refurbishment and conversions Building adaptation is an activity that continues to make a significant contribution to the workload of the construction industry Given its importance to sustainable construction the proportion of adaptation works in relation to new build is likely to remain substantial for the foreseeable future especially in the developed parts of the world Building Adaptation Second Edition is intended as a primer on the physical changes that can affect older properties It demonstrates the general principles techniques and processes needed when existing buildings must undergo alteration conversion extension improvement or refurbishment The publication of the first edition of Building Adaptation reflected the upsurge in refurbishment work The book quickly established itself as one of the core texts for building surveying students and others on undergraduate and postgraduate built environment courses This new edition continues to provide a comprehensive introduction to all the key issues relating to the adaptation of buildings It deals with any work to a building over and above maintenance to change its capacity function or performance

La permanenza in architettura Aa.Vv., 2011-11-10T00:00:00+01:00 Il termine permanenza riferito all'architettura significa mantenimento e affermazione nel tempo dei valori tecnici funzionali e simbolici degli edifici indica una precisa categoria di vita utile Sul piano operativo richiama anche la programmazione della durata e il progetto della obsolescenza fisica e funzionale un'azione prioritaria il cui controllo acquisisce valore strategico ai fini della realizzazione stessa dell'intervento Oggi al concetto di permanenza sempre più spesso contrapposto quello di temporaneità due paradigmi che nella loro contrapposizione toccano e per questo ci inducono a indagare importanti questioni di politica tecnica ed edilizia con significative ricadute anche su altri campi come l'economia e soprattutto le politiche ambientali In altre parole giusto che il tema della programmazione della durata edilizia si affianchi sempre più all'esigenza di un uso più razionale delle risorse disponibili Del tema il testo propone riflessioni sui termini storici terminologici e problematici e in conclusione su alcune questioni prettamente operative The word permanence when related to architecture means maintaining and assurance of technical functional and symbolic values of buildings during the time it denotes a specific category of service life At operational level it also refers to service life planning and to management of physical and functional obsolescence an overriding action whose control takes on a strategic value in order to project construction in itself Today it is more and more often contrasted the idea of permanence besides that of temporariness two paradigms that in their opposition concern and owing to this persuade us to investigate important matters related to technical and construction politics with meaningful consequences on other fields too as well as economy and above all environmental politics In other

words it is right that service life planning of buildings comes more and more abreast of need of a more rational use of available resources On such theme the work proposes some notes about historical terminological and problematic background and last of all on some typically operational issues Massimo Lauria Reggio Calabria 1964 architetto professore associato di Tecnologia dell'Architettura presso la Facoltà di Architettura dell'Università Mediterranea di Reggio Calabria Svolge attività di ricerca nell'Unità Operativa STOA del Dipartimento Arte Scienza e Tecnica del Costruire nel campo della progettazione dell'esistente con particolare attenzione ai temi della riqualificazione tecnologica e della manutenzione edilizia

Information Sources in Architecture and Construction Valerie J. Nurcombe, 1996 The new edition first 1983 comprises 24 chapters each written by an expert in the field who describes sources and in addition provides instructions in methodology and hints on keeping up with advances in information Coverage includes architectural history conservation contracts and liability *HAPM Workmanship Checklists* Construction Audit Ltd., 1999-09-09 The HAPM Workmanship Checklists fills an important gap in the current information provision in the industry providing guidance for those engaged in site inspections during the course of building works Its unique checklist format designed for use on site is complimented by extensive references to sources of guidance standards and legislative in **Residential Property Appraisal** Phil Parnham, Larry Russen, 2022-11-30 Residential Property Appraisal Volumes 1 and 2 are handbooks not only for students studying residential surveying but also for those involved in the appraisal of residential property Volume 1 has been updated and covers the valuation process as it relates to residential properties particularly when valuation is undertaken for secured lending purposes It addresses the basic skills required the risks posed in a valuation the key drivers of value emerging issues that impact valuation and the key legal and RICS regulatory considerations that a valuer needs to understand Volume 2 of the series goes on to consider the practical aspects of the survey and inspection of residential properties in more detail Not only does this include updated sections on the most common defects for example building movement moisture problems wood rot and wood boring insects it also covers emerging challenges including assessing personal safety hazards modern construction technologies and materials and invasive plants The volume also takes account of the Home Survey Standard recently published by the RICS and the changes resulting from climate change the energy crisis and concerns about fire safety Building services in domestic residential properties is another area of rapid change especially with the development of low carbon and renewable technologies To ensure that this aspect is covered in sufficient detail the content is to be included in Volume 3 Assessing Building Services An essential book for students studying to enter the residential survey and valuation profession and for existing practitioners who wish to improve their knowledge of current practices **Annual Review** Building Research Establishment, 1992 The British National Bibliography Arthur James Wells, 2001 *Communication in the Design Process* Stephen A. Brown, 2002-09-11 This book considers the gap that can exist between client expectation and realisation in building projects It focuses specifically on the areas of function finance timescale and aesthetics **The BPG**
