Proofs of the Cantor-Bernstein Theorem Arie Hinkis,2013-02-26 This book offers an excursion through the developmental area of research mathematics It presents some 40 papers published between the 1870s and the 1970s on proofs of the Cantor Bernstein theorem and the related Bernstein division theorem While the emphasis is placed on providing accurate proofs similar to the originals the discussion is broadened to include aspects that pertain to the methodology of the development of mathematics and to the philosophy of mathematics Works of prominent mathematicians and logicians are reviewed including Cantor Dedekind Schr der Bernstein Borel Zermelo Poincar Russell Peano the K nigs Hausdorff Sierpinski Tarski Banach Brouwer and several others mainly of the Polish and the Dutch schools In its attempt to present a diachronic narrative of one mathematical topic the book resembles Lakatos celebrated book Proofs and Refutations Indeed some of the observations made by Lakatos are corroborated herein The analogy between the two books is clearly anything but superficial as the present book also offers new theoretical insights into the methodology of the development of mathematics proof processing with implications for the historiography of mathematics **The Child's Companion and Youth's Friend** ,1849
