*Hard Evidence* Susan Peterson, 2012-01-17 CAN YOU TAKE THE HEAT From street smart kid to respected cop Killian Chili Pepper Cray had left her old life behind eight years ago and never looked back But after an attempted murder left her foster father in a coma Killian was forced to wade through the bitter memories back home in Syracuse and dig up evidence that would bring down the killer Facing her past had never been

easy but it was reuniting with the man who d loved and betrayed her that really shook Killian to the core Stubborn as always Jack O Brien insisted on helping her especially as the threats against Killian s own life mounted And before long the man who d helped build the walls around Killian s heart was doing his best to break them down *Hard Evidence for ET Origins and Visits* Scott Campbell,2022-05-24 In the film Prometheus about traveling to the moon of a distant planet to find our creators Shaw and Holloway make a presentation on their research to the crew They assert that they seek answers to the age old questions of where we came from and who we came for life on Earth They claim our DNA was engineered by the same advanced alien species they seek on the moon called LV 223 Immediately the biologist on the crew objects saying that they are discounting three hundred years of Darwinism No they are not at all The aliens did not seed the planet with alien babies they allegedly seeded Earth with DNA that we assume was combined into microbes and helped to evolve life as we know it This would demand all the Darwinian principles of evolution In this case evolution on Earth did not create DNA itself the backbone of life just the life derived from it It turns out there is hard scientific evidence to support the panspermia hypothesis One line of evidence lies in our biological evolution and especially that of microbes as the precursors to complex life It suggests that microbes with DNA came from off planet to kick start life on Earth Another line of evidence shows that our genetic coding itself in all probability was in fact designed and bears signatures saying so Our genetic coding boasts nine prime numbers as a signature a statistical chance of being natural at one in ten trillion In other words its ten trillion to one that we were genetically engineered When we combine the two that our DNA arose from sophisticated genetic engineering and that it our microbe evolution suggests alien donors of DNA to take the lead in creating life then we can make a good case that we are of alien origin Another line of documented evidence that we are not alone lies with a very small interstellar visitor that zipped through our solar system in 2017 We only had eleven days to gather data on Oumuamua It was thin showed evidence of being metallic was propelled by a force assumed to be the sun and had so many unique properties that Harvard astronomer Avi Loeb said that rather than a comet or asteroid it was a work of technology According to Dr Loeb it was most likely some sort of light sail His hypothesis and book on the subject shook up the scientific world *Experience, Evidence, and Sense* Anna Wierzbicka,2010-06-24 This book is based on two ideas first that any language English no less than any other represents a universe of meaning shaped by the history and experience of the men and women who have created it and second that in any language certain culture specific words act as linchpins for whole networks of meanings and that penetrating the meanings of those key words can therefore open our eyes to an entire cultural universe In this book Anna Wierzbicka demonstrates that three uniquely English words evidence experience and sense are exactly such linchpins Using a rigorous plain language approach to meaning analysis she unpacks the dense cultural meanings of these key words disentangles their multiple meanings and traces their origins back to the tradition of British empiricism In so doing she reveals much about cultural attitudes embedded not only in British and American English but also English as a global

language An interdisciplinary work Experience Evidence and Sense will be of interest to both scholars and students in linguistics and English as well as historians of ideas sociologists anthropologists literary scholars and scholars of communication

Sustaining Nonprofit Performance Paul C. Light, 2004-08-31 The nonprofit sector survives because it has a self exploiting work force wind it up and it will do more with less until it just runs out But at some point the spring must break America s nonprofit organizations face a difficult present and an uncertain future Money is tight Workloads are heavy employee turnover is high and charitable donations have not fully rebounded from the recent economic downturn Media and political scrutiny remains high and public confidence in nonprofits has yet to recover from its sharp decline in the wake of well publicized scandals In a recent survey only 14 percent of respondents believed that nonprofits did a very good job of spending money wisely nearly half said that nonprofit leaders

were paid too much compared to 8 percent who said they earned too little Yet the nonprofit sector has never played a more important role in American life As a generation of nonprofit executives and board members approaches retirement it becomes increasingly important to ensure that their organizations are prepared to continue their missions that they are built to last in a supremely challenging environment Paul Light renowned expert on public service and nonprofit management strongly argues for capacity building measures as a way to sustain and improve the efforts of the nonprofit sector With innovative data and insightful analysis he demonstrates how nonprofits that invest in technology training and strategic planning can successfully advance their goals and restore public faith in their mission and capabilities He explains the ways in which restoration of that faith is critical to the survival of nonprofits another important reason for improving and then sustaining performance Organizations that invest adequately in their infrastructure and long term planning are the ones that will survive and continue to serve
