Hard To Solve Math Puzzles:

Hard-to-Solve Math Puzzles Derrick Niederman, 2001 Put your mathematical thinking cap on because even though these puzzles are toughies they take insight and brainwork to solve not a knowledge of calculus or linear algebra or any other kind of advanced math Consider for a moment How can you divide a regular pentagon into five identical pentagonal shapes What is the only decade in American history to contain four prime numbered years What three right triangles with integer sides have areas numerically equal to twice their perimeters Don't worry if the answers don't spring to mind immediately you'll have plenty of company Compute without calculators study the survival of the fittest by arithmetically analyzing a little amoeba reproduction and investigate whether or not a rich man's children are getting a square deal with their inheritance Just don't give up because you'll have a lot of satisfaction when you figure them out Impossible Folding Puzzles and Other Mathematical Paradoxes Gianni A.
