Aerospace Health and Safety: Today and the Future Irina Mordukhovich, Mardi A. Crane-Godreau, Eileen Mcneely, Christopher Scheibler, 2023-11-20 Aviation plays vital roles in commerce defense science and leisure travel Irrespective of the purpose of flight crew and passengers are challenged by exposure to a variety of environmental conditions that can differ widely from work and travel environments on the surface of the Earth With anticipated changes in aviation and space technology new challenges to health and safety of crew and passengers can be expected In this Research Topic we welcome contributions from those whose work and interests are relevant to the health and safety of crew and passengers This includes but is not limited to health and safety professionals FAA examiners corporate medical officers aerospace and occupational physicians physiologists military and scientific team members public health professionals as well as engineers who are tasked with crew and passenger health and safety design projects While 4.1 billion passengers fly on commercial airlines annually and this figure is even higher when taking into account privately owned aircraft and military flight for the most part aviation is safe Passengers do arrive at their destinations with little concern to their own well being and flight is generally well tolerated However older flyers people with diagnosed or undiagnosed preexisting disease and other vulnerable passengers such as young children and pregnant women may be at risk of complications and crew may be at special risk due to the frequency and duration of their many flight related exposures Health and safety issues for crew and passengers include but are not limited to potentially severe circadian rhythm disruption potential health effects of low level cosmic ionizing radiation exposure at altitude reduced oxygen delivery and tissue hypoxia at cabin pressurization cabin air contamination by engine gases toxic materials used in uniforms and some cabin seat materials occupational noise pesticides used for cabin disinsection lack of adequate crew rest on layovers or between flights cardiovascular demands of flight and effects of flight related dehydration the current absence of screening protocols especially in the context of a rising number of elderly and vulnerable flyers lack of healthy nutrition at airports and in flight availability of food and hydration as well as adequate cabin temperature under delay conditions effects of alcohol use on flight related physiological and behavioral health risks anxiety and psychological distress associated with air travel the effects of long haul or ultra long haul flights on thromboembolic events as well as smoking cessation efforts and related psychological outcomes job related stress and harassment among crew Cosmic ionizing and non ionizing radiation exposure have drawn attention as have historic exposures of crew and

passengers to second hand cigarette smoke The threat of political and interpersonal violence and altercations involving aviation cannot be overlooked On board medical emergencies run a wide gamut and the capacity to respond becomes more problematic as the duration of flights becomes longer or in the case of flight over oceans and the poles In addition in flight and post flight embolisms and myocardial infarctions are more prevalent than might be expected We hence encourage manuscripts that address in flight medical response including the capabilities on different types of aircraft on potential interventions by crew and medical volunteers In addition aviation as a vector for the carriage of disease is a significant concern to public health and security of populations world wide and we welcome submissions regarding infectious disease epidemiology and medicine as it relates to air travel Insects and occasional unplanned travel by birds and rodents can present additional public health concerns We are approaching an era where space travel may soon be increasingly common Future flights for near Earth orbit by leisure travelers and as well as travel to the moon and Mars raise a host of new questions with health and safety implications What are the proposed health and safety accommodations going to be Who will be allowed to travel Perhaps the most interesting question is who will make the rules

Health in Prisons A. Gatherer, World Health Organization. Regional Office for Europe, 2007 Based on the experience of many countries in the WHO European Region and the advice of experts this guide outlines some of the steps prison systems should take to reduce the public health risks from compulsory detention in often unhealthy situations to care for prisoners in need and to promote the health of prisoners and prison staff This requires that everyone working in prisons understand how imprisonment affects health what prisoners health needs are and how evidence based health services can be provided for everyone needing treatment care and prevention in prison Other essential elements are being aware of and accepting internationally recommended standards for prison health providing professional care with the

same adherence to professional ethics as in other health services and while seeing individual needs as the central feature of the care provided promoting a whole person approach to care and promoting the health and well being of people in custody

Emergency Triage Advanced Life Support Group (ALSG), 2015-09-08 Emergency Triage Telephone Triage and Advice complements the highly successful Emergency Triage The algorithms are rooted in the Manchester Triage System MTS which is used in hospitals around the world and which is acknowledged as an effective means of clinical prioritisation This telephone iteration of a triage system which prioritises millions of patients each year provides a robust safe evidence based system for managing the clinical risk in patients who are at a distance from health care providers The basic principles that drive the MTS remain but this book addresses the specific difficulties of assessment by telephone The possible triage outcomes are face to face now face to face soon and face to face later together with a self care option Information and advice is suggested at every level The advice ranges from life saving interventions which can be carried out until health care arrives to self care instructions Emergency Triage Telephone Triage and Advice provides all the necessary information that telephone triage staff must have to hand as well as including examples of questions to be asked It will be a valuable resource for staff working in emergency departments health centres and telephone triage organisations Furthermore hospitals that are already using Emergency Triage will benefit from being linked with a telephone triage system that follows the same protocols Updated to Version 1.7 in 2023
