

At the time of the Exodus the Reed Sea, located here, was considered part of the Red Sea. It is thought to be the marshy ground where the Egyptian chariots became mired (Exodus 14: 26-28).

course, as Mr Downing comments, the "beings in charge of the UFOs knew ahead of time what would happen at the Reed Sea". I now believe this to be the case. If the "pillar of cloud" was in fact a cigar-shaped UFO, then the intelligence controlling it had to lead the Israelites to the one place in the area where an unforgettable miracle could be staged, and Pharaoh's army destroyed.

A geographic position had to be selected where all the necessary harmonic coordinates to set up an anti-gravity beam, with which the setting miracle could be arranged, were available. And since we in the twentieth century are still unable to duplicate such a feat, a miracle it was indeed.

According to Downing, at the time of the "parting of the water", the UFO had taken up a position behind the Israelites, who were then on the west bank of the Red Sea. From this fact we can assume that the cigar-shaped vehicle was positioned a half mile or so from the western shoreline.

I established the map coordinates for this point and began to calculate the latitude of the crossing, from west to east, which in fact is 31°. This was an extremely interesting beginning, because this angle of latitude affords a direct harmonic with the reciprocal of the speed of light. Thirty-one degrees equals 1160 minutes; the harmonic logarithmic value of 1160 = 2.067. This value is built into the polar patterns of the UFO grid, and it is also derived from the unified equations which produce anti-gravity, as I have explained elsewhere in this book.

It seems, then, that first of all the UFO had to lead the Israelites to a position where they could proceed across a certain line of latitude in order to create the necessary conditions for the setting up of a force field that would create the miracle of the "parting of the water".

Calculating the values of longitude proved to be more difficult. After puzzling over the problem for three days, the solution came to me.

To begin with, I hunted for one value of longitude, or one north-south line, which would pass through the area and from which a geometric harmonic could be calculated. I expected that the most probable position of the line of longitude would be through the center of the body of water which the Israelites had to cross. I spent hours trying out various calculations
