Harmony In Diversity The Architecture And Teaching Of Ellis F Lawrence:

Harmony in Diversity Michael Shellenbarger, 1989 **The Company Town** John S. Garner, 1992 Company towns those associated with textiles mining or tool manufacturing for example are found worldwide and have been in existence for many centuries But with the coming of the Industrial Revolution what had been isolated instances of town building became a veritable phenomenon With explosive growth virtually hundreds of them appeared in the Western World until about the time of the Great Depression with development most intensive and homogenous in Europe and the Americas Although the technological experience of the Industrial Revolution has been widely chronicled and the stories of misplaced banking and exploited labor well documented until now the actual settings of company towns and the overall achievement in industrial architecture and town planning have been largely ignored The Company Town describes the concurrent development and building of selected towns in Europe and the Americas assessing technical advances in factory building worker housing and the public buildings that owner industrialists in their capacity as philanthropists bestowed upon such towns In many instances the company town came to symbolize the wrecking of the environment especially in places associated with extractive industries such as mining and lumber milling Some resident industrialists however took a genuine interest in the welfare of their work forces and in a number of instances hired architects to provide a model environment Overtaken by time these towns were either abandoned or caught up in suburban growth The most thorough going and only international assessment of the company town this collection of essays by specialists and authorities of each region offers a balanced account of architectural and social history and provides a better understanding of the architectural and urban experiences of the early industrial age **Eden Within Eden** James J. Kopp, 2009 Oregon has been the home of nearly three hundred communal experiments since the Aurora Colony was established in 1856 Eden Within Eden is the first book to survey the state's utopian history from religious and Socialist groups of the nineteenth century to ecologically conscious communities of the twenty first century James J Kopp examines Oregon's communal history in the context of the state as a destination for those seeking new beginnings and in the framework of utopian and communal experiences across America Eden Within Eden provides rich detail about utopian communities some realized some only planned many of which reflect broader social political economic and cultural aspects of Oregon's history From the dawn of communal groups in Oregon the German Christian colony at Aurora to Oregon's most infamous communal experiment Rajneeshpuram this study examines the range of attempts to establish ideal communities in the state These include the Jewish agrarian colony of New Odessa in the 1880s as well as the new pioneers of the 1960s and later who captured the spirit of the counterculture as well as growing concerns about the environment The book explores other areas of Oregon's utopian heritage as well including literary works and idealistic city planning There has been no comparable book published on Oregon's communal history and few such comprehensive examinations of other states The appendix is a rich compilation that will guide individuals to additional

information on the profiled and many other communities Eden Within Eden will appeal to students and scholars of communal studies and Pacific Northwest history as well as to general readers interested in these subjects

Beauty of the City Philip Niles,2008 All new things built with the idea of preserving the beauty of the city and adding to it A E Doyle

The Central Library Benson Hotel Reed College the Meier Frank building the U S National Bank these are just a few of the grand Portland icons designed by Albert E Doyle

During a period of rapid growth in Portland Oregon after the Lewis Clark Centennial Exposition and before the Great Depression Doyle 1877 1928 was the city s most important architect

Beauty of the City is the first biography of this celebrated architect

Doyle s career was short just twenty one years Yet everywhere Portland retains his imprint

Many of Doyle s classical often white terra cotta buildings became venerable city landmarks

He also designed Portland residences Neahkahnie beach cottages and houses and banks in Oregon and Washington

Using A E Doyle s own diaries and letters and his firm s records historian Philip Niles traces the architect s life and times in the context of the burgeoning cityscape

As Portland expanded beyond its frontier origins and provincialism Doyle helped introduce East Coast and European sophistication

Indeed his refined sensibility influenced the development of the Northwest Regional Style by Pietro Belluschi and John Yeon among others

Doyle set the standard for elegance and proportion that later architects adapted to more modern styles

his standard defines Portland s vibrant core and contributes to the city s beauty as much today as it did eighty years ago

Readers interested in Northwest history and culture will appreciate this compelling and richly illustrated biography of Portland s architect and the parallel story of the growth of the city

Likewise architectural historians and those seeking to better understand Portland s architectural heritage will enjoy reading of Doyle s contributions to this celebrated cityscape
