**DISADVANTAGED GROUPS: A SOCIAL POLICY PERSPECTIVE** Deniz SAY ŞAHİN, Sevinç PEHLİVAN SÜTLÜ, 2022-01-19 Universal Declaration of Human Rights begins as All human beings are born free and equal in dignity and rights and Everyone is entitled to all the rights and freedoms set forth in this Declaration without distinction of any kind such as race colour sex language religion political or other opinion national or social origin property birth or other status But some segments of the society have more rights and freedoms than others Although the Others have been given names such as Groups that Need Special Protection they are now called Disadvantaged Groups and include children young people addicts the elderly the disabled immigrants minorities ex convicts women single parent families the poor Considering that the majority of the world s population consists of children young people women and the elderly it is obvious that the problems of disadvantaged groups are actually the problems of society Although the groups are counted individually a person is in more than one group The disadvantaged poor child can grow up to be a woman who becomes a single parent Special Issue on Health Policy and the Disadvantaged, 1990 Healthy Voices, Unhealthy Silence Colleen M. Grogan, 2007-09-11 Public silence in policymaking can be deafening When advocates for a disadvantaged group decline to speak up not only are their

concerns not recorded or acted upon but also the collective strength of the unspoken argument is lessened a situation that undermines the workings of deliberative democracy by reflecting only the concerns of more powerful interests But why do so many advocates remain silent on key issues they care about and how does that silence contribute to narrowly defined policies What can individuals and organizations do to amplify their privately expressed concerns for policy change In *Healthy Voices Unhealthy Silence* Colleen M Grogan and Michael K Gusmano address these questions through the lens of state level health care advocacy for the poor They examine how representatives for the poor participate in an advisory board process by tying together existing studies extensive interviews with key players and an in depth first hand look at the Connecticut Medicaid advisory board s deliberations during the managed care debate Drawing on the concepts of deliberative democracy agenda setting and nonprofit advocacy Grogan and Gusmano reveal the reasons behind advocates often unexpected silence on major issues assess how capable nonprofits are at affecting policy debates and provide prescriptive advice for creating a participatory process that adequately addresses the health care concerns of the poor and dispossessed Though exploring specifically state level health care advocacy for the poor the lessons Grogan and Gusmano offer here are transferable across issue areas and levels of government Public policy scholars advocacy organizations government workers and students of government administration will be well served by this significant study
