Health Policy In A Globalising World:

Health Policy in a Globalising World Kent Buse, Suzanne Fustukian, Kelley Lee, 2001 Increasing recognition of the impact globalisation is having on public health has led to widespread concern about the risks arising from emerging and re emerging diseases environmental degradation and demographic change A distinguished international team of contributors explores these issues within a wide range of topics and geographic regions

Globalisation, Markets and Healthcare Policy Jonathan Tritter, Meri Koivusalo, Eeva Ollila, Paul Dorfman, 2009-09-10 Although the last two decades have seen the healthcare systems of most developed countries face pressure for major reform the impact of this reform on the relationship between empowerment consumerism and citizens rights has received limited research attention Globalisation Markets and Healthcare Policy sets out to redress this imbalance This book explores the extent to which globalisation and commercialisation relate to current and emerging health policies It also looks at the implications for citizens patients and social rights as well as how policy making interacts with the interests of global and European trade and economic policies Topics discussed include How the impact of globalisation on health systems is apparent in the influence of international actors and European policies How the impact of globalisation is mediated by national priorities and policies and is therefore reflected in diverse influences How commercialisation of health is presented as benefiting citizens and patients but has the potential to undermine the aims and values inherent in health systems How the role of citizens interests social rights patient s rights and priorities of patient and public involvement need to be separated from commercialisation choice and consumerism in health care Essential reading for policy makers and students of public policy politics law and health services Globalisation Markets and Healthcare Policy will also appeal to those interested in patient involvement international healthcare international relations trans national organisations and the EU

Healthcare Management Walshe, Kieran, Smith, Judith, 2011-09-01 This provides a comprehensive research based introduction to healthcare management The book takes an international perspective and draws links between the theory and practice of healthcare management and how best practice might be achieved within healthcare systems

Global Health and International Relations Colin McInnes, Kelley Lee, 2013-05-02 The long separation of health and International Relations as distinct academic fields and policy arenas has now dramatically changed Health concerned with the body mind and spirit has traditionally focused on disease and infirmity whilst International Relations has been dominated by concerns of war peace and security Since the 1990s however the two fields have increasingly overlapped How can we explain this shift and what are the implications for the future development of both fields Colin McInnes and Kelley Lee examine four key intersections between health and International Relations today foreign policy and health diplomacy health and the global political economy global health governance and global health security The explosion of interest in these subjects has in large part been due to real world concerns disease outbreaks antibiotic resistance counterfeit drugs and other risks to human health amid the spread of

globalisation Yet the authors contend that it is also important to understand how global health has been socially constructed shaped in theory and practice by particular interests and normative frameworks This groundbreaking book encourages readers to step back from problem solving to ask how global health is being problematized in the first place why certain agendas and issue areas are prioritised and what determines the potential solutions put forth to address them The palpable struggle to better understand the health risks facing a globalized world and to strengthen collective action to deal with them effectively begins they argue with a more reflexive and critical approach to this rapidly emerging subject

International Public Health: Diseases, Programs, Systems and Policies Michael Merson, Robert E. Black, Anne Mills, 2006 In this text for graduate students in various disciplines who are studying international public health the author focuses on conditions in low and middle income countries occasionally making reference to high income countries He suggests approaches for fostering public health and discusses future challenges for health promotion and disease prevention around the world The text can also be used as a reference by those working in government agencies international health and development agencies and NGOs

Global Health and International Community John Coggon, Swati Gola, 2013-09-12 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com Global health arguably represents the most pressing issues facing humanity Trends in international migration and transnational commerce render state boundaries increasingly porous Human activity in one part of the world can lead to health impacts elsewhere Animals viruses and bacteria as well as pandemics and environmental disasters do not recognize or respect political borders It is now widely accepted that a global perspective on the understanding of threats to health and how to respond to them is required but there are many practical problems in establishing such an approach This book offers a foundational study of these urgent and challenging problems combining critical analysis with practically focused policy contributions The contributors span the fields of ethics human rights international relations law philosophy and global politics They address normative questions relating to justice equity and inequality and practical questions regarding multi organizational cooperation global governance and international relations Moving from the theoretical to the practical *Global Health and International Community* is an essential resource for scholars students activists and policy makers across the globe

Globalizing Issues Erik Neveu, Muriel Surdez, 2020-09-07 This book is an invitation to question conventional and often misleading visions of globalization No problem is global by nature issues are transformed by the action of claims makers to become problems debated in supra national forums triggering policy choices and policy transformations Contributions highlight how health issues environmental issues and or political issues are framed as global by a set of stakeholders scientific experts bureaucrats political parties or actors social movements social networks firms As the volume maps the social logic behind the globalization of problems it also presents an opportunity for the very cross disciplinary collaboration it calls for researchers mobilizing the agenda setting paradigm of issue globalization and those working within the social

constructionist model are both represented here providing a unique opportunity to examine the dynamics of globalization from the perspectives of political media economic sociology international relations social movement studies and beyond

EBOOK: Healthcare Management Kieran Walshe, Judith Smith, 2017-10-27 This popular book is written by leading experts in the field and covers all the key aspects of healthcare management Written with healthcare managers professionals and students in mind it provides an accessible and evidence based guide to healthcare systems services organizations and management Key areas covered include Structure and delivery of healthcare services in the international context including mental health acute care primary care chronic disease and integrated care Allocating resources for healthcare setting and managing priorities Health technologies research and innovation Global health policy governing health systems across borders Patient and public involvement in healthcare Healthcare governance and performance This third edition has been significantly rewritten with 10 new contributors and a new chapter structure designed to better support learning practical application and further study In addition there is a more international focus and each chapter includes new case studies giving global examples of health systems and services new and updated learning activities to encourage application to your own organization and a range of links to useful online resources Healthcare Management is essential research based reading for students teachers and healthcare professionals involved in management research and health policy making Walshe and Smith have assembled an invaluable introduction to healthcare management and health systems With their fellow authors they provide a comprehensive review of a range of issues related to the funding and provision of care and how services are organised and managed Now in its third edition Healthcare Management has been updated and revised to meet the needs of teachers and students alike Professor Chris Ham Chief Executive The King's Fund UK This book covers the main areas of knowledge which managers need and gives tools for thinking and empirical examples relevant to current challenges Evidence based management might not always be possible but this book gives a way for a manager to become research informed and therefore more effective This third edition of the book is even more relevant internationally and improved to help readers apply the ideas to their situation Professor John Vretveit Director of Research LIME MMC The Karolinska Institute Sweden No one learns to be a manager in a classroom or from a book but books that take this disclaimer as their starting point are indispensable Walshe and Smith and their fellow authors invite their audience healthcare managers healthcare policy makers and postgraduate students taking courses in healthcare management to critically combine experiential learning with academic learning and to acquire knowledge from both practice and theory By doing so they have found the third way between the advocates of evidence based management and their critics Dr Jan Kees Helderman Associate Professor in Public Administration Institute for Management Research Radboud University Nijmegen the Netherlands , **A Multidisciplinary Approach to Pandemics** Philippe Bourbeau, Jean-Michel Marcoux, Brooke A. Ackerly, 2022-03-31 Pandemics have quickly become one of the most important subjects of the twenty first century This

edited volume provides a comparative analysis of the ways in which pandemics are theorized and studied across several disciplines A Multidisciplinary Approach to Pandemics has two objectives first to explore the growing diversity of theories and paradigms developed to study pandemics and second to initiate a multidisciplinary dialogue about the ontological epistemological paradigmatic and normative aspects of studying pandemics across disciplines The study of pandemics is not new Yet despite the volume of research interest in a host of academic fields scholars rarely talk across the disciplines This study seeks to fill that gap by attempting to bridge disciplinary canyons Eager to encourage this arena of conversation this book brings together in a single volume essays by political scientists environmental scholars legal scholars clinical pharmacists economists scholars of urban planning scholars in health and medicine schools and researchers in business and management

Kuhlmann, 2017-10-11 A broad ranging introduction to the provision funding and governance of health care across a variety of systems This revised fifth edition incorporates additional material on low middle income countries as well as broadened coverage relating to healthcare outside of hospitals and the ever increasing diversity of the healthcare workforce today

Diagnostic Controversy Carolyn Smith-Morris, 2015-08-20 This collection is dedicated to the diagnostic moment and its unrivaled influence on encompassment and exclusion in health care Diagnosis is seen as both an expression and a vehicle of biomedical hegemony yet it is also a necessary and speculative tool for the identification of and response to suffering in any healing system Social scientific studies of medicalization and the production of medical knowledge have revealed tremendous controversy within and factitiousness at the outer parameters of diagnosable conditions Yet the ethnographically rich and theoretically complex history of such studies has not yet congealed into a coherent structural critique of the process and broader implications of diagnosis This volume meets that challenge directing attention to three distinctive realms of diagnostic conflict in the role of diagnosis to grant access to care in processes of medicalization and resistance and in the transforming and transformative position of diagnosis for 21st century global health Smith Morris s framework repositions diagnosis as central to critical global health inquiry The collected authors question specific diagnoses e g Lyme disease Parkinson s andropause psychosis as well as the structural and epistemological factors behind a disease s naming and experience
