Introduction

The health care scenario worldwide is heading dramatic change and due importance is being given to research and testing of medicines. From ancient times itself, the personal health of each citizen is considered as the health index of a 'healthy nation'. Changes in lifestyle and food habits created more and more diseases and some of them are out of human control. 'Health Politics, power, populism and Health' by Mike Magee, MD examines the hidden stories and trends behind health care systems in the United States.

The patient rights and health system reform in the United States is an issue that is under discussion and much more reformatory measures are taken by the government and are influenced by famous physicians like Mike Magee, MD, and others. It is predicted that a new health care model which is capable of humanizing the system with team-based approaches and home-centered health care is to have emerged and will take over the existing system.

Only systematic planning can save the health care system and non-governmental organizations can play an important role in future developments. In the existing health care system in the United States, due importance is given to the patient-physician relationship and its basic principles are based upon compassion, partnership, and understanding. From another viewpoint, there is a productive cross-sector partnership between government, industry, academia, and non-governmental organizations.

To have an idea on the topic, there must be a clear-cut examination on a wide range of policy issues, health care system changes, and on the prediction of a new age of health populism. Health care issues of the day are becoming more and more complex and the topics discussed under are Globalization, Aging, The evolving patient-physician relationship, Home health care, Women's health, Chronic diseases, Caring of seniors, End-of-life care, Improving health care value, etc.
