professionals The economics of healthcare are messy For most consumers there s little control over costs or services Sometimes doctors are paid a lot other times they aren t paid at all Insurance and drug companies are evil except when they re not If economics is the study of market efficiency how do we make sense of this Better Health Economics is a warts and all introduction to a field that is more exceptions than rules Economists Tal Gross and Matthew J Notowidigdo offer readers an accessible primer on the field s essential concepts a review of the latest research and a framework for thinking about this increasingly imperfect market A love letter to a traditionally unlovable topic Better Health Economics provides an ideal entry point for students in social science business public policy and healthcare It s a reminder that healthcare may be a failed market but it s our failed market
