**Insurance, Risk Management, and Public Policy** Sandra G. Gustavson, Scott E. Harrington, 2012-12-06 Five years ago the world lost one of its most prolific insurance scholars Dr Robert I Mehr His death in 1988 signalled the passing of not only a gifted writer and researcher but also a pioneering teacher mentor and friend The essays compiled within this volume are intended as an appropriate tribute to this occasionally outrageous individual who touched the lives of so many within the insurance community Bob Mehr was a teacher who expected and demanded nothing less than perfect scholarship and flawless efficient writing Among alumni of the University of Illinois insurance doctoral program stories still abound of late night and early morning sessions in which students and professor painstakingly debated precise words and phrases for dissertations journal articles and textbooks Bob s respect for language was both immense and contagious if at times more than a little compulsive He joked that he could not read letters or novels without pencil in hand for editing Bob s respect for his doctoral students was equally evident The confidence he displayed in his students abilities was sometimes startling but competence assumed often begot competence in fact The accomplishments and records amassed by the many who studied with Bob Mehr are impressive and ongoing On the dedication page in his final textbook *Fundamentals of Insurance* Bob spoke of his affection for those he called his academic progeny and wished them happiness as they build their own academic families

**Forum for Applied Research and Public Policy**, 1993 *Public Policy Evaluation* Stuart S. methods causes process substance and the policy studies profession Concepts clarify that policy evaluation traditionally involves 1 Goals to be achieved 2 Alternatives available for achieving them 3 Relations between goals and alternatives 4 Drawing a conclusion as to the best alternative in light of the goals alternatives and relations and 5 Analysing how the conclusion would change if there were changes in the goals alternatives or relations Super optimizing also involves five related steps but with the following improvements 1 Goals are designed as conservative liberal or neutral 2 Alternatives get the same designations 3 Relations are simplified to indicate which alternatives are relatively high or low on each goal 4 The conclusion involves arriving at an alternative that does better on Goal A than Alternative A and simultaneously better on Goal B than Alternative B and 5 The fifth step involves analysing the super optimum or win win alternative in terms of its feasibility as to the economic technological psychological political administrative and legal matters
