## **Healthcare Allocation An Ethical Framework For Public Policy:**

**Healthcare Allocation** Anthony Fisher, Luke Gormally, 2001      **Foundations of Healthcare Ethics** Jānis T. Ozoliņš, Joanne Grainger, 2015-04-08 This book arms both students and professionals with the knowledge to tackle situations of moral uncertainty in clinical practice      **Interprofessional Collaboration** Audrey Leathard, 2004-03 In Interprofessional Collaboration the benefits of collaboration for patients and carers are confirmed through theoretical models illustrated with case studies of existing examples      *Biomedicine and Beatitude* Nicanor Pier Giorgio Austriaco, 2021-06-25 This timely and up to date new edition of Biomedicine and Beatitude features an entirely new chapter on the ethics of bodily modification It is also updated throughout to reflect the pontificate of Pope Francis recent concerns including ethical issues raised by the COVID 19 pandemic and feedback from the many instructors who used the first edition in the classroom      **Conscious in a Vegetative State? A Critique of the PVS Concept** Peter McCullagh, 2006-01-17 Having been originally introduced as a term to facilitate discussion of a specific group of patients regarded as entering a state of unawareness following coma the Persistent Vegetative State PVS has established itself as an apparently discrete medical condition with clear cut implications for ethicists and lawyers that exceed any scientifically based understanding As a consequence of this upgrading conclusions drawn about the status and hence the management of this uncommon condition have been increasingly extended to other patients with much more common forms of disability This book traces the origins of prevailing perceptions about PVS and submits these to critical examination In doing this it comes to the conclusion that inadequate attention has been paid to acknowledging what is not known about affected individuals and that assumptions have consistently come to be traded as facts Re examination of the basis of the PVS and the adoption of a more scientific approach is long overdue and is owed to the community at large which has generally been provided by many medical practitioners with a dumbed down account of the condition The book will be of interest to philosophers medical graduates and neuroscientists but is also intended to remain accessible to the general reader with an interest in the wider implications of trends in medical thinking for attitudes towards many classes of patient It has an extensive bibliography and will be of specific interest to bioethicists and lawyers with professional interests in PVS      Bioethics and the Human Goods Alfonso Gómez-Lobo, 2015-10-15 Bioethics and the Human Goods offers students and general readers a brief introduction to bioethics from a natural law philosophical perspective This perspective which traces its origins to classical antiquity has profoundly shaped Western ethics and law and is enjoying an exciting renaissance While compatible with much in the ethical thought of the great religions it is grounded in reason not religion In contrast to the currently dominant bioethical theories of utilitarianism and principlism the natural law approach offers an understanding of human flourishing grounded in basic human goods including life health friendship and knowledge and in the wrongness of intentionally turning against or neglecting these goods The book is divided into two sections Foundations and Issues Foundations sketches a natural law understanding of the important ethical principles of

autonomy non maleficence beneficence and justice and explores different understandings of personhood and whether human embryos are persons Issues applies a natural law perspective to some of the most controversial debates in contemporary bioethics at the beginning and end of life research on human embryos abortion infanticide euthanasia the withdrawal of tube feeding from patients in a persistent vegetative state and the definition of death The text is completed by appendices featuring personal statements by Alfonso Gomez Lobo on the status of the human embryo and on the definition and determination of death Human Values D. Oderberg, T. Chappell, 2004-10-14 In recent decades the revival of natural law theory in modern moral philosophy has been an exciting and important development Human Values brings together an international group of moral philosophers who in various respects share the aims and ideals of natural law ethics In their diverse ways these authors make distinctive and original contributions to the continuing project of developing natural law ethics as a comprehensive treatment of modern ethical theory and practice The Global Health Crisis Thana Cristina de Campos, 2017-03-30 Proposing a new view of global justice based on natural law this book presents a discussion of the key ethical values in contemporary medicine and health notably in relation to neglected diseases like malaria Ebola and Zika The lack of treatments for such diseases points to a global health crisis Thana Cristina de Campos provides a general framework based on global commutative justice for discussion of the ethical responsibilities of international stakeholders mapping the varying duties they have and their content and force She also addresses the urgent need for reforms to the international legal rules on bioethics notably the system of intellectual property rights These ideas will be of interest to those who are looking for a more nuanced view of the human right to health than that provided by advocates in the globalist mainstream

**Terminal Sedation: Euthanasia in Disguise?** Torbjörn Tännsjö, 2004-05-31 TERMINAL SEDATION DURING THE 1990s During the 1990s a discussion took place in scholarly journals concerning a measure within palliative care that had earlier attracted little attention to wit the sedation of dying patients There seem to have been two main reasons why the practice came under debate On the one hand some people felt that when palliative medicine had advanced and methods to control symptoms had improved it was no longer justified to sedate the patients in a manner that had often been done in the past The system of 1 terminal sedation had turned into

euthanasia in disguise or slow euthanasia On the other hand there were people sympathetic to the recently established Dutch system of euthanasia people who agreed that terminal sedation was euthanasia in disguise but who felt that if it is not objectionable to sedate dying patients at their request then why should it not be permitted for doctors to kill dying patients at 2 request From these two motives a discussion about terminal sedation gained momentum The intention behind this anthology is to continue and deepen this discussion The anthology starts off with a chapter where an influential article from the 1990s has been reprinted

*Reason, Morality, and Law* John Keown DCL, Robert P. George, 2013-03-21 John Finnis is a pioneer in the development of a new yet classically grounded theory of natural law His work offers a systematic philosophy of practical reasoning and moral choosing that addresses the great questions of the rational foundations of ethical judgments the identification of moral norms human agency and the freedom of the will personal identity the common good the role and functions of law the meaning of justice and the relationship of morality and politics to religion and the life of faith The core of Finnis theory articulated in his seminal work *Natural Law and Natural Rights* has profoundly influenced later work in the philosophy of law and moral and political philosophy while his contributions to the ethical debates surrounding nuclear deterrence abortion euthanasia sexual morality and religious freedom have powerfully demonstrated the practical implications of his natural law theory This volume which gathers eminent moral legal and political philosophers and theologians to engage with John Finnis work offers the first sustained critical study of Finnis contribution across the range of

disciplines in which rational and morally upright choosing is a central concern It includes a substantial response from Finnis himself in which he comments on each of their 27 essays and defends and develops his ideas and arguments *On Moral Medicine* M. Therese Lysaught, Joseph Kotva, Stephen E. Lammers, 2012-07-20 In print for more than two decades *On Moral Medicine* remains the definitive anthology for Christian theological reflection on medical ethics This third edition updates and expands the earlier awardwinning volumes providing classrooms and individuals alike with one of the finest available resources for ethics engaged modern medicine *Ethics in Public and Community Health* Peter Bradley, Peter M Bradley, Amanda Burls, 2012-10-02 The purpose of public and community health is to improve the health of populations or groups rather than concentrating on individuals This book examines the ethical issues associated with public and community health The contributors analyse the major ethical issues in public health prioritisation public participation health promotion and screening all of which reflect current practice in the UK They examine what health services should be available who should have access to which health services what are the best strategies for preventing disease how can professional and public views be reconciled and when can an individual's health needs override the choice of a community The contributors apply up to date ethical theory to practical examples in public health practice to provide a comprehensive and accessible introduction to the key issues in public health ethics *Rationing and Resource Allocation in Healthcare* Ezekiel J. Emanuel, 2018 Budgets of governments and private insurances are limited Not all drugs and services that appear beneficial to patients or physicians can be covered Is there a core set of benefits that everyone should be entitled to If so how should this set be determined Are fair decisions just impossible if we know from the outset that not all needs can be met While early work in bioethics has focused on clinical issues and a narrow set of principles in recent years there has been a marked shift towards addressing broader population level issues requiring consideration of more demanding theories in philosophy political science and economics At the heart of bioethics new orientation is the goal of clarity on a complex set of questions in rationing and resource allocation *Rationing and Resource Allocation in Healthcare Essential Readings* provides key excerpts from seminal and pertinent texts and case studies about these topics contextualized by original introductions The volume is divided into three broad sections Conceptual Distinctions and Ethical Theory Rationing and Resource Allocation Containing the most important and classic articles surrounding the theoretical and practical issues related to rationing and how to allocate scarce medical resources this collection aims to assist and inform those who wish to be a part of bioethics 21st century shift including practitioners and policy makers and students and scholars in the health sciences philosophy law and medical ethics [Healthcare as a Universal Human Right](#) Rui Nunes, 2022-02-07 This important book outlines how despite varying levels of global socio economic development governments around the world can guarantee their citizens fundamental right to basic healthcare Grounded in the philosophical position that healthcare is an essential element to human dignity the book moves beyond this theoretical principle to offer policy makers a basis for health policies based on public accountability

and social responsiveness Also emphasizing the importance of global co operation particularly in the area of health promotion and communication it addresses too the issue of financial sustainability suggesting robust mechanisms of economic and social regulation New opportunities created by e health evidence based data and artificial intelligence are all highlighted and discussed as is the issue of patient rights Students and researchers across bioethics public health and medical sociology will find this book fascinating reading as will policy makers in the field **Bioethical education : organ**
