Subcommittee on Public Health,1999 *Vibrant and Healthy Kids* National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Committee on Applying Neurobiological and Socio-Behavioral Sciences from Prenatal Through Early Childhood Development: A Health Equity Approach,2019-11-27 Children are the foundation of the United States and supporting them is a key component of building a successful future However millions of children face health inequities that compromise their development well being and long term outcomes despite substantial scientific evidence about how those adversities contribute to poor health Advancements in neurobiological and socio behavioral science show that critical biological systems develop in the prenatal through early

childhood periods and neurobiological development is extremely responsive to environmental influences during these stages. Consequently, social, economic, cultural, and environmental factors significantly affect a child's health ecosystem and ability to thrive throughout adulthood. *Vibrant and Healthy Kids: Aligning Science, Practice, and Policy to Advance Health Equity* builds upon and updates research from *Communities in Action: Pathways to Health Equity 2017* and *From Neurons to Neighborhoods: The Science of Early Childhood Development 2000*. This report provides a brief overview of stressors that affect childhood development and health, a framework for applying current brain and development science to the real world, a roadmap for implementing tailored interventions and recommendations about improving systems to better align with our understanding of the significant impact of health equity.

Kids David L. Kirp, 2011-03. It may take a village to raise a child, but most American families are struggling with diminishing social support to do the job on their own. While parents work longer hours for less, and the costs of childcare, healthcare, and college skyrocket, the share of the U.S. budget spent on kids has fallen 22 percent since 1960. More and more children may well not make it to a healthy, productive adulthood. That's terrible for them and for us as well. It doesn't have to be this way. In this book, renowned expert David L. Kirp clarifies the importance of investing wisely in children. He outlines a visionary Kids First policy agenda that's guided by a golden rule principle: Every child deserves what's good enough for a child you love. And he offers lively and inspiring on-the-ground accounts of five big cradle-to-college initiatives that can change the arc of all children's lives: strong support for parents; high-quality early education linking schools and communities to improve what both offer children; giving all youngsters access to a caring and stable adult mentor; and providing kids a nest egg to help pay for college or kick-start a career.
