Therapy with Older Clients: Key Strategies for Success Marc Agronin, 2010-07-19 Basic strategies and tips for doing effective therapy with elderly clients What is it like to be 106 years old What are the mental health needs of someone this old and for that matter all elderly Can we as clinicians and caregivers ever really understand old age and provide for their needs adequately How can we prevent the physical problems they face from overwhelming the patience and care that we give What are the most effective therapeutic tools that underlie all successful therapy work with older clients Caring for the elderly is complex challenging work Often they are wrestling with a unique set of medical psychiatric and social challenges all set against the backdrop of their approaching mortality The therapist's job is to successfully navigate these challenges without dwelling on the inevitability of physical decline and to provide the most compassionate valuable treatment possible It is with this guiding principle in mind that Marc Agronin a dedicated geriatric clinician with years of on the ground experience offers a sensitively written and eminently practical guide that addresses the therapeutic challenges and uncovers the top strategies for compassionate and effective work with the elderly

Therapy with older clients Agronin argues requires a sensitivity to the tension between the body's physical decline and its simultaneous capacity for mental growth and maturation Therapists must learn to handle these seemingly opposing forces with varying client types and in different settings and reconcile their own fears of aging disability and death At times this therapeutic relationship can be difficult medications are often not as effective as they are in younger clients and the elderly often view change at such a late stage of life as pointless However Agronin encourages therapists to work with creativity and passion persisting in their efforts by retooling their approaches shoring up patience and remembering that the very presence of a caring listener can bring a spectacular transformation to even the most debilitated individuals An understanding of aging alone does not make an effective therapist and Agronin offers key strategies illustrated through real

life case examples for dealing with countertransference performing age guided evaluation working with caregivers and handling end of life issues He explains the impact of aging on the major psychiatric disorders providing direction on how to cultivate empathy and understanding for a range of age specific challenges Agronin offers a compassionate insightful narrative that explores the nuances of successful rapport building and problem solving that can enrich the lives of the elderly In doing so he gives readers a better understanding of what it means to grow old and how cultivating a respectful productive relationship one that is inspired with curiosity and energized with creativity can bring joy and affirmation to older clients

Accessibility Denied. Understanding Inaccessibility and Everyday Resistance to Inclusion for Persons with Disabilities Hanna Egard,Kristofer Hansson,David Wästerfors,2021-11-09 This book explores the societal resistance to accessibility for persons with disabilities and tries to set an example of how to study exclusion in a time when numerous policies promise inclusion With 12 chapters organised in three parts the book takes a comprehensive approach to accessibility covering transport and communication knowledge and education law and organisation Topics within a wide cross disciplinary field are covered including disability studies social work sociology ethnology social anthropology and history The main example is Sweden with its implementation of the United Nations Convention on the Rights of Persons with Disabilities within the context of the Nordic welfare state By identifying and discussing persistent social and cultural conditions as well as recurring situations and interactions that nurture resistance to advancing accessibility despite various strong laws promoting it the book s conclusions are widely transferable It argues for the value of alternating between methods theoretical perspectives and datasets to explore how new arenas resources and technologies cause new accessibility concerns and possibilities for persons living with impairments We need to be able to follow actors closely to uncover how they feel act and argue but also to connect to wider discursive and institutional patterns and systems This book will be of interest to scholars and students of disability studies social work sociology ethnology social anthropology political science and organisation studies
