Lineages of the Feminine Emmanuel Todd, 2023-06-06 We are experiencing an anthropological revolution We see it in the

MeToo movement in the denunciation of femicide and in an increasingly vociferous critique of patriarchal domination Why this sudden rise of an antagonistic conception of the relationship between men and women at the very moment when progress is accelerating and when the goals of first and second wave feminism seem on the verge of being achieved In this book the anthropologist and historian Emmanuel Todd while not underestimating the importance of crucial inequalities that remain argues that the emancipation of women has essentially already taken place but that it has given rise to new tensions and contradictions As women gain more freedom they also gain access to traditional male social pathologies economic anxiety the disorientation of anomie and individual and class resentment But because they remain women with the ability to bear children their burden as human beings although richer is now more difficult to bear than that of men In order to understand our current condition Todd retraces the evolution of the male female relationship through the long history of the human species from the emergence of Homo sapiens a hundred thousand years ago to the present He also conducts a broad empirical study of the convergence between men and women today and of the differences that still separate them in education in employment and in relation to longevity suicide and homicide electoral behaviour and racism He explores the relations between women s liberation and other changes in contemporary societies such as the collapse of religion the decline of industry the decline of homophobia the rise of bisexuality and the transgender phenomenon and the decline in a sense of the collective life And he shows how and why Western countries and especially the Anglo American world Scandinavia and France are in their new feminist revolution perhaps less universal than they think

a handful of American plays in the latter part of the 20th century the works of Tony Kushner Suzan Lori Parks and John Cameron Mitchell among others use rhetoric in order to perform and challenge marginalizing language about groups who are not offered center stage in public and political spheres This innovative study initiates a conversation long overdue between scholars in rhetorical and performance studies as such it will be essential reading for academic researchers and graduate students in the areas of rhetorical studies performance studies theatre studies and critical discourse analysis

intrepid reformer struggled to come to terms with the fact that it was Christian men who were guilty of committing acts of appalling cruelty against women. Ultimately Bushnell concluded that Christianity itself or rather the patriarchal distortion of true Christianity must be to blame. A work of history biography and historical theology Kristin Kobes DuMez's book provides a vivid account of Bushnell's life. It maps a concise introduction to her fascinating theology revealing for example Bushnell's belief that gender bias tainted both the King James and the Revised Versions of the English Bible. As Du Mez demonstrates Bushnell insisted that God created women to be strong and independent that Adam not Eve bore responsibility for the Fall and that it was through Christ the great emancipator of women that women would achieve spiritual and social redemption. A New Gospel for Women restores Bushnell to her rightful place in history. It illuminates the dynamic and often thorny relationship between faith and feminism in modern America by mapping Bushnell's story and her subsequent disappearance from the historical record. Most pointedly the book reveals the challenges confronting Christian feminists today who wish to construct a sexual ethic that is both Christian and feminist one rooted not in the Victorian era but rather one suited to the modern world.

Seeds of Change Priscilla Leder, 2010-09-01

Barbara Kingsolver's books have sold millions of copies. The Poisonwood Bible was nominated for the Pulitzer Prize and her work is studied in courses ranging from English as a second language classes to seminars in doctoral programs. Yet until now there has been relatively little scholarly analysis of her writings. Seeds of Change: Critical Essays on Barbara Kingsolver edited by Priscilla V. Leder is the first collection of essays examining the full range of Kingsolver's literary output. The articles in this new volume provide analysis, context, and commentary on all of Kingsolver's novels, her poetry, her two essay collections, and her full-length nonfiction memoir Animal Vegetable Miracle: A Year of Food Life. Professor Leder begins Seeds of Change with a brief critical biography that traces Kingsolver's development as a writer. Leder also includes an overview of the scholarship on Kingsolver's oeuvre. Organized by subject matter, the 14 essays in the book are divided into three sections that deal with recurrent themes in Kingsolver's compositions: identity, social justice, and ecology. The pieces in this ground-breaking volume draw upon contemporary critical approaches: ecocritical, postcolonial, feminist, and disability studies to extend established lines of inquiry into Kingsolver's writing and to take them in new directions. By comparing Kingsolver with earlier writers such as Joseph Conrad and Henry David Thoreau, the contributors place her canon in literary context and locate her in cultural contexts by revealing how she reworks traditional narratives such as the Western myth. They also address the more controversial aspects of her writings, examining her political advocacy and her relationship to her reader in addition to exploring her vision of a more just and harmonious world. Fully indexed with a comprehensive works-cited section, Seeds of Change gives scholars and students important insight and analysis which will deepen and broaden their understanding and experience of Barbara Kingsolver's work.
