Health Impacts of Polynuclear Aromatic Hydrocarbons A. W. Pucknat, 1981 *Polycyclic Aromatic Hydrocarbon Hazards to Fish, Wildlife, and Invertebrates* Ronald Eisler, U.S. Fish and Wildlife Service, 1987 *The Carcinogenic Effects Of Polycyclic Aromatic Hydrocarbons* Andreas Luch, 2005-08-22 This book provides an overview on the molecular mode of action of carcinogenic polycyclic aromatic hydrocarbons PAHs PAHs are by products arising from incomplete combustion of organic matter that are frequently released into our environment and thus are ubiquitously detectable Many PAHs are strong carcinogens in rodent bioassays and have been linked to increased incidences of various types of cancer in humans The present book covers all aspects of PAH induced carcinogenesis it is a collection of articles written by some of the most recognizable PAH researchers reviewing the present knowledge in this field The topics include exposure to and biomonitoring of PAHs in the human population metabolic activation of PAHs genotoxicity and repair of PAH induced DNA damage and factors modulating individual susceptibility to the deleterious effects of PAHs *Polycyclic Aromatic Hydrocarbons* Huizhong Shen, 2016-03-26 This thesis presents a comprehensive analysis of the global health impacts of polycyclic aromatic hydrocarbons PAHs in ambient air conducted on the basis of a high resolution emission inventory global chemical transport modeling and probabilistic risk assessment One of the main strengths of the thesis is the concentration downscaling process which provides a linkage between emissions and exposure concentrations at a comparatively high resolution Moreover by focusing on individual susceptibility the thesis proposes an instrumental revision of current risk assessment methodology and argues that if individual susceptibility were not taken into consideration the overall risk would be underestimated by 55% and the proportion of highly vulnerable populations would be underestimated by more than 90%

**Polycyclic Aromatic Hydrocarbons**, 1983-01-01 **Organic Chemicals in Natural Waters** J.W. Moore, S. Ramamoorthy, 2012-12-06 This series is dedicated to serving the growing community of scholars and practitioners concerned with the principles and applications of environmental management Each volume is a thorough treatment of a specific topic of importance for proper management practices A fundamental objective of these books is to help the reader discern and implement man's stewardship of our environment and the world's renewable resources For we must strive to understand the relationship between man and nature act to bring harmony to it and nurture an environment that is both stable and productive These objectives have often eluded us because the pursuit of other individual and societal goals has diverted us from a course of living in balance with the environment At times therefore the environmental manager may have to exert restrictive control which is usually best applied to man not nature Attempts to alter or harness nature have often failed or backfired as exemplified by the results of imprudent use of herbicides fertilizers water and other agents Each book in this series will shed light on the fundamental and applied aspects of environmental management It is hoped that each will help solve a practical and serious environmental problem Polycyclic Aromatic Hydrocarbons Kazuichi Hayakawa, 2018-02-05

This book reviews Polycyclic Aromatic Hydrocarbons PAHs and Nitropolycyclic Aromatic Hydrocarbons NPAHs contamination in the context of environmental pollution in Asia It is comprised of the following sections 1 Fundamental Chemistry and General Characteristics 2 Analytical Methods 3 Emission Source and Atmospheric Behavior 4 Atmospheric Polycyclic Aromatic Hydrocarbons and PM2.5 5 Polycyclic Aromatic Hydrocarbons in Marine Environments 6 Metabolic Activation Toxicities and 7 Environmental Standards and Guidelines This volume concentrates on the Far East due to the massive consumption of coal and petroleum in China which has led to considerable levels of air pollution High concentration of atmospheric PM2.5 in Beijing have been reported since January 2013 and exposure to such high concentrations may cause respiratory cardiac and lung diseases Gathering contributions from international experts this volume provides a valuable reference guide for global researchers and students interested in learning from the East Asian experience The American Energy Initiative United States. hydrocarbons were measured for a variety of residential solid fuels including coal crop straw wood and biomass pellets in rural China The study provided a large number of emission factors that can be further used in emission estimation Composition profiles and isomer ratios were investigated and compared so as to be used in source apportionment In addition the present study identified and quantified the influence of factors like fuel moisture volatile matter on emission performance The publication of the study will be of interest and helpful to the readers in the field of air pollution human health fuel saving and energy consumption etc Guofeng Shen works at the Institute of Atmospheric Sciences Jiangsu Academy of Environmental Sciences China
