Health Healing And Religion A Cross Cultural Perspective

Miguel A. Pérez, Raffy R. Luquis

Health Healing And Religion A Cross Cultural Perspective:

Health, Healing, and Religion David R. Kinsley, 1996 Explicitly dealing with the religious aspects of healing and healers this unique and intriguing book examines illness healing and religion in cross cultural perspective by looking at how sickness is understood and treated in a wide variety of cultures Centered around three principle themes the text A illustrates how crucial it is to frame illness in a meaningful context in every culture and how this process is almost always bound up with religious spiritual and moral concerns B shows how many beliefs strategies and practices that characterize traditional cultures also appear in Christianity putting healing in the Christian tradition in a broad rational context and C discusses the continuities between traditional explicitly religious and modern medical cultures demonstrating that many features of modern scientific medicine are symbolic and ritualistic and that many aspects and practices of modern medicine are similar to healing as seen in traditional pre scientific medical cultures For those in the religious anthropological and medical professions

Health, Healing, and Religion Bernie Zilbergeld, 2015 *Religion as a Social Determinant of Public Health* Ellen L. Idler, 2014 Frequently in partnership but sometimes at odds religious institutions and public health institutions work to improve the well being of their communities There is increasing awareness among public health professionals and the general public that the social conditions of poverty lack of education income inequality poor working conditions and experiences of discrimination play a dominant role in determining health status But this broad view of the social determinants of health has largely ignored the role of religious practices and institutions in shaping the life conditions of billions around the globe In *Religion as a Social Determinant of Public Health* leading scholars in the social sciences public health and religion address this omission by examining the embodied sacred practices of the world s religions the history of alignment and tension between religious and public health institutions the research on the health impact of religious practice throughout the life course and the role of religious institutions in health and development efforts around the globe In addition the volume explores religion s role in the ongoing epidemics of HIV AIDS and Alzheimer s disease as well as preparations for an influenza pandemic Together these groundbreaking essays help complete the picture of the social determinants of health by including religion which has until now been an invisible determinant

The Encyclopedic Sourcebook of New Age Religions James R. Lewis, 2004-08-30 In the late 1980s the New Age movement became the focus of both media attention and widespread ridicule as some of the more outlandish aspects of the movement such as channeling and the use of crystals for healing briefly piqued the public s curiosity While the movement was at its height scholars of religion generally sneered at what was perceived to be a daffy shallow craze and ignored it as a subject of serious study Professor James R Lewis was among the first to examine this growing religious phenomenon scientifically In previous books he has investigated the New Age as the most visible manifestation of a significant spiritual subculture the roots of which reach back to Theosophy Spiritualism and New Thought The present collection pursues this theme bringing together some of the best recent

scholarship on new religions Since the height of its popular influence the New Age has declined in strength but has given rise to a plethora of new denominations all shaped by New Age ideas and spirituality Reflecting the emergence of this new denominational structure the core chapters of this book focus on specific groups Other chapters examine the movement s historical roots A unique feature of Dr Lewis s work is his inclusion of extensive selections from New Age literature thus allowing readers to experience firsthand the unusual perspectives of the various groups This is a fascinating examination of a significant and persistent religious and social phenomenon *Religion and the Health of the Public* G. Gunderson,J.

Cochrane,2012-02-14 The book proposes a critical theory of the role and place of religion in public health and argues for a programmatic reorientation of these two fields of practice and inquiry to more effectively align religious health assets widely present in many contexts and public health services and facilities **Drinking from the Same Well** Lydia F.

Johnson,2011-05-09 Drinking from the Same Well is designed for those who seek a praxis oriented theological grounding in the exploration of cross cultural perspectives in the field of pastoral care and counseling It traverses the broad terrain of cultural analysis and also explores in depth a number of discrete cross cultural issues in pastoral counseling related to communication conflict empathy family dynamics suffering and healing Cultural analysis and theological reflection are situated alongside numerous case studies of persons and situations that en flesh the concepts being discussed and readers are invited to engage personally with the material through a variety of focus questions and reflective exercises This book can serve as a helpful textbook for seminarians and a useful guide for pastors and priests church study groups multicultural parishes and anyone engaged in helping ministries with persons from other cultures The goal is to develop culturally competent pastoral caregivers by providing a comprehensive and practical overview of the generative themes and challenges in cross cultural pastoral care Cultural Competence in Health Education and Health Promotion Miguel A. Pérez,Raffy R.

Luquis,2008-09-09 Cultural Competence in Health Education and Health Promotion examines the importance of ethnic and cultural factors for community health practice The first in a new series of book to be published by Jossey Bass and the American Association for Health Education this text describes essential theories models and practices for working with race ethnicity gender and social issues The volume editors and their contributors all experts in this field cover demographics disparities complementary and alternative medicine spiritually grounded approaches multicultural populations culturally competent needs assessment and planning communication workforce program planning aging sexual orientation and future challenges Useful for both undergraduate and graduate students in the field of health education and health promotion school health public health preventive medicine nursing and allied health fields the publication is essential reading for those learning or practicing health education and health promotion Principles of Multicultural Counseling and Therapy Uwe P. Gielen,Juris G. Draguns,Jefferson M. Fish,2008-06-19 In an era of globalization characterized by widespread migration and cultural contacts psychologists counselors and other mental health professionals face a unique challenge how does one

practice successfully when working with clients from so many different backgrounds Gielen Draguns and Fish argue that an understanding of the general principles of multicultural counseling is of great importance to all practitioners The lack of this knowledge can have several negative consequences during therapy including differences in expectations between counselor and client misdiagnosis of the client's concerns missed non verbal cues and the client feeling that she has been misunderstood This volume focuses on the general nature of cultural influences in counseling rather than on counseling specific ethnic groups Counseling practices from all over the world not just those of Western society are explored Bringing together the work of a diverse group of international experts the editors have compiled a volume that is not only concise and teachable but also an essential guidebook for all mental health professionals Teaching African American Religions Carolyn M. Jones Medine, 2005 The variety and complexity of its traditions make African American religion a difficult topic to teach at undergraduate level The essays in this volume offer practical innovative ways to teach this subject in a variety of settings The Sacred in Exile Gillian McCann, Gitte Bechsgaard, 2017-09-08 This book addresses the fact that for the first time in history a large segment of the population in the western world is living without any form of religious belief While a number of writers have examined the implications of this shift none have approached the phenomenon from the perspective of religious studies The authors examine what has been lost from the point of view of sociology psychology and philosophy of religion The book sits at the nexus of a number of important debates including the role of religion in public life the connection between religion and physical and psychological well being and the implications of the loss of ritual in terms of maintaining communities *Disability and Christian Theology Embodied Limits and Constructive Possibilities* Deborah Beth Creamer, 2009-01-05 Attention to embodiment and the religious significance of bodies is one of the most significant shifts in contemporary theology In the midst of this however experiences of disability have received little attention This book explores possibilities for theological engagement with disability focusing on three primary alternatives challenging existing theological models to engage with the disabled body considering possibilities for a disability liberation theology and exploring new theological options based on an understanding of the unsurprisingness of human limits The overarching perspective of this book is that limits are an unavoidable aspect of being human a fact we often seem to forget or deny Yet not only do all humans experience limits most of us also experience limits that take the form of disability at some point in our lives in this way disability is more normal than non disability If we take such experiences seriously and refuse to reduce them to mere instances of suffering we discover insights that are lost when we take a perfect or generic body as our starting point for theological reflections While possible applications of this insight are vast this work focuses on two areas of particular interest theological anthropology and metaphors for God This project challenges theology to consider the undeniable diversity of human embodiment It also enriches previous disability work by providing an alternative to the dominant medical and minority models both of which fail to acknowledge the full diversity of disability experiences Most notably this project offers

new images and possibilities for theological construction that attend appropriately and creatively to diversity in human embodiment
