Health Systems and the Challenge of Communicable Diseases: Experiences from Europe and Latin America Richard Coker, Rifat Atun, Martin McKee, 2008-05-16 This is an excellent book well written and well documented. The editors have succeeded to bring together a large number of knowledgeable authors to cover comprehensively the vast area public health actors dealing with infectious diseases both at central and local level whether in research teaching or practice as well as professionals working in diagnostic and therapeutic health services notably in microbiology and infectious diseases could greatly benefit from reading the book. Politicians and lay administrators with responsibility in the field would be well advised to do the same. European Journal of Public Health. Health systems everywhere face constant change as they seek to respond to evolving patterns of disease. This is especially true with communicable diseases where humanity is engaged in a constant evolutionary struggle with micro organisms that are able to adapt rapidly to a changing world. This problem can be for example exemplified recently by the growth of antibiotic resistant infection. This fascinating book confronts this challenge looking at two regions where the pace of change is especially rapid. Europe and Latin America places where health systems many themselves undergoing rapid organisational transition must find ways of adapting to an ever changing context. The book begins with an historical overview recalling how humans and micro organisms have always competed at times with profound historical consequences before examining the current status of this evolutionary struggle. It assesses the extent to which human societies and their governments are prepared for the challenges ahead and reviews the experiences of countries in Europe and Latin America in developing effective responses. *Health Systems and the Challenge of Communicable Diseases* will be of interest to those engaged in the development of health policy in high and middle income countries and to those who are studying the creation and implementation of health policy.

Health Planning Kathy Eagar, 2020-08-12 This book is destined to become a classic in its field. Sidney Sax, Chairman Ethics Committee Australian Institute of Health and Welfare, former Director of Health Services Planning and Research NSW. The whys and hows are clearly and carefully explained for everyone involved in planning health services of all sizes in today's demanding climate. No health planner should go to work without this book. Tony Adams, Professor of Public Health National Centre for Epidemiology and Population Health Australian National University. Increasing concern about a positive return on investment in health leads to a need to make choices. As a result skills in planning are increasingly being required of managers providers and policy makers in health care. Experienced planners and teachers Kathy Eagar, Pamela Garrett and Vivian Lin have written a comprehensive introduction that bridges the theory and practice of health planning.

They outline the health policy and planning context the impact of different resource allocation environments on planning and explain the processes and the technical skills needed to undertake service program corporate business and facility planning The authors also explore major challenges facing health planners including the growing role of market forces in health care the need to balance equity of access with equity of outcomes and the tension between planning for population health versus planning for more efficient health care delivery Illustrated with extensive case studies from both the public and private sectors Health Planning is an indispensable reference for health professionals and a valuable text for students *World Report on Knowledge for Better Health* World Health Organization, 2004-09-02 This book reviews the current state of health research and concludes that more investment is needed research need to be managed more effectively to help strengthen health systems and build public confidence in science stronger emphasis should be placed on translating knowledge into action There are five sections learning to improve health gives an overview and some historical perspective towards a scientific basis for health systems strengthening health research systems linking research to action and recommendations and an action plan **Innovations in Health Care Financing** George Schieber, 1997-01-01 Spanish edition World Bank Technical Paper No 345S This report examines specific policies for achieving sustainable development of the mining industry in the countries of Latin America and the Caribbean The report highlights the importance of the mining sector to national economies of the region and discusses World Bank assistance in formulating policy Also available in English ISBN 0 8213 3816 1 Stock no 13816 **In Search of Better Governance in South Asia and Beyond** Ishtiaq Jamil, Steinar Askvik, Tek Nath Dhakal, 2013-06-26 The pursuit for better governance has assumed center stage in developmental discourse as well as reform initiatives of all organizations working for the public welfare and includes such issues as service delivery and responding to citizens needs and demands In the era of globalization multilevel and new modes of governance are changing the traditional governance models of nation states accelerated by technological innovation rising citizen expectation policy intervention from international and multilateral donor communities and the hegemony of western ideology imposed on many developing nations However a universally accepted and agreed upon definition of governance still remains elusive There is no consensus or agreement as to what would be the nature and form of governance and public administration The question that is raised Is there a universal governance mechanism that fits in all contexts or governance mechanisms should be based on home grown ideas One can see various programs and policies of reforms and reorganizations in public administration in the developing countries but these efforts have not been effective to address the challenging issues of economic development employment generation poverty reduction ensuring equality of access to public services maintaining fairness and equity security and safety of citizens social cohesion democratic institution building ensuring broader participation in the decision making process and improving the quality of life Therefore there is a widespread concern for better governance or sound governance to bridge the gap between theory and practice making this book of interest to academics as well as policy makers
