Engineering Ioan Sarbu,2021-01-04 This book provides a comprehensive systematic overview of original theoretical experimental and numerical studies in the building services engineering domain It brings together different strands of the topic guided by the two key features of energy savings and reduction of the pollutant emissions Technical economic and energy efficiency aspects related to the design modelling optimisation and operation of diverse building services systems are explored This book includes various theoretical studies numerical and optimisation models experiments and applications in this field giving an emphasis to indoor environment quality assurance energy analysis modelling and optimisation of heating systems improving the energy performance of refrigeration and air conditioning systems valorising the solar and geothermal energies analysis of thermal energy storage technologies hydraulic simulation and optimisation of water distribution systems and improving the energy efficiency of water pumping With 11 pedagogically structured chapters containing numerous illustrations tables and examples this book provides researchers lecturers engineers and graduate students with a thorough guide to building service engineering Buildings Energy Conservation ,1985 Modules, Systems, and Applications in Thermoelectrics David Michael Rowe,2012-04-25 Comprising two volumes Thermoelectrics and Its Energy Harvesting reviews the dramatic improvements in technology and application of thermoelectric energy with a specific intention to reduce and reuse waste heat and improve novel techniques for the efficient acquisition and use of energy This volume Modules Systems and Applications in Thermoelectrics discusses the practical novel and truly groundbreaking applications of thermoelectrics in a range of markets The book details the U S interest in alternative energy and energy harvesting specifically the current efforts to use thermoelectric generators TGs to reduce emissions Internationally it expounds on the strong interest in Japan Korea and Europe to incorporate TGs in cars to reduce fuel consumption and meet EU carbon dioxide emission targets the European plans to build an isotopic powered thermoelectric generator and India s use of TG s in converting hot water from steel mills into electricity Energy Abstracts for Policy Analysis ,1982 **Journal** ,1929 Includes annual report of its council 1941 48 in pt 1 Proceedings of the Institution of Electrical Engineers Institution of Electrical Engineers,1929 Vols for 1970 79 include an annual special issue called IEE reviews *Glacial Sedimentary Processes and Products* Michael J. Hambrey,Poul Christoffersen,Neil F. Glasser,Bryn Hubbard,2009-03-05 Associating ice masses with the transport and deposition of sediments has long formed a central theme in glaciology and glacial geomorphology The reason for this focus is clear in that ice masses are responsible for much of the physical landscape

which characterizes the Earth's glaciated regions. This association also holds at a variety of scales for example from the grain size characteristics of small scale moraines to the structural architecture of large scale glacigenic sedimentary sequences in both surface and subaqueous environments. This volume brings numerous state of the art research contributions together each relating to a different physical setting, spatial scale, process or investigative technique. The result is a diverse and interesting collection of papers by glaciologists, numerical modellers and glacial geologists which are all linked by the theme of investigating the relationships between the behaviour of ice masses and their resulting sedimentary sequences.
