Heat Release in Fires Vytenis Babrauskas, S. J. Grayson, 1990-12 Heat Release in Fires Vytenis Babrauskas, S. J. Grayson, 1992 The development of heat release rate study as an aspect of fire protection engineering was a major breakthrough of the 1980s This book provides a synthesis for both professionals and students by authorities from throughout the world **Heat Release in Fires** Vytenis Babrauskas, S. J. Grayson, 1995 *Heat Release Rate Measurements in Tunnel Fires* Haukur Ingason, Sören Gustavsson, Martin Dahlberg, Swedish National Testing and Research Institute, 1994 This report describes measurements of heat release rates in tunnel fires by using the oxygen consumption technique This technique is commonly used in fire laboratories to measure heat release rates up to 10 MW Measured heat release rates from fire tests with vehicles a train a bus a subway coach and a simulated truck load and wood cribs are presented The total heat release rate was determined by measuring oxygen concentrations and mass flow rates over the tunnel cross section at both sides of the fire The convective fraction of the heat release rate was determined by measuring the temperature and the mass flow rate The technique is found to work reasonably well for tunnel fires However the measured convective fraction of the heat release rate need to be corrected for heat losses from the hot ceiling jet to the cold walls The total heat release rate need to be corrected for high yields of carbon dioxide CO₂ in the exhaust gases and for vitiation of the inflowing air in the lower part of the cross section The study is a joint project between a number of European countries with a project name EUREKA EU 499 Firetun *SFPE Handbook of Fire Protection Engineering* Morgan J.
