Solutions to deliver net zero food systems therefore need to take climate impacts, adaptation and resilience into account in order to ensure they are appropriate in a changing climate and do not conflict with adaptation goals. In a similar way, adaptation options for the food system must consider potential trade off consequences and synergies with net zero and other objectives such as the Sustainable Development Goals. Solutions for net zero climate resilient food systems will therefore require systematic interdisciplinary approaches across academia, governments, business, NGOs and the public. **Yearbook of International Organizations**, 2011 Beginning in 1983, 84 published in 3 vols with expansion to 6 vols by 2007. 2008 vol 1: Organization descriptions and cross references; vol 2: Geographic volume; international organization participation; vol 3: Subject volume; vol 4: Bibliography and resources; vol 5: Statistics, visualizations and patterns; vol 6: Who's who in international organizations.
