## Glass In Modern Architecture Of The Bauhaus Period:

Glass in Modern Architecture of the Bauhaus Period Arthur Korn, 1968      *Glass in Modern Architecture* Arthur Korn, 1968      *Contemporary Curtain Wall Architecture* Scott Charles Murray, 2009-10-07 In *Contemporary Curtain Wall Architecture* building technology historian and architect Scott Murray traces the evolution of the curtain wall from early skeleton frame structures of the past to today's complex and technologically advanced configurations Presenting twenty four detailed case studies of exemplary structures completed in the last decade he reveals the curtain wall as one of the most enduring and malleable concepts of contemporary architecture capable of adapting intelligently to site constraints utilizing resources efficiently and offering unprecedented opportunities for innovations in digital design and fabrication material detailing and aesthetic expression Book Jacket      *Kafka's Architectures* Ayad B. Rahmani, 2015-01-02 Adopting Kafka as a lens to examine modern concepts in architecture this book pries open new interpretations in Kafka scholarship Each of eight chapters takes up an architectural element with which to explore meanings central to both literature and architecture Stairs function as vertical access but in Kafka's hands become an instrument of science testing the merit of natural selection Kafka's doors open and close less to allow passage than to reconcile one psychological interior with the next Notions of plumbing and hygiene begin to acquire new meaning The architecture of Mies van der Rohe begins to make more sense especially his tabula rasa approach to design signifying less a harsh disdain for site and more a response to a reality in which the ceremony of the stairs had died and was replaced by the pervasive flatness of the modern floor      **The Juggler of Notre Dame and the Medievalizing of Modernity.** Jan M. Ziolkowski, 2018-08-29 This ambitious and vivid study in six volumes explores the journey of a single electrifying story from its first incarnation in a medieval French poem through its prolific rebirth in the nineteenth and twentieth centuries *The Juggler of Notre Dame* tells how an entertainer abandons the world to join a monastery but is suspected of blasphemy after dancing his devotion before a statue of the Madonna in the crypt he is saved when the statue delighted by his skill miraculously comes to life Jan Ziolkowski tracks the poem from its medieval roots to its rediscovery in late nineteenth century Paris before its translation into English in Britain and the United States The visual influence of the tale on Gothic revivalism and vice versa in America is carefully documented with lavish and inventive illustrations and Ziolkowski concludes with an examination of the explosion of interest in *The Juggler of Notre Dame* in the twentieth century and its place in mass culture today Volume 3 *The American Middle Ages* hinges upon two figures influenced by the juggler Henry Adams scion of Presidents and distinguished cultural historian whose works contributed to the rise of medievalism in America during the Gilded Age and Ralph Adams Cram the architect whose vision of Gothic accounts directly or indirectly for the campuses of West Point Princeton Yale Chicago Notre Dame and many other universities across America *The Juggler of Notre Dame and the Medievalizing of Modernity* is a rich case study for the reception of the Middle Ages in modernity Spanning centuries and continents the medieval period is understood through the

lens of its post modern reception in Europe and America Profound connections between the verbal and the visual are illustrated by a rich trove of images including book illustrations stained glass postage stamps architecture and Christmas cards Presented with great clarity and simplicity Ziolkowski s work is accessible to the general reader while its many new discoveries will be valuable to academics in such fields and disciplines as medieval studies medievalism philology literary history art history folklore performance studies and reception studies

Irene Rice Pereira Karen A. Bearor, 2010-07-22 Artist Irene Rice Pereira was a significant figure in the New York art world of the 1930s and 1940s who shared an interest in Jungianism with the better known Abstract Expressionists and with various women artists and writers seeking archetypal imagery Yet her artistic philosophy and innovative imagery elude easy classification with her artistic contemporaries In consequence her work is rarely included in studies of the period and is almost unknown to the general public This first intellectual history of the artist and her work seeks to change that Karen A Bearor thoroughly re-creates the artistic and philosophical milieu that nourished Pereira's work She examines the options available to Pereira as a woman artist in the first half of the twentieth century and explores how she used those options to contribute to the development of modernism in the United States Bearor traces Pereira's interest in the ideas of major thinkers of the period among them Spengler Jung Einstein Cassirer and Dewey and shows how Pereira incorporated their ideas into her art And she demonstrates how Pereira's quest to understand something of the nature of

ultimate reality led her from an early utopianism to a later interest in spiritualism and the occult This lively intellectual history amplifies our knowledge of a time of creative ferment in American art and society It will appeal to a wide range of readers interested in the modernist period

**Great Windows in Modern Architecture** Kevin Adams, 2024-03-29 Windows are moments in modern architecture where we look to ascertain elegance technical expression and material language or to capture a certain atmosphere A window opening is as much an interval and an opportunity as it is a device for admitting light air or views it is simultaneously a physical aperture but also a philosophical opening of collaboration and reflection In order to understand the language of a building we might look to the detail of the window But what does this mean and why does modern architecture invest so much expression in the window This book explores how the act of detailing and situating windows in buildings is a key proponent in the language of architecture which both informs and works with the contingencies of design and construction It investigates 18 case studies in depth using painstakingly drawn details and vivid photographs in full colour to define what makes these windows great and how each window is situated within both its technical and philosophical context and as an overall development of modern architecture Case studies include the work of Walter Gropius Mies van der Rohe Pierre Chareau Frank Lloyd Wright Alvar Aalto Carlo Scarpa Le Corbusier Stirling and Gowan Raili and Reima Pietil Louis Kahn Peter Womersley Miralles Pin's Steven Holl Glen Murcutt and O'Donnell Tuomey

Here Comes the Sun Ken Worpole, 2000-12-01 Here Comes the Sun looks at how social reformers planners and architects in the early twentieth century tried to remake the city in the image of a sunlit ordered utopia While much has been written about architectural modernism Worpole concentrates less on buildings and more on the planning of the spaces in between the parks public squares open air museums promenades public pools and other public leisure facilities Life in the open was of particular concern to early urban planners and reformers with their dreams of release from the confines of overcrowded unsanitary slums Picturing youthful working class bodies made healthy by exercise and tanned by the sun they imagined an escape route from cities Worpole demonstrates how open air public spaces became sought after commissions for many early modernist architects in the early 1900s resulting in the transformation of the European cityscape a fascinating account of the political idealism that informed urban planning for the first two thirds of the twentieth century full of insights into how public space influences a sense of belonging and ownership The Guardian This is one of those books you stroke lovingly Open it and there is page after page of beautiful photographs this book combines history society politics environment and place in a well written and emotive text The strength of the book is the way it crosses these traditional boundaries and disciplines Town and Country Planning Drawing on architectural theories philosophy literature and even film

making Worpole's book is wide ranging and erudite and should be of interest to the layperson as well as to the urban planner. It is also elegantly written and complemented by a mixture of black and white and colour photographs to provide a visual emphasis to the points he raises. N16 Magazine
