Greve, W. Leydhecker, C.

Raitta,2012-12-06 The European Glaucoma Society was founded in the spring of 1978 at the initiative of Drs François Leydhecker and Greve. Representatives of most European countries met in Ghent and agreed to create a society that would promote the contacts and exchange of knowledge between European glaucomatologists. The European Glaucoma Society serves to stimulate glaucoma research and diffuse specific knowledge to general ophthalmologists. The European Glaucoma Society would like to cooperate closely with similar glaucoma organizations in other continents. The first symposium of the EGS was held in April 1980 in Brighton, England. No proceedings were published. The second symposium took place in May 1984 in Hyvinkää, Finland. A great number of participants enjoyed a well organized scientific programme of attractive quality. The local organization was in the able hands of Raitta and her colleagues Raivio and Lehto. The scientific programme was coordinated in Amsterdam where a great amount of work was done by Stella Ompi, secretary to the general secretary. The contents of the meeting have been summarized in this book. This second symposium of the EGS, which took place in an atmosphere of great enthusiasm and friendship, has shown great promise for the future of the European glaucoma.

Studies on Normal Pressure Glaucoma H. Caroline Geijssen,1991      **Pathogenesis and Risk Factors of Glaucoma** E.

Gramer,F. Grehn,2012-12-06 During a closed international glaucoma symposium in Friedrichsruhe, Germany, the most current scientific results on the pathogenesis and risk factors of glaucoma were discussed. The progress which has been made in glaucoma detection and treatment of new insights into the pathomechanisms of the glaucomas are summarized in this symposium volume in 25 contributions. This book, which includes topics such as compliance, medical therapy, wound healing, genetic risk factors, disk damage in relation to visual field loss, disk hemorrhages, intraocular pressure, low blood pressure, retinal ischemia, and treatment of causal factors in glaucoma, will appeal to ophthalmologists and particularly to glaucoma specialists.      **Ophthalmology E-Book** Myron Yanoff, Jay S. Greve, 2012-12-06 ERIK L GREVE The 3rd International Visual Field Symposium was held on the 4th till the 6th of May 1978 in Tokyo for the members and guests of the International Perimetric Society The Proceedings of this symposium follow the general lines of the programme with some minor alterations This symposium was a so called topic symposium where selected topics were introduced by experts in the field These topics were Neuro ophtha mo ogy 1 Funduscopy correlates of visual field defects 2 Visual field defects due to tumors of the sellar region Glaucoma 1 The earliest visual field defects in glaucoma 2 The reversibility of glaucomatous visual field defects Methodology 1 Automation 2 The relation between the position of a lesion in the fundus and in the visual field Apart from the introductory papers free papers were given on the topics non topic free papers and also some Much attention has been given to the discussion Most of the discussion remarks in this Proceedings are the original taped remarks of the discussion speakers We have choosen this form of presentation to take to the reader the atmosphere of the discussion and to preserve originality The chairman of the sessions have presented a summary or even better an interpretation of the trends in their topics This introduction gives a short overview of the main themes of the symposium

Fifth International Visual Field Symposium E.L. Greve, A. Heijl, 2012-12-06 The 5th International Visual Field Symposium of the International Perimetric Society was held on October 20-23 1982 in Sacramento California before the joint meeting of the International Congress of Ophthalmology and the American Academy of Ophthalmology A majority of the members of the International Perimetric Society took part in the meeting together with many guests The topics of the symposium were glaucoma correlation between the visual field and the optic disc the visual field in low tension glaucoma neuro ophthalmology and ergo perimetry Apart from this there were many papers on automated perimetry and general topics The papers concerning the correlation of optic disc and visual field dealt with several aspects peripapillary atrophy defects in the retinal nerve fiber layer fluorescein angiography and the characteristics of the glaucomatous excavation itself New and interesting findings were presented showing that the careful detailed observation of the disc and peripapillary area is rewarding The visual fields in low tension glaucoma were studied extensively by four groups Various approaches to the problem have led to some differences in results which were extensively discussed In the general glaucoma session the visual fatigue phenomenon was discussed extensively apparently conflicting

results were demonstrated regarding the stability of contrast threshold measurements during one and the same test session in glaucoma. The relationship between the visual field and the performance at the working place was considered in the session on ergo perimetry.

**Becker-Shaffer's Diagnosis and Therapy of the Glaucomas** Robert L. Stamper, Marc F. Lieberman, Michael V. Drake, Bernard Becker, 2009-01-01. Authored by three prominent specialists in the field, this text provides comprehensive coverage of diagnostic and treatment modalities for optimal glaucoma management. Revised throughout, this new edition presents the latest guidance in clinical examination, randomized trials, medical treatment, laser therapy, and surgical procedures. Hundreds of illustrations, with many classic black and white figures from the previous editions supplemented with new color images, depict the features of glaucomas and step-by-step procedures for their management. While expanded use of highlighted boxes, lists, and summary tables make the material easy to access, evidence-based and updated information on all aspects of the glaucomas, including physiology, genetics, interventional trials, and new surgical techniques, offer a well-rounded foundation of knowledge for making the most informed diagnoses and choosing the most effective course of treatment. Combines the cumulative experience of three prominent glaucoma specialists addressing a full range of clinical needs for practitioners of all levels for a uniquely written, coherent perspective. Includes extensive references to current and historically important sources to provide comprehensive interpretation of the latest medical literature. Synthesizes a classical approach to the glaucomas based on seven earlier editions spanning over 40 years with the most up-to-date evidence-based and epidemiologically derived classifications and outcomes. Coherently correlates with authoritative consensus documents on key areas of glaucoma drawn up by the world-wide specialists of the World Glaucoma Association and reprinted in the text. Revamps traditional teachings on the angle closure glaucomas in concert with the newest international literature and technologies to keep you up to date on the latest advances. Illustrates detailed surgical interventions applicable to the complete spectrum of clinical settings from the developing world through contemporary operating rooms. Examines the newest and most promising developments in pharmacology, laser, and surgical advances for glaucoma management to enable you to choose the most effective patient approach. Illustrates invaluable but little-known instruments for clinical and research diagnoses, including optic nerve cupping scales, bleb assessment instruments, and more.

**Basic and Clinical Perspectives in Vision Research** Jon G. Robbins, M.B. Djamgoz, Anthony Taylor, 2013-06-29. I have been asked to write a brief foreword to this volume honoring Hisako Ikeda, providing a review of the accomplishments in our field over the past four decades when Hisako was an active participant. This I am delighted to do. It has been a most exciting time in vision research, and Hisako has been right in the middle of much of the excitement, publishing on a wide variety of topics and providing much new data and many new insights. Hisako's research career can be divided by decades into four quite distinct areas of inquiry. In the 1950s, as a student in Japan, her research interests were psychophysical in nature, and she was concerned with visual illusions, figural aftereffects, and motion detection. In the 1960s, after her move to London, she

began electrophysiological studies Much of her work in the 1960s was concerned with the electroretinogram ERG its components and the use of this electrical response for evaluating spectral sensitivities of the eye and retinal degenerations This work represented the beginning of her electrodiagnostic clinical work which continued until her retirement

**Ophthalmology** Myron Yanoff, Jay S. Duker, 2009-01-01 Based on feedback the authors have streamlined their bestselling reference to zero in on just the clinical answers ophthalmologists need in day to day practice This new edition presents unparalleled guidance on nearly every ophthalmic condition and procedure *Vision* David T. W. Yew, Kwok Fai So, D. S. C. Tsang, 1988 This volume consists of invited papers from scientists of Chinese origin in the visual field from around the world The papers cover all basic and applied aspects of the vertebrate and invertebrate visual systems from photoreceptors to cortical neurons presenting both review and new findings on the subjects It is hoped that this book will serve as a guide to international research linkage between groups
