## **Global Capital Supply And Demand Is There Enough To Go Around:**

**Global Capital Supply and Demand** Zia Qureshi, 1996-01-01 Annotation This report examines the possibility that global demand for capital will tend to outstrip supply thus putting upward pressure on global real interest rates The paper discusses the demand for foreign capital in developing countries the effect of this demand on savings in industrial countries and net capital flows from industrial to developing countries The analysis of trends over the next 10 to 15 years suggests that a large rise in international real interest rates is unlikely as long as fiscal consolidation in industrial countries remains on track

**Are Financial Sector Weaknesses Undermining the East Asian Miracle?** Stijn Claessens, Thomas C. Glaessner, 1997 IFC Technical Paper No 3 Inflation plagues many of the developing countries in which the International Finance Corporation IFC operates To date however little is known about the impact of inflation on the financial statements of firms in developing countries The authors of this study have developed a simple algorithm based on the method of inflation accounting used in Brazil and have applied it to the accounts of listed companies in Turkey for the period 1982 90 The paper documents an inflation induced bias in financial statements and introduces a methodology for adjusting corporate financial statements for inflation effects

Monitoring the Learning Outcomes of Education Systems Vincent Greaney, Thomas Kellaghan, 1996-01-01 In recent years education systems in more than 50 countries have shown an interest in obtaining information on what their students have learned as a result of their educational experiences It seems likely that the number of countries interested in this sort of information will increase in the future This book is intended to provide an introduction to individuals with an interest in assessing the learning outcomes of educational systems In Chapter 1 Nature and Uses of Educational Indicators it considers the role of indicators in this process A number of approaches to assessing learning outcomes in developed and developing countries are described and systems of comparative international assessment are reviewed in chapter 2 National and International Assessments The question of whether existing information from public examination results can be used to provide information on learning outcomes for an education system is answered in the negative in chapter 3 National Assessment and Public Examinations chapter 4 Components of a National Assessment reviews the stages of a national assessment and chapter 5 Pitfalls of National Assessment A Case Study presents a case study of examples of poor practice in the conduct of national assessments An appendix presents a national assessment checklist Contains 4 boxes 6 tables and 139 references SLD

**Decentralization of Education** Cathy Gaynor, 1998-01-01 This book is based on a review of the literature on decentralization and teacher management The focus is on basic formal education mainly the primary and junior secondary levels of schooling and on presenting a rationale for decentralizing teacher management The book presents three models of decentralized teacher management explores the different functions of teacher management and how these functions are handled in centralized and decentralized systems examines the design of decentralization reforms in various countries and

discusses the political feasibility and legal implications of decentralizing teacher management Since reliable data on decentralizing teacher management are limited the changes that are described changes that will affect the quality of teaching or learning are tentative Although recommendations for planners and policymakers are included the book emphasizes the viability of the approaches taken so far and the available evidence regarding their efficacy Contains 70 references RJM      Decentralization of Education Ketleen Florestal, Robb Cooper, 1997-01-01 In practice most education systems have both centralized and decentralized elements Planners involved in a decentralizing reform must identify which components of the system are more appropriately managed at the central level and which at the local level This book is intended to inform education policymakers planners and practitioners about international experience in the legal aspects of decentralizing basic education It also provides a basic understanding of how laws and regulations can be used for education reform For purposes of the discussion decentralization is used to describe efforts to transfer decision making power in basic education from the administrative center of a country to authorities closer to users The term is also used in a more technical sense to describe one of the many forms this type of reform can take and in this sense it is contrasted with deconcentration and devolution as educational reforms The first section examines the general legal aspects of decentralization and the second looks more closely at decentralization laws and regulations The third section is in effect a checklist of items that should be included in decentralization laws and the fourth section provides a road map to help the planner prepare and implement the laws required for reform Although an effort has been made to keep the discussion general enough for use in many countries the analysis is based on the legal systems of the Western world or those that they inspired Contains 35 references SLD

Publications ... Catalog World Bank Group, 1999 *World Bank Research Program* World Bank, 1996 *Will America Grow Up Before it Grows Old?* Peter G. Peterson, 1996 The facts are plain Social Security is headed for massive unsustainable deficits in the next century Politicians talk of a Social security trust fund but there are no hard assets in it only government bonds The reality is that Social Security is really a pay as you go system with benefits to current retirees paid not out any saved trust funds but out of taxes on the payroll of today's workforce But what will happen when these employees retire when in less than fifteen years the 76 million members of the baby boom generation the largest in our history stop paying in and start taking money out And what can we as individuals and as citizens do now to prevent these catastrophic deficits The crises towards which we are careening by 2025 1 American in 5 will be 65 or older and it will take an already overloaded 1 6 working Americans to support each retired person will not only be felt personally by the many millions stranded with no

savings and without benefits but will shiver the country's economy as a whole as well as the world financial system. With courage, clarity, and incontrovertible evidence, Peterson spells out this huge, if politically unmentionable problem more clearly than ever before and tells us what we must do now for our personal survival and that of our children. According to recent polls, more young Americans believe in UFOs than think they will ever receive a Social Security check. Yet most Baby Boomers, as they approach retirement age, believe they will continue to live their present lifestyle in retirement without a fraction of the personal savings or pensions necessary to pay for the future they expect. This aging population double today's load will depend on as few as 1.6 working Americans to support each retired person. Who will support this nation of Florida's? In this short, powerful book, Peter G. Peterson, one of America's top investment bankers and a leading critic of our entitlement policy, spells out in the clearest possible language, with unmistakable numbers and easy-to-read charts, the disaster that lies ahead if we continue to ignore our low saving rate, our ballooning federal deficits, and our enormous unfunded and unsustainable commitments to retirees. Peterson reveals what politicians are afraid to admit: trillions of dollars of promised benefits for which no funds have been provided. Shattering the myths surrounding this subject with hard facts and eye-opening views of the future, Peterson gives the most comprehensive and candid plan for a gradual, humane, fair, and realistic answer to the greatest challenge of the next century: transforming our political, economic, cultural, and social assumptions to adapt to the realities of the graying of America.
