Learning Transnational Learning Åge

Mariussen, Seija Virkkala, 2013-05-02 Systems of innovation that are conducted within national borders can preserve inefficient solutions and prevent development. This has led to a feeling that transnational learning strategies are more and more desirable. In practice the field of transnational learning has been dominated by various policy making institutions such as the OECD and European Union working through different types of policy instruments and programs such as structural funds, open methods of coordination as well as international research institutions and networks set up by cooperating national governments working on comparative analysis, benchmarking and indicators. This book lays out a set of methods which can further enhance the experience of transnational learning starting from the sociological ideas promoted by Charles Sabel of learning through monitoring and by Marie Laure Djelic and others of the translation of experiences between different countries. Case studies and examples are collected from three fields: industrial development, tourism and local government.

Cultural Industries and the Production of Culture Dominic Power, Allen J. Scott, 2004-08-05 Cutting edge perspectives on the functioning of cultural industries are offered in this volume which explores the media, entertainment and artistic sectors. Contributors place these industries in the new economy and suggest ways in which they can contribute to urban and regional economic and social development.

This Handbook offers a timely rich as well as critical panorama of these multifaceted processes with up to date chapters by renowned specialists from many countries. A Handbook of Globalisation and Environmental Policy, Second Edition Frank Wijen, K. Zoeteman, J. Pieters, Paul van Seters, 2012-01-01 Acclaim for the first edition. This is undoubtedly a useful collection of essays for environmental policy makers and anyone interested in the relationship between national government and transnational forces. The collection brings together some interesting perspectives and should prove a useful complement to the existing political sociology of the environment.

International Sociology Review of Books The Handbook of Globalisation and Environmental Policy is a very important book. More than 40 experienced authors including some of the most important international thought leaders of our time have confronted a crucial question: How can and should national governments come to grips with the need for global action on a wide range of increasingly urgent environmental challenges that exceed their authority and capability? Through close examination of numerous case studies, a balanced perspective that takes government, business and civil society into account and fresh interdisciplinary thinking about a range of policy tools, the Handbook offers a treasure trove of new concepts and new perspectives. The authors conclude that by acknowledging the ongoing erosion of national sovereignty and accepting the

growing need to work together in supranational forums national governments can in fact increase their capacity to shape their own destiny Lawrence Susskind Massachusetts Institute of Technology US In an increasingly interdependent world global forces affect both the design and effectiveness of environmental policy This Handbook provides an unusually creative and comprehensive guide not only to the nature of these forces and their impacts but also to how a better understanding of these forces can provide a foundation for improving the effectiveness of environmental policy Tom Tietenberg Colby College US In the current era of globalisation national governments are increasingly exposed to international influences that present new constraints and opportunities for domestic environmental policies This comprehensive revised Handbook pushes the frontiers of theoretical and empirical knowledge and provides a state of the art examination of the multifaceted effects of globalisation on environmental governance Including substantially revised as well as new contributions from leading authorities the Handbook offers an insightful overview of recent developments at the intersection of globalisation and national environmental policy It covers themes including national regimes trade rules types of goods federalism innovation standards citizen consumers developing countries policy networks partnerships and carbon trading The Handbook s depth and scope will appeal to a broad and varied readership across academics students and policy makers interested in public and private governance environmental economics international relations environmental politics and law sociology and political science
