**Globalization** Frederic S. Mishkin, 2008 Many prominent critics regard the international financial system as the dark side of globalization threatening disadvantaged nations near and far But in *The Next Great Globalization* eminent economist Frederic Mishkin argues the opposite that financial globalization today is essential for poor nations to become rich Mishkin argues that an effectively managed financial globalization promises benefits on the scale of the hugely successful trade and information globalizations of the nineteenth and twentieth centuries This financial revolution can lift developing nations out of squalor and increase the wealth and stability of emerging and industrialized nations alike By presenting an unprecedented picture of the potential benefits of financial globalization and by showing in clear and hard headed terms how these gains can be realized Mishkin provides a hopeful vision of the next phase of globalization *Our Day to End Poverty* Shannon

Daley-Harris, Jeffrey Keenan, Karen Speerstra, 2007-06-18 *Our Day to End Poverty* invites us to look at the twenty four hours in our very ordinary days and to begin to think about poverty in new and creative ways The authors offer scores of simple actions anyone can take to help eradicate poverty Each chapter takes a task we undertake during a typical day and relates it to what we can do to ease the world's suffering We begin by eating breakfast so the first chapter focuses on alleviating world hunger We take the kids to school what can we do to help make education affordable to all In the afternoon we check our email how can we ensure the access to technology that is such an important route out of poverty The chapters are short and pithy full of specific facts resources for learning more and menus of simple often fun and always practical action steps Anne Frank wrote How wonderful it is that nobody need wait a single moment before starting to improve the world Let's get started It is our day to end poverty *From Technology Transfer to Intercultural Development* S. Strijbos, Jan van der

Stoep, 2012-02-01 The idea for this book has been born in a dialogue between the authors of *In Search of an Integrative Vision for Technology* 2006 and a group of scholars and practitioners from South Africa whose research and development activities focuses on problems of traditional African society and culture Although there existed awareness in the writing of the earlier book that the search for normativity for our technological society should encompass the different cultural spheres of the world no attention has been paid to the problem of interculturality Focussing on the development of technology in the developed societies the emphasis was laid on finding a basis for interdisciplinarity bridging the gaps between the sciences and humanities as well as between theory and practice According to the vision that has been elaborated on in the above book not the autonomous dynamics of technology as a free flying projectile should determine the future of our global world but guidance has to be provided by a normative perspective on technology for the common good of all people and cultures Following further this line of research the current book aims to address explicitly the intercultural dimension of technology in our globalising world *What Can One Person Do?* Sabina Alkire, Edmund Newell, 2005-10 Addresses the challenge of living

in a world broken by intractable issues of poverty and injustice and offers meditations followed by practical suggestions on how churches and individuals can actually make a difference What Can One Person Do confronts a poverty stricken world and with clarity of purpose offers practical steps to create lasting change Global poverty can be reduced through a series of achievable objectives the eight Millennium Development goals agreed to by the international community at the Millennium Summit in 2000 World leaders and faith communities have adopted the MDGs as well as the ideas found within this book for the authors demonstrate that as shared vision grows and as these goals are accomplished human communities shall indeed flourish Global Activism in Food Politics A. Mann, 2014-05-01 Who should provide food and through what relationships

Whose livelihoods should be protected For over 20 years the peasant farmers of La Via Campesina have been engaged in the fight against injustice hunger and poverty under the banner of food sovereignty the right of peoples to healthy and culturally appropriate food produced through ecologically sound and sustainable methods and their right to define their own food and agriculture systems They campaign for healthy sustainable alternatives to an industrial food system controlled by agribusiness companies and the architects of unfair trade agreements This book draws on grounded case studies of agrarian movements in the Americas and Europe as exemplars of a power shift as local opposition scales up to global action in an effort to wrest control of our food away from transnational corporations and back to communities **International**

**Political Economy** Thomas D. Lairson, David Skidmore, 2016-12-08 This text offers a rethinking of the field of international political economy in an era of growing but uneven globalization Even as global integration advances states play central roles as partners with the largest of global firms as the catalysts of competitiveness and economic growth as the creators of global institutions and in promoting and responding to global interdependence Indeed the struggle for power and wealth within and among states underscores the primacy of politics in understanding current realities At the same time new issues and actors complicate the global agenda as it expands to address the environment global health and food security By offering a clear explanation of basic concepts contextualizing the presentation of theoretical debates and placing current events in historical context International Political Economy ensures students a deep understanding of how the global economy works and the ways in which globalization affects their lives and those of people around the world Key Content and Features Engages debates over the reach and significance of globalization Examines the sources and consequences of global financial instability Explores the origins and consequences of global inequality Compares various strategies of development and state roles in competitiveness Discusses the role of key international economic institutions Considers the impact of the rise of China on the global economy and the potential for war and peace Illustrates collective efforts to fight hunger disease and environmental threats Includes numerous graphs and illustrations throughout and end of chapter discussion questions Links key concepts for each chapter to a glossary at the end of the book Provides a list of acronyms at the outset and annotated further readings at the end of each chapter Offers additional resources on a web site related to the text including a list of

and of the transformations that will be required to meet those challenges This is a very important book It should be read by an informed public but most particularly by leaders and policy makers of the world s governments international organizations educational and religious institutions Lee Talbot George Mason University US This is an extraordinary bold and exceptionally well thought out prospectus on the next century of the human condition Declining living standards consequential to the pervasive pursuit of growth in terms of Gross Domestic Product is a central theme that is thoroughly documented and engagingly articulated The decisive role in the decline of living standards played by global threats including poverty fundamentalism environmental degradation wars and excess consumption is compellingly presented from the perspective of the author s unique career Burton Singer Princeton University US This impressive study of the progressive impoverishment of the world s resources speaks with the authority of Thayer Scudder s fifty years of experience with international programs for technological development especially those that involve river basin development and resulting population displacement and resettlement Case studies from different continents provide the evidence for the likelihood that the majority in future generations will lead more meager lives than their twentieth century ancestors He points to what has gone wrong in our approach to the world and its resources and to the measures necessary to offset the damage already caused If only citizens have the political will to adopt them Elizabeth Colson University of California Berkeley US This is an important book It has to be listened to and for two reasons The first is the expertise of the author the guy has been there this is an anthropologist who is constantly in the field And he possesses a wide range of skills part ethnographer part biologist as much a humanist as a scientist The combination of experience and expertise is as powerful as it is unusual Sadly a second force in favor of this book is the temper of the times The giddiness of the last century has been driven underground by the perils of this Ro Boomers Helen Andrews,2021-01-12 Baby Boomers and I confess I am one prepare to squirm and shake your increasingly arthritic little fists For here comes essayist Helen Andrews Terry Castle With two recessions and a botched pandemic under their belt the Boomers are their children s favorite punching bag But is the hatred justified Is the destruction left in their wake their fault or simply the luck of the generational draw In Boomers essayist Helen Andrews addresses the Boomer legacy with scrupulous fairness and biting wit Following the model of Lytton Strachey s Eminent Victorians she profiles six of the Boomers brightest and best She shows how Steve Jobs tried to liberate everyone s inner rebel but unleashed our stultifying digital world of social media and the gig economy How Aaron Sorkin played pied piper to a generation of idealistic wonks How Camille Paglia corrupted academia while trying to save it How Jeffrey Sachs Al Sharpton and Sonya Sotomayor wanted to empower the oppressed but ended up empowering new oppressors Ranging far beyond the usual Beatles and Bill Clinton clich s Andrews shows how these six Boomers effect on the world has been tragically and often ironically contrary to their intentions She reveals the essence of Boomerness they tried to liberate us and instead of freedom they left behind chaos

**Human Centered Management** Maria-Teresa Lepeley,2020-04-13 We have never had more freedom to acquire

information to make decisions and organizations have never been so pressed to demonstrate accountability as they communicate with better informed customers and users People who work IN an organization must also work FOR the organization to accomplish its mission In this environment humans are no longer just a resource they are the reason an organization exists New constructs are needed to ensure this human centered paradigm shift This book sets out the rationale for this shift and stimulates the discussion and the discovery of effective approaches and solutions to innovate for social and environmental good Written by an expert in quality standards the book offers a coherent model which synchronizes the organizational structure with the talent required to develop resilient and agile work environments New strategies to develop talent will be critical and multidisciplinary approaches from scholars and practitioners from around the world will be required to effectively collaborate and articulate the solutions The proposition in the book focuses on continuous improvement and interdisciplinary collaboration between scholars and practitioners across different industries sectors and national borders in order to address the unavoidable disruptions in the global VUCA environment

**Post-Imperial Possibilities** Jane Burbank, Frederick Cooper, 2023-11-07 A history of three transnational political projects designed to overcome the inequities of imperialism After the dissolution of empires was the nation state the only way to unite people politically culturally and economically In *Post Imperial Possibilities* historians Jane Burbank and Frederick Cooper examine three large scale transcontinental projects aimed at bringing together peoples of different regions to mitigate imperial legacies of inequality Eurasia Eurafrica and Afroasia in theory if not in practice offered alternative routes out of empire The theory of Eurasianism was developed after the collapse of imperial Russia by exiled intellectuals alienated by both Western imperialism and communism Eurafrica began as a design for collaborative European exploitation of Africa but was transformed in the 1940s and 1950s into a project to include France's African territories in plans for European integration The Afroasian movement wanted to replace the vertical relationship of colonizer and colonized with a horizontal relationship among former colonial territories that could challenge both the communist and capitalist worlds Both Eurafrica and Afroasia floundered victims of old and new vested interests But Eurasia revived in the 1990s when Russian intellectuals turned the theory's attack on Western hegemony into a recipe for the restoration of Russian imperial power While both the system of purportedly sovereign states and the concentrated might of large economic and political institutions continue to frustrate projects to overcome inequities in welfare and power Burbank and Cooper's study of political imagination explores wide ranging concepts of social affiliation and obligation that emerged after empire and the reasons for their unlike destinies

*Economics in America* Angus Deaton, 2024-10-22 From the Nobel Prize winning economist and New York Times bestselling coauthor of *Deaths of Despair* and *The Future of Capitalism* candid reflections on the economist's craft When economist Angus Deaton immigrated to the United States from Britain in the early 1980s he was awed by America's strengths and shocked by the extraordinary gaps he witnessed between people *Economics in America* explains in clear terms

how the field of economics addresses the most pressing issues of our time from poverty retirement and the minimum wage to the ravages of the nation's uniquely disastrous health care system and narrates Deaton's account of his experiences as a naturalized US citizen and academic economist Deaton is witty and pulls no punches In this incisive candid and funny book he describes the everyday lives of working economists recounting the triumphs as well as the disasters and tells the inside story of the Nobel Prize in economics and the journey that led him to Stockholm to receive one He discusses the ongoing tensions between economics and politics and the extent to which economics has any content beyond the political prejudices of economists and reflects on whether economists bear at least some responsibility for the growing despair and rising populism in America Blending rare personal insights with illuminating perspectives on the social challenges that confront us today Deaton offers a disarmingly frank critique of his own profession while shining a light on his adopted country's policy accomplishments and failures

Conflict and Development Andrew J. Williams, Roger Macginty, 2016-02-19 In the five years since the first edition of Conflict and Development was published the awareness of the relationship between conflicts and development has grown exponentially Developmental factors can act as a trigger for violence as well as for ending violence and for triggering post conflict reconstruction The book explores the complexity of the links between violent conflict usually civil wars and development under development and uneven development The second edition incorporates significant changes in the field including the G7 initiative the New Deal on Fragile States World Trade talks major policy documents from the UNDP and World Bank and updates on the Afghanistan and Iraq wars

**Strategy for Tackling Poverty in Nigeria** Dr. Ebikinei Stanley Eguruzo, 2017-02-08 This research evaluates what the National Youths Service Corps members community perceives as their support needs in Nigeria in tackling poverty It also analyses the process of leveraging policymaking using social marketing techniques It seeks a deeper understanding of the poverty elimination processes in Nigerian and beyond A mixed methods research design was adopted engaging a quantitative approach in which 351 NYSC members were surveyed using self completion questionnaires In addition qualitative studies in which policy makers as well as young people within the NYSC members community were interviewed The main findings of the research reveal that young people NYSC members support needs in Nigeria are inadequate A great deal more needed to be done A Marshall plan scale of support is required The most significant causes of poverty amongst the NYSC members are absence of jobs corruption of government officials low wages tribalism oil pollution natural disasters IMF World Bank conditionalities and wars The main experiences of poverty include a high youth unemployment rate No money to go to school No money to start small businesses less food to eat no money to treat sickness no money to buy clothes no money to afford decent homes prostitution absence of a public transportation system as well as into drugs and into kidnapping

Constructing a Positive Shock: Growth Through the Lens of Option Pricing Mehmet Cangul, 2023-07-28 Low income economies face negative shocks whose frequency and disproportionate impact overcome growth trajectories producing a negative drift COVID 19 was the latest such episode To

escape this negative drift and build a durable recovery there is a need for a counter balancing force to construct a positive shock Growth is realized through decisions that fall under two categories routine and non linear While routine decisions modify existing economic behavior along the same path non linear decisions describe riskier options that involve transformation Option pricing theory can be useful to describe the latter and construct the positive shock required to escape the negative drift

### **The Governance Structures of the Bretton Woods Financial Institutions** Ahmed

Naciri,2018-09-11 This book uses institutional data to examine and analyze the current governance structures of Multilateral Financial Institutions MFIs with the ultimate goal of reforming MFI governance models to be more responsive to the needs of developing countries Founded in the post World War II era MFIs collectively known as the Bretton Woods Financial Institutions BWFI were created to promote global economic development and financial stability This book argues however that the governance structures and policies of the MFIs have been biased in favour of developed country members excluding less economically advanced countries from decision making processes and perpetuating the economic status quo Considering the inability of MFIs to adequately respond to the financial needs of developing countries the book raises an alternative proposal for BWFI reform based on the following criteria i encouraging development incentives ii favouring development learning through knowledge transfer and easing its appropriation by developing countries and iii guiding and facilitating access to private international financial markets Combining historical economic analysis with policy recommendations for the future this book will be of particular interest to students and researchers of development economics governance and MFIs as well as practitioners working with the institutions studied

### **Alleviating Global Poverty** Lewis D. Solomon,2014-12-05

In the book Lewis D Solomon develops the theme that the profit motive can serve as a powerful force for social good in developing nations making a difference in the lives of those trapped in misery and helping millions out of poverty After focusing on three US based venture capital like firms the book presents evidence that for profit corporations many indigenous funded in part by these capital providers have alleviated global poverty These investee firms which seek both financial and social returns serve the impoverished by delivering critically needed but affordable goods and services including quality education preventive healthcare light and power and enhanced agricultural productivity
