### **Enemies And Passing Friends Settler Ideologies In Twentieth Century Ulster:**

*Enemies and Passing Friends* P. M. Clayton, 1996 This book examines the new framework of ideas since 1989 which will inform our understanding on how development in the old Third World should be understood *Elite Cultures* Stephen Nugent, Cris Shore, 2003-12-16 Drawing on a diverse comparative ethnographic literature this new volume examines the intimate spaces and cultural practices of those elites who occupy positions of power and authority across a variety of different settings Using ethnographic case studies from a wide range of geographical areas including Mexico Peru Amazonia Indonesia Sri Lanka Europe North America and Africa the contributors explore the inner worlds of meaning and practice that define and sustain elite identities They also provide insights into the cultural mechanisms that maintain elite status and into the complex ways that elite groups relate to and are embedded within wider social and historical processes **The Great**

**War and the British Empire** Michael Walsh, Andrekos Varnava, 2016-11-25 In 1914 almost one quarter of the earth's surface was British When the empire and its allies went to war in 1914 against the Central Powers history's first global conflict was inevitable It is the social and cultural reactions to that war and within those distant often overlooked societies which is the focus of this volume From Singapore to Australia Cyprus to Ireland India to Iraq and around the rest of the British imperial world further complexities and interlocking themes are addressed offering new perspectives on imperial and colonial history and theory as well as art music photography propaganda education pacifism gender class race and diplomacy at the end of the pax Britannica **Consociational Theory** Rupert Taylor, 2009-03-20 Consociational power sharing is increasingly gaining ground right around the world as a means for resolving political conflict in divided societies In this volume edited by Rupert Taylor nineteen internationally respected scholars engage in a lively debate about the merits of the theory underlying this approach The volume focuses specifically on one of the leading cases under the global spotlight the Northern Ireland conflict and brings together the most prominent proponents and opponents of consociationalism Northern Ireland's transition from war to peace is seen by consociationalists as flowing from the historic Belfast Agreement of 1998 and specifically from the Agreement's consociational framework The Northern Ireland case is marketed by consociationalists as representing best practice and as providing a template for ending conflicts in other parts of the world However as this volume interrogates on what grounds and to what extent can such a positive reading be upheld Taken as a whole this volume structured as a symposium around the highly influential argument of John McGarry and Brendan O Leary offers comparative engaging and critical insight into how political theory can contribute to the creation of a better world Consociational Theory is an important text for anyone with an interest in political theory conflict resolution in divided societies or Irish politics

**Poet John Hewitt, 1907-1987 and Criticism of Northern Irish Protestant Writing** Sarah Ferris, 2002 This study questions the validity of John Hewitt's prominence in Northern Irish Protestant writing and asserts the need for a more accurate history of this genre Confronting the perceived wisdoms of a highly politicized discourse it undermines Hewitt's

status within it as a matchless acceptable Protestant for a critically re visioned Ireland Challenging the substance of Hewitt's self representations as icon of cultural liberalism radical secular dissenter and verse apologist for the Planter condition this book shows that his elevation over the majority of northern Protestants is tenable only within an incomprehensive history of Northern Irish Protestant writing that diminishes other important figures The study provides a framework for a more equitable study of Protestant voices Human Rights and Conflict Resolution Claudia Fuentes Julio, Paula

Drumond, 2017-11-22 Human rights and conflict resolution have been traditionally perceived as two separate fields sometimes in competition or in tension and occasionally with contradictory approaches towards achieving a lasting peace Although human rights norms have been incorporated and institutionalized by various national regional and international organizations that deal with conflict resolution negotiators and mediators are often pressured in practice to overlook international human rights principles in favor of compliance and more immediate outcomes The chapters in this volume navigate the relationship between human rights and conflict resolution by fleshing out practical conceptual and institutional encounters of the two agendas and engaging with lessons learned and windows of opportunities for mutual learning Recognizing the increasing relevance of this debate and important gaps in the current research on the topic this book addresses the following questions How can we improve our practical and theoretical understanding of the complementarity between human rights and conflict resolution How would a human rights based approach to conflict resolution look like How are international regional and national organizations promoting implementing and or adapting to better coordinate between human rights and conflict resolution Building on empirical evidence from contemporary conflict resolution processes how have human rights been integrated in different efforts on the ground What are the main lessons learned in this regard Examining a wide range of countries and issues this work is essential reading for human rights conflict resolution and security experts including scholars diplomats policy makers civil society representatives and students of international politics

and 1979 It considers how white settlers used the past to make claims of authority in the present It investigates the white Rhodesian state s attempts to assert its independence from Britain and develop a Rhodesian national identity by changing Rhodesia s old colonial symbols and examines how the meaning of these national symbols changed over time Finally the book offers insights into the role of race in Rhodesian national identity showing how portrayals of a timeless black population were highly dependent upon circumstance and reflective of white settler anxieties Using a comparative approach the book shows parallels between Rhodesia and other settler societies as well as other post colonial nation states and even metropolises as themes and narratives of decolonisation travelled around the world
