Energizing Teacher Education and Professional Development with Problem-based Learning Barbara B. Levin, 2001 How can we help both beginning and experienced teachers engage students in today s diverse classrooms How can we focus on actual problems that teachers face This book offers a learning tool problem based learning PBL PBL is an instructional method that encourages learners to use critical thinking and problem solving as they apply content knowledge to real world problems and issues Editor Barbara Levin and the book's contributing authors believe that if teachers are to use PBL effectively with their K 12 students they need to personally experience PBL themselves Levin provides field tested examples of how teacher educators have used PBL in many professional development settings Based on actual PBL units and activities contributed by various authors the book describes how teachers tackled authentic problems that required them to find evaluate and use resources to learn just as they expect their students to do when using PBL A brief introduction explains why and how to use PBL with teachers Chapters 1 5 focus on how the chapter authors used PBL in different teacher preparation courses at several universities Chapters 6 and 7 show how the authors working with experienced teachers used PBL in inservice and staff development settings The final chapter offers answers to frequently asked questions about using **Energising Teacher Education and Professional Development with Problem-based Learning** PBL with teachers Essential Readings in Problem-based Learning Andrew Elbert Walker, Heather Leary, Cindy E. Barbara B. Levin, 2004 Hmelo-Silver, Peggy A. Ertmer, 2015 This book surveys the state of problem based learning and assesses the impact of this innovative educational methodology on teaching and research effectiveness across a range of disciplines and in a variety of Teacher Beliefs and Classroom Performance James Raths, Amy C. McAninch, 2003-12-01 This organizational contexts volume of Advances in Teacher Education is about beliefs held by teachers and addresses the important topic of teacher beliefs from a variety of disciplinary perspectives Most of the authors who have contributed to this collection of essays assume that beliefs are propositions that are felt to be true by the person embracing them but that do not necessarily rest on the kind of evidence that justifies the use of the term knowledge Teacher beliefs are an important topic because it is hypothesized that teachers and teacher candidates use them to shape the information they receive from formal teacher preparation and to direct subsequent decision making in the classroom Resources in Education ,2001-10 Guide to Integrating Problem-Based Learning Programs in Higher Education Classrooms: Design, Implementation, and Evaluation Epler, Pam, Jacobs, Jodee, 2022-06-24 Recently there has been an increase in businesses and schools that are using some form of problem based learning daily By educating undergraduate and graduate students using this service delivery model they will be better prepared to enter the workforce and increase their marketability Further study is required to ensure students and faculty utilize this model to its full potential Guide to Integrating Problem Based Learning Programs in Higher Education Classrooms Design Implementation and Evaluation provides college and university faculty with ways to establish use and

evaluate a successful problem based undergraduate or graduate program Covering key topics such as peer tutors evaluation technology and project based learning this reference work is ideal for higher education faculty teachers instructional designers curriculum developers school administrators university leaders researchers practitioners and students Role of Criticism in Understanding Problem Solving Samuel Fee, Brian Belland, 2012-05-26 In 1991 Denis Hlynka and John Belland released Paradigms Regained a well received reader for graduate students in the field of educational technology The Role of Criticism in Understanding Problem Solving updates some of those ideas initially proposed in Paradigms Regained and extends the conversation into the contemporary discourse regarding problem based learning PBL Paradigms proposed the idea of criticism as a third method for the conduction of educational research the first two being qualitative and qualitative The concept of criticism as a tool for research is not well established in educational technology although it is well established in other educational research traditions such as Curriculum Studies Unfortunately it is not always clear how criticism can be applied This book views criticism as a way to step back and look at an educational intervention within educational technology through a particular critical lens Criticism is viewed as a valuable approach to guiding meta analyses and theoretical studies serving to prevent the proverbial spinning of the wheels that often happens in educational research By indicating new potential research questions and directions criticism approaches can invigorate educational research This book revisits the ideals of criticism in order to establish their usefulness for studying educational technology interventions to support problem based learning First a few foundational chapters set the stage for the conversations on criticism Then the role criticism can play in enhancing analysis and interpretation of the PBL literature is explored Finally case studies addressing the central concepts of the text are presented and dissected This book represents a complete overhaul and rethinking of the use of criticism as a method for understanding and furthering the research area of PBL within the field of Educational technology <u>Designing Technology-Mediated Case Learning in Higher Education</u> Choon Lang Gwendoline Quek, Qiyun Wang, 2023-01-02 This book collects case studies in design and application of technology mediated case based learning models in higher education It provides a much needed updated synthesis of recent research and application of technology mediated case based learning across disciplines within higher education. The book does not only provide a broad perspective and deep understanding on the designs and instructional applications of technology mediated case based learning models but also inspire more interest in adopting or inventing new situated case based learning models in the context of higher education Community-based Transformational Learning in Early Childhood Settings Christian Winterbottom, Vickie E.
