Das Gupta, 2023-05-20 A New Approach to I C S E Physics for Class X has been revised in accordance with the latest Syllabus prescribed by the Council for Indian School Certificate Examination New Delhi for Class 10 The main strength of this book lies in the scientific content and rearrangement of the prescribed syllabus such that the topics are linked to each other and do not cause any unnecessary stress on the mind of students Emphasis has been laid upon mastering the fundamental principles of Physics rather than specific procedures and on selecting the areas of contemporary interest rather than of past interest The main strength of the book lies in the subject matter and the experience that a student will get in solving difficult and complex problems of Physics Salient features of this book are as follows Thoroughly revised and upgraded Written in new format with figures examples and definitions highlighted Full size diagrams are given The size of diagrams is the same as is expected from a student in examinations Topic wise video lectures are given as a support for effective learning At the end of each chapter there are given enough Solved Numerical Problems This will help the students to solve numericals on their own Most of the numerical problems are of contemporary interest and are in SI units The motive has been to evaluate the application of principles rather than to test the mathematical skill of students ICSE Specimen Question Paper has been given Scan QR codes given at the end of each chapter to get the solution of chapter wise ICSE Board Examination Questions We hope that this book would prove very useful to fellow teachers and students Suggestions and constructive criticism for the improvement of the book are welcome and shall be gratefully acknowledged Author **Molecular Consciousness** Françoise Tibika, 2012-12-14 Mind and matter are connected through information at the atomic level Explains how your state of mind is profoundly related to the flow of chemical information during the interactions of your molecules Reveals how each atom of the universe is intrinsically linked with all other atoms through their memories and the information they carry Explores the concrete manifestations of this molecular consciousness such as intuition and the appearance of life on Earth The molecules of living organisms are in constant communication storing and transmitting information both at the intracellular level as well as across vast distances The mystery of how this

communication occurs whether through molecular structure chemical reactions entangled states or some other method has baffled biologists chemists and quantum physicists for more than a century Revealing the intimate connections between mind and matter Fran oise Tibika explains that conscious communication exists all the way down to the very molecules of which we and the universe are made Using the fundamental laws of thermodynamics to support her argument especially the first law energy is neither created nor destroyed as well as modern scientific research in quantum physics and molecular biology Tibika explores how each imperishable atom of the universe is intrinsically linked with all other atoms through their memories and the information they carry She shows not only how each atom of your being is part of the greater whole of the universe but also how your thoughts feelings and state of mind are profoundly related to the activity of each of your molecules Just as we are undergoing constant transformation by the molecules surrounding us our own molecules are continuously transforming the network of which we are a part Exploring the concrete manifestations of this molecular consciousness such as intuition Tibika reveals how through effecting conscious change at the molecular level our actions have far reaching significance in a universe that is not blind to our presence
