Engaging Cultural Differences The Multic:

Transcultural Bodies Ylva Hernlund, Bettina Shell-Duncan, 2007-06-07 Female circumcision or more precisely female genital cutting FGC remains an important cultural practice in many African countries often serving as a coming of age ritual. It is also a practice that has generated international dispute and continues to be at the center of debates over women's rights, the limits of cultural pluralism, the balance of power between local cultures, international human rights, and feminist activism. In our increasingly globalized world, these practices have also begun immigrating to other nations where transnational complexities vex debates about how to resolve the issue. Bringing together thirteen essays, *Transcultural Bodies* provides an ethnographically rich exploration of FGC among African diasporas in the United Kingdom, Europe, and Australia. Contributors analyze changes in ideologies of gender and sexuality in immigrant communities, the frequent marginalization of African women's voices in debates over FGC, and controversies over legislation restricting the practice in immigrant populations.

Freud Along the Ganges Salman Akhtar, 2005-12-17 Winner of the 2006 Gradiva Award. A collection of new and previously published essays that sheds light on the intersections between psychoanalysis and Indic Studies. While Indian academics and clinicians have been familiar with psychoanalysis for many decades, they have kept this Western model of the mind separate from the spiritual and philosophical traditions of their own country. *Freud Along the Ganges* bridges this important lacuna in psychoanalytic and Indic studies by creating a new theoretical field where human motives are approached not only psychoanalytically but also from the perspective of the teachings of Buddha, Tagore, Gandhi, and Salman Rushdie. The authors of this collection show how the insights of these Indian masters give a new force to the Freudian discovery by providing a basis to better understand the social and psychological Indian makeup. The book begins by questioning the applicability of the psychoanalytic method to non-Western cultures. It then traces the history of the psychoanalytic movement in India from its onset while it emphasizes the intricate overlap between Indian existential and mystical traditions and psychoanalysis. *Freud Along the Ganges* offers a unique study of the ways that Indian thought and psychoanalysis illuminate and enrich each other.

Cognitive Activation in the Mathematics Classroom and Professional Competence of Teachers Mareike Kunter, Jürgen Baumert, Werner Blum, Ute Klusmann, Stefan Krauss, Michael Neubrand, 2013-03-29 This work reports the findings of the Professional Competence of Teachers Cognitively Activating Instruction and Development of Students Mathematical Literacy project COACTIV. COACTIV applies a broad innovative conceptualization of teacher competence to examine how mathematics teachers' knowledge, beliefs, motivational orientations, and self-regulation skills influence their instructional practice and teaching outcomes. In this project, data was collected on various aspects of teacher competence and classroom instruction from the perspective of both the teachers themselves and their students. Moreover, it gauges the effects of these teacher characteristics on student learning as indexed by the progress students in each class. Questions addressed in the study, which are reported in this volume, include: What are the characteristics of successful teaching? What distinguishes

teachers who succeed in their profession How can the quality of instruction be improved

To Be an Immigrant Kay Deaux, 2006-08-17 Immigration is often discussed in broad statistical terms with a focus on how it affects labor markets schools and social services But at its most basic level immigration is a process that affects people and their identities in deeply personal ways In *To Be an Immigrant* social psychologist Kay Deaux explores the role of both social conditions and individual capacities in determining how well immigrants adapt to life in their new homelands and makes a strong case for the relevance of social psychology in immigration studies *To Be an Immigrant* looks at how immigrants are defined shaped and challenged by the cultural environment they encounter in their new country and offers an integrated psychological framework for studying the immigrant experience Deaux argues that in addition to looking at macro level factors like public policies and social conditions and micro level issues like individual choices immigration scholars should also study influences that occur on an intermediate level such as interpersonal encounters Each of these three levels of analysis is essential to understanding how immigrants adapt to a new homeland and form distinct identities As a case study for her framework Deaux examines West Indians exploring their perceptions of the stereotypes they face in the United States and their feelings of connection to their new home Though race plays a limited role in the West Indies it becomes more relevant to migrants once they arrive in the United States where they are primarily identified by others as black rather than Guyanese or Jamaican Deaux's research adds to a growing literature in social psychology on stereotype threat which suggests that negative stereotypes about one's group can hinder an individual's performance She finds that immigrants who have been in the United States longer and identify themselves as African American suffer from the negative effects of stereotype threat more than recent immigrants More than a discrete event immigration can be understood as a life long process that continues to affect people well after they have migrated *To Be an Immigrant* takes a novel approach to the study of immigration looking at how societal influences help shape immigrants and their understanding of who they are
