Engineering Index Thesaurus Engineering Index, Inc,1972-01-01 **Engineering index thesaurus** ,1972 **Indexing and Classification** Winifred F. Desmond, Special Libraries Association. Nuclear Science Division, Special Libraries Association. Documentation Division, 1966 **The Making of Test Thesaurus of Engineering and Scientific Terms** J. Heston Heald, 1967 **Guide to Sources for Agricultural and Biological Research** J. Richard Blanchard, Lois Farrell, 2023-07-28 **Librarian's Guide to Online Searching** Christopher C. Brown, 2021-06-18 Updates the premier textbook for students and librarians needing to know the landscape of current databases and how to search them Librarians need to know of existing databases and they must be able to teach search capabilities and strategies to library users This practical guide introduces librarians to a broad spectrum of fee based and freely available databases and explains how to teach them The updated 6th edition of this well regarded text covers new databases on the market as well as updates to older databases It also explains underlying information structures and demonstrates how to search most effectively It introduces readers to several recent changes such as the move away from metadata based indexing to full text indexing by vendors covering newspaper content Business databases receive greater emphasis As in the previous editions this book takes a real world approach covering topics from basic and advanced search tools to online subject databases Each chapter includes a thorough discussion a recap concrete examples exercises and points to consider making it an ideal text for courses in database searching as well as a trustworthy professional resource **Literature Search Strategies for Interdisciplinary Research** Linda G. Ackerson, 2007 The amount of published literature can be overwhelming for scientists and researchers moving from a broad disciplinary research area to a more specialized one particularly in fields that use information from more than one discipline Without a focused inquiry the researcher may find too little information or may be overcome by too much Striking the correct balance of information is the focus of Literature Search Strategies for Interdisciplinary Research This useful reference tool studies diverse interdisciplinary areas revealing the general and individual qualities that dictate the strategies of successful searches Beginning with a bare bones search strategy for finding primary research in interdisciplinary areas the book then goes on to provide hints for research in specific disciplines as the unique traits of the individual fields compound the difficulties in interdisciplinary research Individual chapters written by experts in that particular area address ten research fields in depth disclosing the common qualities of interdisciplinary research The study areas covered include Paleontology Crystallography Quaternary Research Human Factors Engineering Nanotechnology Atmospheric Chemistry Bioethics Computational Biology Engineering Entrepreneurship and Machine Learning For scientists and engineers new to their fields as well as librarians whose responsibilities include collecting library materials for newly emerging interdisciplinary research areas Linda Ackerson's guide provides all that is needed to develop a successful search strategy **A Coordinated Engineering Information System** ,1966 **Using the Engineering Literature** Bonnie A.

Osif,2016-04-19 With the encroachment of the Internet into nearly all aspects of work and life it seems as though information is everywhere However there is information and then there is correct appropriate and timely information While we might love being able to turn to Wikipedia for encyclopedia like information or search Google for the thousands of links

Computerized Literature Searching Charles L. Gilreath,2019-03-04 The computer terminal is well on its way to being as commonplace as the telephone and its usefulness to the scholar and scientist is so great that already computer screens and disks are seen frequently in academic offices The value of computers in research is well established with vast amounts of data being processed daily by all sizes of computers Computers also have had dramatic effects on the researcher s literature searching options Scientists and scholars can now query enormous databases containing tens of millions of citations to published literature and can extract bibliographies tailored to their specific questions The power and flexibility afforded the user of information by these literature searching systems ease the burden of library work but in order to use the systems effectively it is necessary to understand both their capabilities and their limitations Mr Gilreath describes the principles underlying online bibliographic systems the databases available and the factors a researcher must consider in using them He explores in some depth the relationship of the structure and terminology of publications in various fields to the literature searching process and provides detailed guidelines for research in the life health agricultural and social sciences chemistry physics mathematics geology meteorology engineering education psychology business law current affairs and the humanities A glossary of literature searching terms is included *Annual Report for Fiscal Year ...* National Science Foundation (U.S.),1964 [Information Sources in Science and Technology](#) C. C. Parker,R. V. Turley,2013-10-22 *Information Sources in Science and Technology A Practical Guide to Traditional and Online Use* presents a selection of traditional and online methods of using information sources in science and technology including people organizations literature hosts and databases This text serves as a reference book that helps the reader choose sources of information and their guides includes a routine for finding and using information and offers tips on searching and obtaining literature in a usable form This book is comprised of nine chapters and begins by explaining how to choose type s of information source that is likely to be most helpful The chapters that follow present guides on people organizations and literature as sources of information A chapter on information services focuses on those organizations that supply information or references to information that could be helpful These services range from answering telephone queries to supplying collections of relevant documents and from broadcast

television information to direct connection with computer databases The next chapters discuss ways of searching the literature and computer databases obtaining literature in a usable form and organizing and presenting information This book concludes by considering current awareness or keeping up to date with information about recent developments This monograph is intended for librarians and information officers especially for those working in scientific or industrial environments practicing scientists and engineers and students associated with these professions
