Images of busy intersections, rambling sideshows, and towering cathedrals provide an exhilarating sense of commuter traffic by road, rail, or air between known and unknown worlds. **The Spirit of American Liberal Theology** Gary

Dorrien, 2023-09-05. The Spirit of American Liberal Theology is an interpretation of the entire U.S. American tradition of liberal theology. A highly condensed and far more accessible summary of Gary Dorrien's three-volume trilogy, The Making of American Liberal Theology. Westminster John Knox Press, 2001, 2003, and 2006. Dorrien here presses the argument that the most abundant, diverse, and persistent tradition of liberal theology is the one that blossomed in the United States and is still refashioning itself. While discussions of English and German liberalism persist, new material includes expanded treatment of the Black social gospel, the Universalists' developments into early 2020s, and a robust expression of the author's post-Hegelian liberal liberationist perspective. **Violence in the Films of Stephen King** Michael J. Blouin, Tony Magistrale, 2021-07-29

In Violence in the Films of Stephen King, contributors analyze the theme of violence in the film adaptations of Stephen King's work, ranging from the earliest films in the King canon to his most recent iterations through a variety of lenses. Investigating the diverse and varying roles that violence continues to play, as both the level of violence and the gendered depictions of violence have evolved, many of the contributors come to the conclusion that King's films have grown more violent over time. This book also examines the fine line between necessary violence and sensationalist violence, discussing the complexity of determining what constitutes violence with a narrative and ethical significance versus violence intended solely to titillate, repulse, or otherwise draw an emotional reaction from viewers. Scholars of film studies, horror studies, literary studies, and gender studies will find this book particularly useful. **National Union Catalog**, 1973. Includes entries for maps and atlases.

Jobs and Bodies Arthur McIvor, 2023-11-02. In the early 21st century, radically changing work locations and patterns have jolted society to reflect more on the ways that employment affects the body and the mind. This book provides historical context and insights to aid our understanding of this contemporary crisis, critically examining the history of a neglected area. In this oral history-based study, Arthur McIvor explores the history of health and safety from Second World War to the present, drawing extensively upon workers' own personal stories of occupational accidents, disasters, injury, disease, overwork, and disability. It covers a wide range of workplace issues, from stories of TNT poisoning and overwork in wartime through to the asbestos and black lung disasters and the modern-day epidemics of stress, burnout, and Covid-19. Opening conversations surrounding the harms caused by work, this book analyses how people have lived with occupational illness and disability, critiquing risk and work health cultures and the structural violence characteristic of industrial capitalism and neoliberal economics, in addition to discussing the agency of big business and advocacy of workers and victims. Focusing on class, gender, disability, and race, this book uses an impressive range of secondary and primary sources, including government reports and enquiries, drawing upon workers' testimonies, Mine and Factory Inspectors' Reports, HSE papers, newspapers, Mass
