Securing Africa Malinda Smith, 2010 This meticulously researched forcibly argued and accessibly written collection explores the many and complex ways in which Africa has been implicated in the discourses and politics of September 11 2001 Written by key scholars from Canada the United States the Middle East and Africa the volume interrogates the impact of post 9 11 politics on Africa and is a much needed meditation on historical and contemporary discourses on terrorism

By Authority! A full exposure of all the ... Tortures inflicted on the natives of India by the officers of the East India Company India, 1855 Infanticide and Abortion in Early Modern Germany Margaret Brannan Lewis, 2016-03-17 This book is the first work to look at the full range of three centuries of the early modern period in regards to infanticide and abortion a period in which both practices were regarded equally as criminal acts Faced with dire consequences if they were found pregnant or if they bore illegitimate children many unmarried women were left with little choice Some of these unfortunate women turned to infanticide and abortion as the way out of their difficult situation This book explores the legal social cultural and religious causes of infanticide and abortion in the early modern period as well as the societal reactions to them It examines how perceptions of these actions taken by desperate women changed over three hundred years and as early modern society became obsessed with a supposed plague of murderous mothers resulting in heated debates elaborate public executions and a media frenzy Finally this book explores how the prosecution of infanticide and abortion eventually helped lead to major social and legal reformations during the age of the Enlightenment **Sexual Myths of Modernity** Alison M. Moore, 2015-11-19 The notion of sexual sadism emerged from nineteenth century alienist attempts to imagine the pleasure of the torturer or mass killer This was a time in which sexuality was mapped to social progress so that perversions were always related either to degeneration or decadence These ideas were internalized in later Freudian views of the drives within the self and of their repression under the demands of modern European civilization Sadism was always presented as the barbarous past that lurked within each of us ready to burst forth into murderous violence crime anti-Semitism and finally genocide This idea maintained its currency in European thought after the Second World War as Freudian influenced accounts of the history of philosophy configured the Marquis de Sade as a kind of Kantian superego in a framework that viewed the Western Enlightenment as unraveled by its own inner demons In this way a straight line was imagined from the late eighteenth century to the Holocaust These ideas have had an ongoing legacy in debates about sexual perversion feminism genocide representation and historical memory of Nazism However recent genocide research has massively debunked assumptions that perpetrators of mass violence are especially sexually motivated in their cruelty This book considers how the late twentieth century imagination eroticized Nazism for its own ends but also how it has been informed by nineteenth century formulations of the idea of mass violence as a sexual problem *Questioning Capital Punishment* James R. Acker, 2014-06-13 The death penalty has inspired controversy for centuries Raising questions regarding capital punishment

rather than answering them Questioning Capital Punishment offers the footing needed to allow for more informed consideration and analysis of these controversies Acker edits judicial decisions that have addressed constitutional challenges to capital punishment and its administration in the United States and uses complementary materials to offer historical empirical and normative perspectives about death penalty policies and practices This book is ideal for upper level undergraduate and graduate classes in criminal justice

Political Philosophy Mario Bunge, 2017-07-12 Political philosophy is not a well defined field It hovers between political theory and classical philosophy Few early political thinkers could have anticipated the most pressing political issues of our time the need to stop global warming the reduction of nuclear armaments the rise of inequality between individuals and nations and the struggle against authoritarianism particularly when it comes disguised as democracy or as socialism Here celebrated philosopher Mario Bunge masterfully integrates socio political theory into a philosophical exploration of power and resource distribution in the world today Bunge contends that even recent political thinkers have generally failed to address the political underpinnings of topical issues Environmental degradation gender and race discriminations participative democracy nationalism imperialism the North South divide resource wars and the industrial military complex have all largely been bypassed in political thinking Even connections between poverty and environmental degradation and between inequality and bad health have escaped the attention of those who would call themselves political thinkers Bunge believes that political philosophers should pay more attention to social indicators such as the standard index of income inequality and the United Nations human development index It is pointless to write about redistributive policies unless we have a shared understanding of current wealth distribution This is in short a modern treatise on sociopolitical concerns

Truth ,1905 "The" Political Theory of the Schoolmen and Grotius John Martin Littlejohn,1895 **The Parliamentary Debates (official Report[s])** ... Great Britain. Parliament,1834 *Intelligence and International Security* Len Scott,R. Gerald Hughes,Martin Alexander,2013-10-31 The events of 9 11 and subsequent acts of jihadist terrorism together with the failures of intelligence agencies over Iraq s Weapons of Mass Destruction have arguably heralded a new age of intelligence For some this takes the form of a crisis of legitimacy For others the threat of cataclysmic terrorism involving chemical biological radiological or nuclear attack gives added poignancy to the academic contention that intelligence failure is inevitable Many of the challenges facing intelligence appear to be both new and deeply worrying In response intelligence has clearly taken on new forms and new agendas How these various developments are viewed depends upon the historical normative and political frameworks in which they are analysed This book addresses fundamental questions arising in this new age The central aim of the collection is to identify key issues and questions and subject them to interrogation from different methodological perspectives using internationally acclaimed experts in the field A key focus in the collection is on British and North American perspectives Recent trends and debates about the organisation and conduct of intelligence provide key themes for exploration Underpinning several contributions is the recognition that intelligence faces a conflict of ideas as much as practices and threats This book was published as a special issue of *Intelligence and National Security*
