**Engineers and Inventors** David Abbott, 1985 Biographical Dictionary of the History of Technology Lance Day, Ian McNeil, 2002-09-11 This Biographical Dictionary seeks to put the world of technology in the context of those who have made the most important contribution to it For the first time information has been gathered on the people who have made the most significant advances in technology From ancient times to the present day the major inventors discoverers and entrepreneurs from around the world are profiled and their contribution to society explained and assessed Structure The Dictionary presents descriptive and analytical biographies of its subjects in alphabetical order for ease of reference Each entry provides detailed information on the individual s life work and relevance to their particular field in the first part of the entry the information will include the dates and places of the subject s birth and death together with their nationality and their field of activity in the main body of the entry there follows an account of their principal achievements and their significance in the history of technology along with full details of appointments and honours finally an annotated bibliography will direct the reader to the subject's principal writings and publications and to the most important secondary works which the reader can consult for further information Special Features The first work in existence to examine technologists in detail Contains over 1 500 entries giving detailed information Extensive cross references enable the reader to compare subjects and build up a picture of technological advance Figures drawn from fields such as Aeronautics Telecommunications Architecture Photography and Textiles A Biographical Dictionary of People in Engineering Carl W. Hall, 2008 Advancements in the field of engineering that have led to major inventions and discoveries are built on the foundations of predecessors and their work In many cases small steps are taken by a variety of researchers leading ultimately to a very momentous discovery A Biographical Dictionary of People in Engineering Literature lists the work and contributions of thousands of people from many countries representing numerous fields of endeavor over many centuries The ancient cultures of people in China Arabia India and Japan the renaissance culture of the Greeks Egyptians Romans and in addition the European cultures of the Russians Germans French and others all have contributed to what is now called engineering The terms engineer and engineering are rather recent but former builders architects instrument makers inventors discoverers and shop workers were part of the process This work contains the necrologies names dates and a brief biography up to the year 2000 of people who are found in engineering and invention literature. The names were culled from histories biographies literature and handbooks particularly from those reference titles including words such as distinguished honored leaders outstanding pioneers prominent recognized renowned and respected The necrologies are necessarily abbreviated with the major employers and dates of employment and specialities listed and references to the sources of information This book is a must for reference collections and those in the media who cover the field of engineering advancement <u>Dictionary of British</u> Educationists Richard Aldrich, Peter Gordon, 2016-04-01 This dictionary provides the reader with an easily accessible guide to

the biographies of approximately 450 educationists It covers the period from 1800 to the present day and includes a wide range of people who were active in promoting education at different levels A Biographical Dictionary of Civil Engineers in Great Britain and Ireland: 1500-1830 A. W. Skempton, 2002 This biographical reference work looks specifically at the lives works and careers of those individuals involved in civil engineering whose careers began before 1830 Tully's Scientific Books, Libraries and Collectors Andrew Hunter, 2016-12-05 In the 25 years since the last edition of Thornton and Tully's Scientific Books Libraries and Collectors was published scientific publishing has mushroomed developed new forms and the academic discipline and popular appreciation of the history of science have grown apace This fourth edition discusses these changes and ponders the implications of developments in publishing at the end of the twentieth century while concentrating its gaze upon the dissemination of scientific ideas and knowledge from Antiquity to the industrial age In this shift of focus it departs from previous editions and for the first time a chapter on Islamic science is included Recurrent themes in several of the ten essays in the present volume are the definition of science itself and its transmutation by publishing media and the social context Two essays on the collecting of scientific books provide a counterpoint and the book is grounded on a rigorous chapter on bibliographies The timely publication of Scientific Books Libraries and Collectors comes at the coincidence of the advent of electronic publishing and the millennium a dramatic moment at which to take stock The History and Poetics of Scientific Biography Thomas Södergvist, 2016-03-03 Biographies of scientists carry an increasingly prominent role in today s publishing climate Traditional historical and sociological accounts of science are complemented by narratives that emphasize the importance of the scientific subject in the production of science Not least is the realization that the role of science in culture is much more accessible when presented through the lives of its practitioners Taken as a genre such biographies play an important role in the public understanding of science In recent years there has been an increasing number of monographs and collections about biography in general and literary biography in particular However biographies of scientists engineers and medical doctors have rarely been the topic of scholarly inquiry As such this volume of essays will be welcomed by those interested in the genre of science biography and who wish to re examine its history foundational problems and theoretical implications Borrowing approaches and methods from cultural studies and the history philosophy and sociology of science the contributions cover a broad range of subjects periods and locations By presenting such a rich diversity of essays the volume is able to chart the reoccurring conceptual problems and devices that have influenced scientific biographies from classical antiquity to the present day In so doing it provides a compelling overview of the history of the genre suggesting that the different valuations given scientific biography over time have been largely fuelled by vested professional interests The Biographical Dictionary of America, 1904 New Guide to Reference Books Isadore Gilbert Mudge, American Library Association, 1923 Gaither's Dictionary of Scientific Quotations Carl C. Gaither, Alma E. Cavazos-Gaither, 2008-01-08

Rowland, 1996-01-01 Literature and the Science Tracer Bullet .1972 Marketplace addresses one of the great ironies of nineteenth century British and American literature the fact that authors of that era in voicing their alienation from middle class readers paradoxically gave expression to feelings of alienation felt by those same readers As William G Rowland Jr points out romantic writers thought of the market as conspiring against imagination Blake or telling the truth Melville and consequently felt frustrated with literary institutions Yet their frustrations writes Rowland helped to energize romantic work and explain its subsequent and continuing appeal The book opens with a survey of reading publics in Great Britain and the United States in the early years of the nineteenth century Rowland then presents individual writers including Wordsworth Shelley Hawthorne Poe and Emerson and their relations to their readers Finally Rowland shows how the idea of genius was developed by writers as different as Coleridge Blake Whitman and Dickinson and how that idea evolved as an antidote to the commercial literary marketplace of the nineteenth century A wide ranging and provocative book Literature and the Marketplace describes the relations between important British and American authors and the audiences and publishing industries of their era relations that were troubled uncertain and remarkably productive of literature William G Rowland Ir is the Director of Studies at Hereford Residential College University of Virginia This is his first book Index-catalogue of the Library of the Surgeon-General's Office, United States Army Library of the Surgeon-General's Office (U.S.),1920 **The Cumulative Book Index**, 1905 A world list of books in **Information Sources in Engineering** Ken W.
